SMART BATTERY CHARGERS

Mary E. Yarick, professor and program coordinator for turf equipment management at Florida Gateway College in Lake City, Fla., has an idea for charging the 12-volt batteries on turf equipment that does not get used often and/or during the off-season when equipment is not being used and remains in a discharged state resulting in sulfated plates and eventual failure. A Schumacher SE-1-12S battery charger is available through R & R Products and costs about $30. It is designed for equipment in storage with a 1.5-amp trickle charge and automatic operation and comes with a mounting plate (which slides underneath the battery), hardware and short 115-volt power cord. Another option is to install a CTEK Multi US 3300 battery charger that ranges in price from $50 to $250. The unit puts the batteries through an eight-step reconditioning process that revives dead or borderline batteries by maintaining them through cleaning, testing, discharge and recharge and fast and slow charging. CTEK also has connector options to allow the charger to be used on more than one machine. The mounting of either charger takes less than an hour.
Sometimes being aware of water management means equipping the course to handle too much water.

district goals were not served by the project. In addition, maintenance costs at The Bridges are already trending down: less maintained acreage; no more clean-up costs related to regular stormwater damage and better course revenues. The flooding used to be so bad, the course had to be closed for days at a time; Poplar Creek had a reputation as a place that was always soggy, which further eroded rounds.

We frankly see stormwater management and water quality management as largely one and the same. When you gather all that water on a golf course site, you may as well clean it before releasing it to the water table or a nearby river/stream. Our firm played a role in pioneering this dynamic with our renovation work at a pair of Chicago facilities in the early 2000s. Our work at The Traditions at Chevy Chase in Wheeling won a Renovation of the Year award in 2004, but our work at Deerpath Golf Course in Lake Forest is perhaps the better example.

The course had been there since the 1920s but a hospital – basically a giant slab of concrete and hardtop – had since been built across the street. A recent expansion made things worse. Run-off was supposed to be contained but in reality it wasn’t: it caused serious flooding on and around the golf course.

In the end, it was the golf course that solved the problem, and the impacts went well beyond the course boundaries. Lohmann Golf Designs designed and built an elaborate, interlinked water storage system at Deerpath that gathered all that water, created an extraordinary new wetland habitat, and just happened to bring some nifty new risk-reward strategies to several holes. Pretty neat solution – better than costly storm-sewer upgrades. But we did more than that: The on-course filtration capability we created through this chain of wetlands vastly improved the quality of retained water. This matters, because no water storage system is entirely closed. At Deerpath it continues to head off site today – all nice and clean – into the Skokie River.

That’s not exactly making lemonade from lemons. But it’s close.

HELP WANTED

BUSINESS REP POSITION FOR ASIA PACIFIC GOLF REGION
I'm seeking an agent position to represent golf course product distribution in the Asia Pacific Region. Based in Manila with easy and affordable access to all of the Asian market. Years of Asian golf business experience – I know the market and people. Well networked and tapped in throughout this growing golf region. Impeccable industry leadership credentials worldwide.
Contact me in strictest confidentiality at AsiaPacificGolfBusiness@gmail.com

Let us help you get the WORD OUT.
Golf Course Industry provides a cost-effective, high impact way to promote your company’s products and services. Our professionally designed article reprints can be used as direct mail pieces, sales literature, training aids or trade show handouts. For even more targeted marketing, add your customized advertising message, logo, mission statement or other valuable company information.

THE HOT TUB OF OPTIMISM

From the time I hit the ground in Vegas for the GIS I was bombarded, barraged and berated about the “sense of optimism about the market.”

It was almost as if golf’s powers that be had gotten together last year and decided to sing off the same sheet. “We feel a sense of optimism in the market,” they all said as if scripted to do so. Imagine that.

Thus, every report about the industry, every blog and every Tweet seems to (cautiously) resonate with sweet, sweet hope. We have (maybe) turned the corner! Golf is (sort of) back! We have staved off disaster (for now)!

As my tone might suggest I, for one, am still having a hard time drinking the optimism Kool-Aid. I’ve been around a long time and I have learned the value of being at least mildly bearish when I sense the gentle tickle of sunshine being blown up my butt.

For example, I’ve learned not to make broad, rosy economic pronouncements. This “teachable moment” occurred after a top-level superintendent called me out at the end of a gloomy state of the industry speech in Connecticut a couple of years ago: “Wait Jonesy... weren’t you the one who told us for years that East Coast private clubs were recession-proof?”

Did I really say that? Not me! Must have been my evil twin or Bill Cowher or somebody else with a cheesy porn mustache and a lot of loosey-goosey opinions.

Okay, so I’m not friggin’ Nostradamus. Mea culpa.

I will admit there are reasons to dip our toes in the hot tub of optimism:

• The weather is good and rounds are up. (Duh. Even a broken clock is right twice a day and it’s about bloody time for the seasonal facilities to finally catch a break.)

• The stock market and housing starts and unemployment and all the other such random statistics on the CNN ticker are better than they were a few years back. (Thanks for the fine work, Wall Street! I’m sure you’ll never let us down again. Glad you finally have it all figured out.)

• A lot of facilities have regrouped, gotten their finances in better order and tried to change. (My gut tells me many courses are still operating at a 2006 status quo and “waiting for things to bounce back.” This is roughly equivalent to waiting for Jimmy Hoffa and Amelia Earhart to come walking around the corner arm-in-arm.)

So, as golf’s designated curmudgeon, I automatically worry that one of the kids may have peed in the hot tub of optimism. So I’m going to take a pass. But climb right in if you want. I’m sure it’s fine!

Let’s saunter across the patio to the swimming pool of pessimism and see what we find floating there:

• Massive competition for core customers’ time due to work expectations and kid-related obligations. In my lifetime, we’ve gone from children generally roaming free on weekends while dad sucked a few beers with his buddies on the back nine to today’s hellish parental death march schedule of soccer practices, dance recitals and travel hockey tournaments.

• Value pollution in the form of discounting. When a lousy operation up the street is giving away rounds of golf, it’s pretty damned hard not to panic and stoop to their level. When the process goes national and is being driven by online tee-time discounters, how do you ever get back to a fair price for a round of golf?

• Some kind of pervasive aversion to providing good service. For god’s sake... there are 15,700 of you competing for a dwindling customer base. Can’t you at least slap on a smile and pretend you’re happy to see me?

So, let’s conclude our little chat about optimism over at the tiki bar of reality. I’ll have an O’Doul’s, but you should probably get something a bit stronger because this is going to sting a little. Are you ready?

Yes, optimism is a lovely thing. It creates a bit of a placebo effect that seems to make those nasty symptoms go away. It can become a kind of self-fulfilling prophecy. All of that is fine, but here’s the thing:

You can’t eat optimism. You can’t use it to pay your bank note. They don’t accept it as barter for fertilizer at your local turf distributor. Optimism won’t put one round on your tee sheet or get you one new member to sign on the dotted line.

Want to feel really optimistic? Take immediate steps to offer good golf at the right price, differentiate your course from the pack and provide excellent service. You can’t solve the social/time compression problem but you can steal the rounds from lesser operations just by getting better and telling people about it.

So, there, that’s what I think about the whole question about optimism. Happy now? 6CI
Focused on science, not the latest fad.

SipcamAdvan is all about minimizing turfgrass stress and maximizing turfgrass health. With that focus in mind, we are devoting considerable resources to our exclusive line of ETQ™ turf fungicides. Supported by lab and field research, these science-based solutions blend proven active ingredients with ETQ technology. The result is simultaneous disease control and protection from UV light, heat and other stress factors. Your reward is improved turf color, strength, density and consistency . . . along with excellent disease control. ETQ technology. Discover the benefits.
