Kills the Grub of Japanese Beetles in the soil!

CONSIDER THESE POINTS—

1. Offers permanent control. One treatment being normally all your turf will ever require. Consider the future savings in money and labor.

2. Easy to apply—little labor involved.

3. Nature's own method—milky disease spreads rapidly in the soil. (It is harmless to humans, animals and plants.)

4. One pound of JAPIDEMIC treats 4,000 sq. ft. 10 to 11 lbs. treats one acre. At a cost of $5.00 per lb. it is most inexpensive when you consider it is a permanent control.

JAPIDEMIC is produced in accordance with the method covered by U. S. Letters Patent No. 2,258,319, and under license granted by the Secretary of Agriculture.

Noer, Fred Grau and other nationally known course maintenance authorities.

SOS for Yank Clubs.—Henry Cowen, v. p., Crawford, MacGregor, Canby Co., got this letter from a service man in England:

"How can I have some golf clubs sent over?

"I am in England and it is some distance to London from where I am stationed, so it is pretty hard to get hold of some good golf clubs.

"I am on a golf team over here. We just picked up a regimental team last week and won the Red Cross Sectional Golf Tournament. Out of four prizes awarded we took three of them. If we had been lucky enough to have had about five MacGregor clubs each we would have done even better.

"I want to buy a few of your clubs such as a No. 2 wood and a few irons. No. 3-5-7, and a putter.

"If you can send me these five clubs
