for further study. Assistant Secretary for Employment Standards Donald Elisburg explains that the regulations would eliminate the unfair job advantage which members of discriminatory organizations have over non-members.

Instead of going into effect February 17, as originally scheduled, the regulation will not become effective until at least mid-April. The National Club Association has launched a major campaign to have the regulation withdrawn completely.

REGULATION
NACA says pesticide regs lack scientific basis

A top spokesman for the agricultural chemicals industry called on federal regulators to begin basing their pesticide policies on scientific rather than political judgments.

In a speech before the 35th Annual Meeting of the Northeastern Weed Science Society, Dr. Jack D. Early, President of the National Agricultural Chemicals Association (NACA), said that the pesticide industry was not adverse to government regulation "as long as the regulators base their decisions on scientific principle instead of political expediency.

"Unfortunately," he added, "in the political setting of the recent past, we have found that the latter supersedes the former more often than not."

It was everywhere at the GCSAA Anaheim conference and show. I heard it discussed in registration lines, in exhibit booths, in hotel lobbies, restaurants, and hospitality rooms, on the shuttle bus, at the Golf Business Superintendents Advisory Committee meeting, inside and outside educational sessions...the water shortage and anticipated drought for many sections of the country. The expressions of concern and frequent questions seemed like echoes as I moved from one group to another. "How are you coping with the situation?" "How do you plan to conserve and use less water while trying to maintain adequate playing conditions?" "How will your maintenance program be affected?" "What's your plan?" "Have you heard any good ideas from anyone who has come through a drought?"

Opinions were expressed, suggestions were given, past experiences were outlined...and then the same questions were tried on another individual or group. Definitive answers are hard to come by. Occasional suggestions of "rain dances" and "prayers" were accepted in the same spirit as they were given: light heartedly.

However, not everyone in the profession had the opportunity to express concern and gather suggestions in Anaheim. Fortunately, there are several local associations and chapter newsletter editors working hard to bring about an exchange of ideas, techniques, and programs that will help all superintendents in their area. I commend the approach that Pat Lucas, editor of Tee To Green Newsletter (Metropolitan GCSA) has taken. Through the newsletter, Pat is asking all members to share their individual ideas on coping with the serious water shortage. Survey cards printed with "my ideas on coping with less water are:" have been enclosed with the latest newsletter. In turn, these ideas will be published in succeeding issues of Tee To Green.

Golf Business wants to join this collective effort of sharing ideas and suggestions for coping with the serious water shortage, by communicating your ideas nationwide among our 17,000 monthly readers. Commencing with the April issue, Golf Business will devote as much editorial space as necessary to communicate the ideas, suggestions and opinions submitted by you, the readers; whether you be superintendents, distributors, suppliers, educators, associations, etc. Additionally, water management will be a regular editorial topic in Golf Business throughout this critical period. With your individual help and input, Golf Business can put these ideas and suggestions to work on a nationwide basis.

Write or call Ron Morris, Managing Editor, with your ideas and suggestions. Ron's address is: 7500 Old Oak Blvd, Middleburg Hts., OH 44130, phone: 216/243-8100, ext. 370. Don't put it off; others are depending on you.
