HeadChecker™

NOZZLE DISCHARGE PRESSURE GAUGE
HeadChecker™ combines a solid brass Pitot tube and a liquid-filled 160 psi gauge to create a handy tool for measuring nozzle discharge pressure. Assuring correct pressures is essential to maintaining highly uniform irrigation systems. The 160 psi gauge can also be used separately to measure pipeline pressure.

TurfSpy™
EARLY STRESS DETECTION GLASSES
Disease, drought and weed invasion are plant and turf killers. But by the time you see them it can be too late. TurfSpy™ glasses, with stress detection technology developed by NASA, lets you “see into the future” to identify problems 2-10 days before they are visible to your naked eye. Keep your turf and vegetation healthy BEFORE serious problems arise.

features
- Shatterproof/polycarbonate stress detection lens (ANSI approved safety lens)
- Wrap-around lens limits ambient light for optimal detection
- Sports frame with adjustable ear piece
- Lightweight case included

fusarium patch
pythium blight
yellow patch (rhizoctonia)
brown patch
anthracnose
get a jump on broken or poor-performing sprinklers
highly efficient spot watering saves time and labor costs
poa grass invasion identified BEFORE it takes over
superior weed location and spraying saves time and money

HOW IT WORKS
Dying vegetation absorbs and reflects sunlight differently than when it’s healthy. The earliest signals occur at the outer limits of the human visual spectrum, and are rendered invisible compared to the predominant middle wavelengths. TurfSpy™ filters the light in the center so that fringe spectra, which show early plant stress, become visible.
