Generations of Success

Past · Present · Future.

A solid foundation was firmly established in 1955 with the birth of Penncross. The Penn Bent family continued to grow, thanks to the introduction of the Penn A’s & G’s and Seaside II, followed by Penneagle II & PennLinks II. The legacy continues with the recent arrival of Crystal BlueLinks. Just like family, each new variety owes its best qualities to the generation that came before. The Penn Bent family from Tee-2-Green continues to revolutionize the industry, and remains trusted by superintendents around the world.
FEATURES

COVER STORY:
Industry outlook
20 ALL-INCLUSIVE
The industry pursues diversity initiatives.

Turfgrass management
28 TOPDRESSING TECHNIQUES
Superintendents find success with methods beyond the book.

Turfgrass management
36 WEED WARS
Superintendents look for ways to make herbicides more effective and affordable.

Course renovation
42 RESURRECTING TILLIE
Architects bring A.W. Tillinghast's hell-raising hazards back to life.

Facility operations
48 INVEST IN YOUR FACILITY
Targeted spending can boost cash flow and member satisfaction.

Course construction
52 REVIVING RESORT COURSES
Kaanapali Resort's North and South courses win back visitors to the popular Maui destination.

Product focus: Pond management
65 WILD BLUE YONDER
In a green-obsessed industry, one estate manager has learned there's no green without blue.

67 IN LIMBO ON THE LAKES
Two superintendents suffer through scorching heat to keep on-course lakes under control.

RESEARCH
60 TOXIN TRAIL
Four seemingly unrelated events lead to an unexpected scientific discovery.
A **turf** area 50 feet by 50 feet **produces enough oxygen** to meet the everyday needs of a family of four.

Welcome to Golf Course Industry TV – a one-stop Web site designed to enrich your business acumen as well as communicate with your peers through forums, blogs, groups and polls. Videos, podcasts and an extensive photo gallery also will provide you with an array of business and industry knowledge. Visit our new interactive site today – www.golfcourseindustry.tv – to create your profile and start networking.

**EDITORIAL MISSION STATEMENT:**

*Golf Course Industry* reports on and analyzes the business of maintaining golf courses, as well as the broader business of golf course management. This includes three main areas: agronomy, business management and career development as it relates to golf course superintendents and those managers responsible for maintaining a golf course as an important asset. *Golf Course Industry* shows superintendents what’s possible, helps them understand why it’s important and tells them how to take the next step.
FOCUS ON OPPORTUNITIES

People keep asking the same questions: When is the economy going to improve? Are we headed into a recession? When is the housing market going to turn around? When are gas and food prices going to come down?

Frankly, no one knows the answers to these questions, not even experienced economists — so stop worrying about them. Instead, focus on your facility and address your strengths and weaknesses. How is current business? How can it improve? What is management doing to better your business? Seek growth opportunities for your facility. Focus on your micro world, and let policymakers and governments worry about macroeconomics.

When the economy is booming, managers tend not to look at their operation as closely as when the market is slumping. During difficult economic times, cutbacks happen here and there in various areas of the business. Fewer crew members, a smaller marketing budget, fewer pesticide applications, no new equipment. Yes, expenses are one side of the business equation, but generating revenue is another — membership drives, special deals, giveaways, outings, leagues, events. There are many options.

Consider what's worked for you in the past and what hasn't, and analyze your short- and long-term business plans. For those who've been in the industry many years, think about what helped you through the recessions of the '70s (1973-1974, oil prices and unemployment), '80s (1980-1982, inflation) and '90s (1990-1991, the Gulf War and tax increases). Can what you did successfully then be applied to the current market? Or, did you determine what not to do during a recession back then?

It's obviously difficult for golf course operators to improve business significantly in the current economy. But the bottom line is that a successful golf facility comes down to two things: course conditioning and service. Simply put, those two aspects of an operation are going to carry a facility through difficult economic times. Many people say above-average service doesn't cost anything, and it's just a matter of stepping it up a notch. A successful business starts with employees who go the extra mile to make customers — regular and new — feel welcomed and appreciated.

During a time when many golf facilities are reducing expenses or erecting for-sale signs, be aggressive and think seriously about investing in your course. Maybe it's a greens renovation, or a complete redesign. Maybe you're able to do it all at once, or perhaps you'll progress nine holes at a time. Funds, ownership's goals and golfers' input will help determine the scope, but a renovation could give your business the big boost it needs during a sluggish period of economic growth. If you can pull it off, it's a great time to do it. An investment in your course now could pay off tenfold when the economy takes off in the right direction. Then, you can ride the wave of increased business while your competitors scramble to catch up to you.

And if you can't manage to spend a decent chunk of change renovating your course, hone in on the details of your facility and the little things that cause golfers to return to your place. Refurbish your signs and tee markers. Purchase new flags. Spruce up the areas around the clubhouse. Hire a photographer and promote your golf course as an oasis from stress. Survey your players and find out as much as you can about their likes and dislikes. Use your e-mail database to promotes specials and offer incentives. Do simple things such as provide free tees and ball-mark repair tools. Most of all, find out why customers don't return after they've visited. Remember it's much cheaper to keep a customer than acquire one.

Last but not least, remember that without great course conditions and attentive customer service, you won't be successful — regardless of the state of the economy.
Same name, different course

After reading your June 2008 edition, I want to point out what I think is a misleading statement. In “Curators of the course,” author Peter Blais writes (on page 59), “Alex Findlay ... designed more than 100 courses, including ... Aronimink Golf Club in Philadelphia.” Findlay helped design Aronimink when it moved from its 1896 original location in West Philadelphia to Drexel Hill, an immediate suburb of Philadelphia, and merged with the Belmont Cricket Club. But about 10 years later, in 1928, Aronimink expanded and bought a piece of property in Newtown Square, a western suburb of Philadelphia, and hired Donald Ross to design what is now known and recognized as the famed Aronimink Golf Club. So while Findlay did design the second site of Aronimink, he had nothing to do with the third and current famous course that Ross designed, which it seems the writer implied. I don’t want readers to be confused or misinformed.

Brotherly love

I just love Pat Jones’ “An Unbreakable Bond” article (page 82, June 2008). Even as a chapter executive, my major professor is still important. In fact, Nick Christians, Ph.D., was in the Iowa GCSA office recently. Jones continues to amaze me with his understanding of this brotherhood. I thank him for his efforts.

A little extra care goes into everything we do.

Take irrigation rotors. We inspect them inside and out to ensure they meet the same legendary standards that have made the John Deere brand so trustworthy. No wonder our rotors come with a three-year warranty and are key components of irrigation systems selected by the PGA TOUR®. To learn more about all our irrigation products, visit www.JohnDeere.com/golf.
PERSONAL WEB SITE VALUE

Personal Web sites are playing an increasingly important role in our careers. Individuals and employers are depending on them more frequently for hiring decisions. People who’ve invested time and effort creating interesting Web sites have a distinct advantage because they expose their capabilities in a unique way.

I gained insight about personal Web sites after reading an article about their benefits. I investigated online and discovered a few industry professionals had created Web sites. I reached out to a few of them to understand their experience and seek advice.

As a result, I determined building a personal Web site would be an investment in my future. It would provide me with a unique opportunity to organize my career portfolio and help prepare for the next stage of my career in demanding and competitive environments. It could be the item in my cover letter that distilled me from my peers. It would allow potential employers to see my resume in a way that paper couldn’t portray. It would describe my job experiences through visual exposure and my communication skills through samples of my written work.

My first decision was whether to build my personal Web site myself or hire a professional. I learned to build a Web site through an introductory Web site-building course at a local library. I had built a simple Web site for my hockey team that included season stats and a few team photos. I needed more information before I could make the final decision about a personal Web site.

There are three common costs associated with a personal Web site.

• Buying a domain name (www.yourname.com), which costs about $10 a year.
• Hosting a site (placing it live on the Internet), which starts at about $10 per month.
• Producing words and graphics specifically for the Internet.

Also, there are many tools available to help build a personal Web site. Choosing the right tools is a matter of personal preference.

• Common software such as Dreamweaver or Microsoft FrontPage ensures better compatibility with browsers such as Internet Explorer and Firefox.
• Internet programs at www.geocities.com and www.godaddy.com are available for free download and require no technical knowledge. Both offer free, easy-to-use templates, images, colors and navigation buttons. You also can define your Web site or which Internet program you use to build it, always avoid vendor lock-in. Ensure you can move your Web site easily without hassle to any other Web hosting provider. Finally, copyright your site by adding the following to the bottom of each page: “Copyright 2008, by Your Name. All rights reserved.”

Remember, creating a Web site is a simple task that can be intimidating because of the time involved and options available. Whether you choose to create a Web site yourself or hire a professional, creating a good one requires a lot of time and effort. A good site isn’t about graphics and a fancy layout; it’s about quality content ...

A good site isn’t about graphics and a fancy layout; it’s about quality content ...

In the end, I decided that with the personal Web site I envisioned I needed to engage a professional for help. I found a Web site designer who was willing to take my ideas and help me create the site I wanted. A professionally created Web site can be built for as little as $700, depending on what you’re looking for.

Explore your options and see what best fits your time and budget. The cost and energy will be well worth it. Following the initial cost of using the professional Web site designer, my Web site, www.tavishorton.com, cost me $10 a month. I paid my hosting fees for the entire year in advance and received a small discount.

There are two other items to consider in this process. No matter where you host your Web site or which Internet program you use to build it, always avoid vendor lock-in. Ensure you can move your Web site easily without hassle to any other Web hosting provider. Finally, copyright your site by adding the following to the bottom of each page: “Copyright 2008, by Your Name. All rights reserved.”

Remember, creating a Web site is a simple task that can be intimidating because of the time involved and options available. Whether you choose to create a Web site yourself or hire a professional, creating a good one requires a lot of time and effort. A good site isn’t about graphics and a fancy layout; it’s about quality content, which many people are likely to find useful. A willingness to invest time in learning and experimentation will help, too.

I enjoyed the time I spent building my first personal Web site. If you have any questions, feel free to contact me through my Web site. I would be happy to answer your questions.
