If you haven’t thought about specifying plastic pipe for your course’s sprinkler system, consider this:

Municipal water systems in all parts of the country are switching to plastic pipe. Because it stands up as well as metal pipe. And installed cost averages 50% less.

A sprinkler system using CRESline PVC Plastic Pipe saves you around half the cost of nearly any other type. It goes in fast and lasts indefinitely. Installation of an 18-hole system takes about 5 weeks, seldom disrupts play.

Hundreds of courses throughout the country are sprinklered the CRESline way (names on request). It is rustproof, highly resistant to corrosion, available with a full line of fittings—and guaranteed right in writing.

Don’t let a browned-out course drive your golfers to greener grounds. Look into CRESline PVC Pipe, the logical successor to metal pipe on all counts.
