and provide badly needed new locker facilities and showers.

Additional and more comfortable card playing facilities for the long dreary winter months.

Bring our Club House into harmony and keeping with Canterbury's great golf course.

Permit us to decrease our Resident or golf-playing membership and to increase our Social membership, thereby spreading our operations over the entire year.

**Employees Quarters Needed**

Since 1936 when the club constructed its swimming pool a portion of quarters formerly occupied by employees has been used as temporary locker-rooms for children using the pool. Correction of this situation is one of the long overdue details of the construction program.

Canterbury, although a long way from having adequate quarters for employees, wasn't as deficient in this respect as many another metropolitan district club of high general reputation.

That condition is one that has made it difficult for many managers to get good help at the often remote golf club locations. Members seldom have any ideas of the quarters the employees have to occupy.

Club directors often are not much better informed. At a board meeting, then at a general meeting of one first class club in the Chicago district, photographs of the employees' living quarters were passed around. After the evidence had been looked at there was no difficulty in having approved an assessment for improvement in this respect.

GOLFDOM has maintained for the past 10 years that if members of some prominent clubs saw quarters in which their employees have to live the members would be queasy about eating food prepared and served by people who would live in these tenements.

Canterbury's attention to this important phase of operation is shown to be excellent business by a paragraph in Pres. Homer H. Horth's annual letter which reads:

"The excellent cooperation received from our employees during these unsettled times is appreciated by the Board and, we are sure, by all the members."

The Canterbury improvement campaign also includes something that many other clubs found this spring was needed at their courses; better fairway drainage. Better tile drainage has been attained at Canterbury and a stream widened. Earth from the widened stream has been used in enlarging tees. Tee enlargement is another need of many clubs. GOLFDOM'S noticed that tee reconstruction last fall not only pays full attention to machine maintenance but in many cases has departed from the rectangular design with results that certainly are more natural looking and more pleasing to the eye.

**Wallace to Head USGA at Annual Meet, Jan. 10**

Fielding Wallace, Augusta, Ga., chm. of USGA Green section since 1940 and a member of USGA Executive committee since 1939, has been nominated to presidency of the USGA. Nomination is tantamount to election at the Association's annual meeting which will be held at Waldorf-Astoria hotel, New York, at noon, Jan. 10.

Wallace was pres., Southern GA 1937-46. He was a member of the U.S. Seniors' GA 1938-43 and now is Pres. Emeritus for life of the Augusta National GC, having been pres. of that club for 15 years and sec. since its inception in 1931. He is pres., Southern Cotton Press Cloth Mfg. Co.

Totton P. Heffelfinger of Minneapolis and James D. Standish, Jr. of Detroit have been nominated for vice presidencies now held by Francis Ouimet and Wallace. Ouimet is retiring from the USGA administration to devote more time to his personal affairs. He has been captain of every USGA Walker Cup team.

Charles L. Peirson of Boston and James W. Walker of New York have been nominated to the executive committee to succeed retiring pres. Littlefield and Ouimet. Walker is son of George H. Walker, USGA pres. in 1920 and donor of the Walker cup. Isaac B. Grainger, Montclair, N.J., will be re-elected sec.; Daniel A. Freeman, Jr., Mount Kisco, N.Y., will continue as treas., and James H. Douglas, Jr., Chicago, will continue as general counsel of the USGA.

**Golfcraft in New Factory at Chicago**

Golfcraft, Inc., officially opened its new plant at 1700 W. Hubbard st., Chicago, Dec. 8, with a house-warming attended by many pros, club officials, manufacturers and salesmen. Pres. Ted Woolley of Golfcraft claims the new plant is "the world's most modern manufacturing plant devoted exclusively to the manufacture of golf clubs." Layout, construction and equipment of the plant gave him excellent basis for his claim, according to many competent observers who attended the opening.

Change-over from Golfcraft's old plant was made smoothly and production at high level was quickly attained in the new location.
