Joe Ryan today.

Joe Ryan, 86-year-old former (1938) president of the Golf Course Superintendents Assn. of America, thinks it isn’t essential to be college educated to be a good superintendent.

“I came off the farm, worked for a munitions plant during World War I and then became a superintendent,” he relates from his retirement home in Miami, Fla. “As long as you have a knowledge of the maintenance required on a golf course you should be able to do the job.

“People used to think it was just necessary to mow the grass—some still think so—but there is much more to it than that. The status of the superintendent was elevated when the clubs realized they were in need of them.”

Ryan recalls that in the old days, clubs thought all a superintendent had to do was mow the grass and dump on fertilizer. Many of the greens committee chairman were stingy with money for supplies as related in this story by Ryan.

“The first greens chairman I worked under was a Quaker and was he tight,” Ryan continues. “I struggled for a year trying to convince him to spend some money, and get myself another job at the same time. I wasn’t able to do either,” he laughs, “but that guy sure had a good financial report. Then one day he called a meeting and asked me to attend. He said come loaded for bear. After opening the proceedings he turned the meeting over to me. I told the members I had had a first-class push around. I had been deprived of the needed fertilizer—he had let me buy 10 tons, a piddling amount, while the greens chairman before him had allowed 40 tons. The greens chairman then excused me and adjourned the meeting saying we weren’t getting anywhere. However, things were better after that.”

Ryan got his first golf course superintendent job through his brother, Tom, who was a professional at the Town and Country Club, then a new nine-hole course in Bethesda, Md., a little town above Washington, D.C. “Tom suggested me to the chairman of the greens committee, said I was a good man, and I got the job,” Ryan states. “From there I went to Rolling Green in Philadelphia and stayed until 1957, when I retired.”

It was back in the early 30s when Ryan first became interested in the sectional and national golf course superintendents associations. In fact, he was interested by some friends before he was eligible to join in 1932. “I first got on the national board at the convention in Washington in 1937,” he says. “The real problem we faced was that most clubs and superintendents didn’t realize it was necessary to get knowledge from a convention on what should be done on their courses. After we got functioning, the clubs realized the organization could help them and they backed us up.

“Previously, many clubs paid more attention to the county agent than they did to their course superintendent. The county agent could talk to the club officials better and we often asked him to do so to help us get enough money for the needed implements. Courses still have a lot of the same problems today, but the superintendents now have the money as well as the knowledge to solve them. It’s difficult for any organization to solve individual problems because a big problem to one club may be a little one at another,” Ryan says. “Superintendents should (Continued on page 26)

HARRY FAWCETT: CMAA, 1941

“The man who refuses to go along with the advances unfolded each day in our industry takes his place along with the farmer...who beheld the giraffe for the first time and then exclaimed, ‘There ain’t no such animal.’”

Harry J. Fawcett

For over a half century, Harry Fawcett has resisted, been a part of, encouraged and made some of the advances which have led to the success of the Club Managers Assn. of America. “I have at various times in my career...rejected what later proved to be revolutionary,” says Fawcett, who reigned as president of the CMAA in 1941. “Only...I later on accepted these ideas, subscribed to them and advocated them for others.”

The contributions which Fawcett has made—not only to the CMAA, but to members of clubs, employees of clubs and the golf industry—place him as a prime candidate for dean of the CMAA presidents.

In 1914 at the age of 24, Fawcett chucked a job with the railroad to take a job as assistant and later manager of Cedarhurst CC, Long Island, N.Y. Fawcett later moved to Chicago where he served as manager of the Standard Club, The Down Town Club and finally the Lake Shore CC. He later became president of the $8 million Shoreland Hotel, where he planned the building, equipment, layout and furnishings of the 800-room facility.

It was during his tenure at Lake Shore that he was elected president of the CMAA. “My primary emphasis in 1941 at the convention, held in Buffalo, N.Y., was to strengthen the national organization and adopt a uniform system of accounting for clubs. Most city and country clubs had very poor systems of bookkeeping,” states Fawcett. “To get greater involvement and participation in the national organization, I strongly advocated that a chapter member must also be a member of the national organization.”
TOM WALSH: PGA, 1940, 1941

In 1909, when Tom Walsh was a 11-year old caddie, the Professional Golfers’ Assn. of America didn’t have an educational program—there wasn’t a PGA.

In 1940, when Walsh took over as president of the 1,400-member PGA he started an educational program with a $1,000 allotment.

Today the theory behind Walsh’s educational programs still exists: however, the scope has been broadened to include over 7,000 golf professionals, and encompasses an educational program estimated in 1972 at over $230,000.

Walsh’s attempts to educate the professional and the public have gone a long way toward placing golf near the pinnacle of this nation’s leisure time and recreational activities.

Today at age 74, Walsh owns a golf course and is still an active head professional. He shot a 77 last year and his golf shop grossed $150,000. He has seen his struggles to improve the status of the golf professional finally begin bearing fruit, not only for the touring pros, but more importantly, for the underpublicized and underrated home or club professional.

Educating its members has been a goal of the PGA since its inception in 1916, but an actual training program never got beyond the drawing boards in the early years. To understand the evolution of the educational program conceived by Walsh and other PGA officials in 1940, it is necessary to examine the steps which led to the creation of a program.

The eldest of 10 children, Walsh got his golfing baptismal as a caddie at Beverly CC in Chicago. Because the caddie system was “the way” to become a head professional, his initial crusade in golf revolved around improving the lot of his fellow caddies.

“When I was 12 years old, I participated in a caddie strike for more money,” Walsh recalls. “At the time we were getting 15 cents an hour and we upped the demand to 20 cents,” he laughs. “We didn’t get the nickel raise, but a great fringe benefit was that the caddies were allowed to play on Mondays, and I guess this is when realization of the need for increased education began. With my four golfing brothers—Frank, John, Marty and Packy—we organized a golf school in the Chicago area. I went to Arch Ward, editor of the Chicago Tribune, and we started the largest effort toward educating the public about golf with the Chicago Tribune Golf School in 1933. We eventually gave golf instruction to more than 100,000 Chicago-area golfers until the school’s demise in 1970.”

It was during this period (1927) that Walsh attempted to find out what made a successful golf professional. “We had our own individual ideas on how important we were and what our functions at the club should be, but the low income of many of the professionals convinced me that we were not giving the public what they wanted. We ran a survey in our golf shop in 1927, but we didn’t ask the professional, we asked the people who employed us—the members,” he says.

“We had this electrical box rigged up where all of the people who came into the golf shop could mark down what they looked for in a golf professional. Their responses were startling and almost unanimous,” Walsh recalls, “and destroyed some

Walsh continued from page 23

of the previous notions which some of the ‘prima donna’ professionals had been operating under. Some pros felt as long as you played good golf or improved the members’ golf game they would patronize your shop. However, the first thing which golfers looked for in a professional was personality,” Walsh comments. “Next in order of importance were teaching ability, a neat appearance and a well-stocked pro shop. Trailing in order of importance were playing ability, keeping appointments, club storage room in good order, knowledge of fitting clubs, don’t gamble, knowledge of the rules and interest in caddies. The results of the survey surprised most of the professionals,” Walsh says, “because we were inclined to put playing and teaching ability in the top slots.”

The emphasis on personality, teaching and merchandising indirectly set the stage for the future PGA educational program. “I had always wanted to build a daily fee course,” he says, “and I bought land in 1927 and built Westgate Valley in Chicago. The course opened in 1929. Three months later the Depression left me with a $90,000 mortgage. The struggles of most golf professionals to try to make a living during the Depression made me realize that only greater emphasis on education was the answer if the pro was to get out of a rut.

“You see,” Walsh continues, “the pro was not only financially poor during the 1930s, but also suffered from a poor public image, in-fighting within the sectional organizations, a lack of communications with his members and the national organization and extremely bad relations with golf equipment manufacturers. Because most of the professionals had risen up through the caddie ranks,” Walsh explains, “they could teach and play golf, but the business side of golf was almost totally ignored. Business procedures, accounting and merchandising were foreign to us because our education, few of us had any college training, did not extend to the business arena. Our poor relations with manufacturers was due to the poor credit risks of professionals. Bills weren’t paid and the pro seldom stocked enough merchandise or compromised some managers by commissions paid on club purchases. Fortunately, today’s codes of ethics and higher salaries have all but eliminated those practices.

One very sore point with Fawcett and one he feels bears correction to meet the needs of the future concerns the relationship of the CMAA with the National Club Assn.

“I have always believed in the merger of the two organizations,” says an adamant Fawcett. “Why should two organizations duplicate each other’s scope and usefulness when one, with one office expense for payroll, etc., would solve both associations’ problems. I proposed that clubs be allowed to join CMAA in 1929 as did the late Darwin Meisnest and B.E. O’Grady and the response then from CMAA officials was downright rude. In fact Meisnest tried to present the idea of a merger to a CMAA board meeting and they refused to even let him appear. An example of the pettiness,” Fawcett recalls, “was a statement later from one CMAA president that went, ‘What have we as managers got in common with club presidents?’ I think a lot of the old timers who fostered the separatism of the two organizations...
Only the Ryan "Green Team"

provides the perfect system

for keeping perfect greens.

The perfect combination of equipment for maintaining superb greens is the Ryan "Green Team". This turf trio of rugged, proven machines provides a system for keeping perfect greens.

First, you use the Ryan Greensaire (1) which aerates and dethatches in one easy operation. The Greensaire removes more cores (3" long) than any other aerator made. Its fast, clean coring action removes over 2 cu. yds. of soil and thatch per 5,000 square feet.

Next, use the Ryan Mataway (2), or Ren-O-Thin, to break up the cores in just a few minutes. Its vertical blades can be set to skim the turf surface or lowered to remove additional thatch.

Completing the system is the Ryan Spread-Rite (3) which can top dress, and drag a freshly aerated green. For perfect greens, use the perfect system... The Ryan "Green Team".
