Hughes Not Thrilled About Gulf Bill
NGCOA LEADER SAYS LAW, WHICH EXCLUDES GOLF COURSES AND CLUBS FROM TAX BENEFITS, IS OUTRAGEOUS

Mike Hughes is not happy that golf facilities have been grouped with booze, bets and backrubs by U.S. lawmakers. Hughes, the CEO of the National Golf Course Owners Association (NGCOA), is even angrier that lawmakers have excluded golf courses and clubs from tax benefits created by the Gulf Opportunity Zone Act of 2005.

In December, lawmakers passed a bill that creates about $8 billion in tax benefits and relief to Gulf Coast businesses affected by recent hurricanes. However, golf courses and clubs are excluded from those benefits. The law states that “provisions do not apply with respect to any private or commercial golf course, country club, massage parlor, hot tub facility, suntan facility or any store the principal business of which is the sale of alcoholic beverages for consumption off premises.”

Hughes said lawmakers do not understand the golf industry and the contributions golf course owners and operators make to local communities. The NGCOA contends the bill was intended to satisfy House conservatives.

“To be singled out like this — as though the owners and operators of golf courses in this region are not part of the mainstream business community and do not make significant contributions to local economies — is outrageous,” he said.

The bill, which President Bush said was introduced to help small businesses, provides access to tax breaks that includes accelerated depreciation, deduction of demolition and clean-up costs, operating loss carryback, and an employee retention tax credit for employees in the disaster zones.

Hughes said golf is a centerpiece for the tourism industry in the Gulf Coast region and is responsible for generating millions of dollars in revenues and thousands of jobs. “A golf course is no different than a restaurant or movie theater when it comes to hurricane relief,” Hughes added.
"I know that Mr. Foley will bring a different perspective that will have a positive impact on the growth and success of the association," said Tommy Sasser, GCBAA president.

Four new grasses in spotlight at Turf Field Day
Five University of Florida researchers highlighted Environmental Turf's "New Grasses Field Day" in Avon Park, Fla., delivering reports on some of the newest grasses available for use in warm-season climates.

Brian Scully spoke of four new grasses developed by the University of Florida that are available through Environmental Turf's network of licensed growers:
- UltimateFlora Zoysia, a medium-textured Zoysia japonica grass.
- PristineFlora Zoysia, a fine-textured Zoysia japonica.
- Aloha Seashore Paspalum.
- Hammock Centipede, Eremochloa ophiuroides (Munro) Hack.

Patent application published, Aquatrols says
A collaborative agreement between Aquatrols Corp. of America and the performance products division of a surfactant development company has resulted in a patent application that was recently published.

The patent application covers the process of improving a rootzone growing environment and enhancing plant productivity through the application of methyl-capped block copolymer surfactants — alone or mixed with other soil targeted materials. The patent also covers the preparation of these surfactants. Aquatrols has exclusive rights to the use of the technology in the markets it serves and has brought it to market to date as Revolution.

"Being in a position to collaborate with experts worldwide increases our opportunities to discover or create innovative solutions for our customers," said Stanley J. Kostka, director of technology and innovation for Aquatrols, who was named as one of the inventors on the patent.

Sean McCormick had a goal. From his days on the crew at The Country Club in Brookline, Mass., to his time at Albuquerque Country Club, where he landed his first job as a superintendent, to his stint as the top man at the highly regarded Valley Club of Montecito in Santa Barbara, Calif., McCormick kept his eyes on the prize.

Ever since seeing the pictures of Prairie Dunes Golf Club shortly after it opened in 1995, the 45-year-old McCormick wanted to be part of a Bill Coore-Ben Crenshaw design. He received his wish nearly a decade after the dream began, returning to his home state of Massachusetts in 2002 to build and grow in their design, Old Sandwich Golf Club, which opened at the end of 2004.

McCormick considers himself fortunate to have been chosen for the project that stands apart from nearly every other course in New England, situated on rolling, sandy soil, carved out from forest and farmland.

It is Coore that insists he and Crenshaw are the fortunate ones.

"We could not have possibly had anybody better," Coore says, emphasizing his respect and admiration for McCormick as a person and a superintendent.

"He's fun to be around and he's so talented at what he does."

Coore, Crenshaw and the rest of their tight-knit organization forged a friendship with McCormick during his seven years at Valley Club. The membership was remodeling the Alister MacKenzie design under the guidance of Tom Doak while Coore and Crenshaw were going through the permitting process for a nearby project that was never built.

"We relied on him from a friendship and a consulting standpoint," Coore says. McCormick's life came full circle when his first superintendent, Bill Spence from The Country Club, called to tell him about the Old Sandwich project. McCormick was Spence's top assistant for four years.

According to McCormick, he was happy where he was, but this was an opportunity he could not miss.

"The only reason I left the Valley Club was for this," he says, sitting in his
