**Transport Unit**

**Standard Golf Co.'s new Drag Brush Transport Unit** allows quick movement from green to green during topdressing. Mounted on the tilt box of any utility vehicle, the transport unit lowers the Drag Brush for use when the box is raised to the dump position. When the box is lowered to the down position, the Drag Brush is lifted off the turf and is ready to transport to the next green. The Drag Brush Transport Unit is constructed of solid steel with a powder-coat finish. The unit includes all mounting hardware, chains and assembly instructions and weighs 58 pounds.

**Microbial**

**Green-Releaf by Sybron** introduces TurfVigor, a new offering in the microbial-based product line manufactured by Sybron Biochemicals. TurfVigor features six new microbes specifically selected and screened to encourage turf growth, stress tolerance and general turf health, as well as organic slow-release nutrients for a simple one-step application, according to the company.

The combination of microorganisms, organic nutrients, essential micronutrients, soluble humic material and marine kelp extracts to trigger the synthesis of essential growth factors and regulatory elements was developed to simplify and enhance turf maintenance, according to the company.

TurfVigor is distributed by Milliken Turf Products.

---

**Computer software**

**Point Forestry** introduces a computer software system to help superintendents increase their operating efficiency and boost their marketing impact. The easy-to-use, interactive system can accurately map and inventory every point on a course: greens, tees, bunkers, trees, shrubs, ponds, rough, cart paths and irrigation systems.

The Point Forestry system employs satellite technology from the Global Positioning System and Geographic Information System to create a base map of a course. The system makes it possible to inventory and instantly monitor every element that affects the appeal, playability, upkeep and business of a course.

With the system, landscaping design and alterations are brought to virtual life with accurate, colorful graphics.

---

**Mower conditioners**

**Gehl** introduces two new swing frame mower conditioners designed to deliver high-volume cutting and conditioning with excellent maneuverability, according to the company.

For more information, contact 262-334-9461, www.gehl.com or CIRCLE NO. 210

---

**Creeping bluegrass**

**Peterson’s Creeping-Bluegrass** combines the tenacity of Poa annua with other traits superintendents want in golf course grass, according to the company.

It offers a dark green color, uniform dense turf, winter hardness, shade tolerance and resistance to diseases such as rust, snow mold and dollar spot.
