Let us know about your people on the move. Send information and color photos to Golfdom's Larry Ay- ward at 7500 Old Oak Blvd., Clevel- land, 44130. Fax information to 440/891-2675 or e-mail to layward @advanstar.com.

### The Company Line

#### Turf collection system

John Deere's TC125 Turf Collection System is a tow-behind attachment that allows one person to pick up and dump turf debris, such as aeration cores, sand, clippings, leaves and thatch. The TC 125 covers a swath of 48 inches wide and has a hopper capacity of 25 cubic feet. With a brush speed of 500 to 600 rpm, an average-size green can be cleared in about 15 minutes.

For more information, contact John Deere at 800/537-8233, www.deere.com or CIRCLE NO. 201

Greensmower

Hudson Sales & Engineering Inc. offers its Hudson-Star greensmower, which provides a cut from one-eighth to three-eighths of an inch. Cut adjustments of one-thirty-second of an inch or less can be made to assure a proper cutting height. The mower has 11 computer-balanced cutting blades.

For more information, contact Hudson Sales & Engineering at 877/547-3367, hudsonstar.com or CIRCLE NO. 202

#### Sub-soiling tools

**Brillion Iron Works** has one- and two-shank sub-soilers that use the same shanks, points and wearstrips that have been used on its larger sub-soilers. One- and two-shank sub-soilers can be used by those needing aggressive subsoiling but are limited by tractor horsepower or working space.

For more information, contact Brillion Iron Works at 800/409-9749, www.brillionfarmeq.com or CIRCLE NO. 203

#### Mini-loaders

**Gehl Co.** introduces the Gehl Advan- tage, a line of mini-loaders designed with big loader features in a choice of two compact maneuverable packages, according to the company. Choose from skid-steer or articulated-steering styles. As narrow as 32 inches, the mini-loaders are effective for turf maintenance, landscaping and light construction.

For more information, contact Gehl Co. at 414/334-9461, www.gehl.com or CIRCLE NO. 205

#### Power landscape rake

**Glenmac/Harley Power Equipment** offers the Harley Model 56 Power Box Rake, a 72-inch bi-angular, bi-directional power landscape rake for skid- steer loaders. It works somewhat like a tiller, but also levels, pulverizes, rakes and collects rock, according to the company.

Bi-angular construction allows the operator to angle the single roller and twin barrier up to 20 degrees left or right for grading and windrowing.

For more information, contact Glenmac/Harley Power Equipment at 701/252-9300, www.glenmac.com or CIRCLE NO. 206

#### Sod layer attachment

**Melroe Co.** introduces its new Bobcat sod layer attachment, which features auxiliary hydraulic controls that allow finger-tip control to open and close the sod layer arms. Relief values prevent oversqueezing of sod rolls and a brake mechanism automatically stops the roll in place once it is off the ground to safeguard against un- wanted unrolling of sod, according to the company.

For more information, contact Melroe Co. at 701/241-8740, www.bob- cat.com or CIRCLE NO. 207

Microscope

**RF Inter-Science Co.** offers the Macroverse 25, a low-cost portable microscope that can be placed directly on turf, eliminating the need for plugs. Tough-to-identify weeds or insects, foiler lesions of dollar spot or leaf spot and many other turf spoilers are easy to identify, according to the company.

For more information, contact RF Inter-Science Co. at 516/698-4799, www.rfinter-science.com or CIRCLE NO. 204
