RUBIN GRAIS & SONS
325 S. Wacker Drive • Chicago 6, Illinois

with the Physical Education dept. of Long
Beach (Calif.) State College. Her book is
a collection of material on directing golf
classes that has been compiled over a
period of several years. Subjects covered
include fundamentals of the swing, put-
ting, practicing, competition, etc. There
is a glossary of commonly used terms,
check lists covering different parts of the
swing and even a pair of crossword puzzles for students who may be short on
agility but long on intelligence.

Robert W. Schery, who has been a
speaker at meetings of the Central Plains
Turfgrass Foundation and other mid-west
and central states conferences, has written
"The Lawn Book", which is published by
MacMillan. While not aimed at the profes-
sional turf manager, there is much usable information here. Of particular in-
terest are the debunking paragraphs at
the end of each chapter.

New York Leads in Course Sites
But California Closes Gap

According to the Greenline, West Coast
publication of the National Golf Founda-
tion, California has become the second
ranking state in total number of golf
courses, but still trails New York by 75.
In the last 30 years, California’s total has
been increased by 102 while New York
has gained only a single course. States such
as Illinois and Wisconsin have shown ac-
tual decreases in playing sites in the last
three decades, Massachusetts is even,
Florida has gained five and Michigan,
six. Par 3 courses are taken into consid-
eration in the following tabulation:

<table>

Shifting population, real estate de-
mands, the Depression and changing pat-
terns of play (i.e., Par 3 courses) are said
to be the main factors affecting the in-
crease of courses in various parts of the
country.
