After several years in this business we doff our hats to the golf course superintendents. They deal with beauty. They have to control the natural beauty and improve and maintain the man-made beauty. They must always be on alert. Today Mother Nature may be their ally, tomorrow, their deadly enemy. Greens, tees, fairways must play their best. B. Hayman people work with these men constantly. We know their problems, and they like our advise. Give us a call when you need help.

"Several of the greens have a $\frac{1}{4}$" sand layer at a depth of 2". After irrigating the water would just sit over that sand layer, keeping the soil very moist. Aqua-GRO moved the water out. The greens were previously hand-watered on this course. I haven't done any hand watering at all. Several greens used to ball mark real bad. Now they stay firm. All my greens, tees, collars, approaches, and walk off areas are treated. Very seldom do I ever do any syringing. The greens maintain very good color and I spend about half the time watering they previously used."

It's surprising the number of press releases that this publication receives in which the name of a club is mentioned but not the city in which it is located. Maybe the publicists feel that their club is the only one of its kind in the country. Construction of $1.5 million Simi Hills CC course in Santa Susana, Calif. to start this year. A semi-private 18, it was designed by Bill Bell. Village of Edina, Minn. has started to build standard 18, range and 9-hole Par 3 at cost of $575,000. Appropriation for clubhouse, maintenance building and other facilities will run to an additional $250,000, according to estimates. Revenue bonds will pay for the development which is to be ready in July of 1964.

memorial award for “outstanding contribution” to golf... Confidently, we've got to tell you we've never seen anybody who has done anyway near as much for golf as golf has done for him... That certainly means us, too... In working for the interests of professionals, superintendents and club managers, and for golf as a good business as well as a great game, we have been happy and have made some money... Hard to beat that combination... Except, maybe by watching and worrying to protect a record of helping and not throwing curves... But that's what everybody is expected to do so we can't brag about that any more than Caesar's wife did about her kind of a record.
