PUT WINTER TREADS ON YOUR GREENS

Highland Colonial Bentgrass—one of the most economical of the fine-bladed varieties—offers a distinct advantage in an overseeding program. It shows uncommon strength during that crucial spring transitional period when your dormant grasses are coming on. While many of the cool-season grasses in your mixture may fold sooner than you like, you can count on Highland to hang in there until the native grasses recover.

With 8 million seeds per pound, your potential number of plants is exceptionally high. Highland holds its color in the winter and you can close-cut it to ¼ inch.
