Out with the old, in with the new herbicide

BASF Turf & Ornamentals is no longer selling Drive 75 DF herbicide to the professional turf and ornamentals market. The company says it’s now focusing on selling the postemergent herbicide, Drive XLR8.

Launched in 2008, Drive XLR8 herbicide is a true liquid formulation and, as such, exhibits rainfastness in only 30 minutes. Drive XLR8 also shows improved efficacy over the older Drive 75 DF and is easier to handle and mix, BASF says.

John Deere’s 220 E-Cut Hybrid Walk Greens Mower is now available through John Deere Golf’s extensive distributor network. The mower’s independent floating head provides a precise cut and guarantees less turf stress from clean-up passes, the company states. The ball-joint design and electric drive motor eliminate the need for mechanical linkages to drive the cutting unit, allowing the head to float freely over the surface of the green.

The 220 E-Cut Hybrid also offers a cutting unit that steers easily through clean-up cuts to help to reduce stress around the outside of the green.

Earnings program kicks off

Dow AgroSciences has kicked off its 2009-2010 Power of MORE earning program, which allows users of Dow AgroSciences turf and ornamental herbicides, fungicides and insecticides to earn cash rebates on product purchases made through Aug. 31, 2010.

The more customers purchase, the more they earn in rebates. Customers who purchase enough product to earn at least $500 in base rebates also will receive bonus rebates. There are more than 50 participating products and program information at www.PowerofMORE.com.

Compact utility loader

The Toro Dingo loader can help golf course crews do everything from tilling, digging, grading and trenching to snow removal, backfilling, planting and transporting materials. Toro Dingo compact utility loaders offer the versatility to complete all these tasks in less time using less labor.

Known for their lightweight footprint — as low as 3.4 psi on some models — and compact profile and zero-radius turning ability, Toro Dingo compact utility loaders easily op-

Fungicide receives registration

Quali-Pro said its new Myclobutanil 20 EW fungicide has received registration from the U.S. Environmental Protection Agency (EPA). A systemic fungicide powered by the active ingredient myclobutanil, a demethylation inhibitor (DMI), Myclobutanil 20 EW controls stubborn turf diseases without inhibiting turf growth or root development.

“It’s a versatile fungicide with low use rates for use on greens, tees, fairways and roughs,” says Russ Mitchell, Quali-Pro’s product and marketing director. One applica-

Fungicide added to line

Arysta LifeScience said it has received EPA approval for its newest fungicide and the addition of another product to the DISARM line. DISARM M is an advanced premix formulation of fluoxastrobin and myclobutanil that optimizes ingredient rates to maximize efficient spray application, turfgrass plant coverage and disease-control efficacy. With two modes of systemic, preventive activity, DISARM M protects turf in both the root and leaf, according to the company.

DISARM M provides early and later cool-season turf disease control of anthracnose, dollar spot, brown patch and summer patch on Kentucky bluegrass on fairways and greens. It’s also approved for use in overseed warm-season golf turfgrass with ryegrass.

Rewards program gets overhaul

Bayer Environmental Science says it’s now “easier than ever” to find rewards and redeem points on its enhanced Accolades Web site. Golf course superintendents can track their point balance, review their account history, and browse from more than 4,000 rewards on BayerAccolades.com. “Since Accolades is all about rewarding the turf managers for their loyalty, we wanted to make it as easy as possible for them to take advantage of the improved program,” said Matt Bradley, Bayer’s Accolades program manager. “The user-friendly Web site and extensive variety of rewards to choose from will appeal to all existing and future members.”

After soliciting feedback from customers, Bayer made changes necessary to improve the program. More than 4,000 new rewards have recently been added.

Topdresser aims to be precise

Turfco’s WideSpin 1540 EC Topdresser makes topdressing precise and easy. It gives an accurate, wide range of applications with the least amount of adjustments due to patented WideSpin technology and an electronic controller, which allows users to dial in and set three custom application rates from ultra-light to super-heavy, ensuring a precise spread every time. The topdresser provides a great range of spinner angle, both up and down, for up to 40-foot ultra-light applications or angled down for even better turf penetration. Belt and spinner speeds adjust instantaneously for greater productivity. Turfco also offers a three-year warranty.

DISARM M protects turf in both the root and leaf, according to the company.

erate in confined areas. This includes around
existing landscaping, through tight spaces
like gates, and on delicate grounds such as
greens and bunkers.

Toro offers a variety of Dingo units with
turf-friendly features to accommodate all ter-
rains. Track models include the gas-powered
TX 427, available in wide- or narrow-track de-
sign; the gas-powered TX 413 narrow-track
unit; and the diesel-powered TX 525, avail-
able in both wide- and narrow-track designs.

Silicon-enhanced fertilizer

Excellerator from Excell Minerals provides a
unique blend of micronutrients proven to en-
hance turf health.

Excellerator is an environmentally friendly,
granular product especially designed for golf
courses that provides a unique source of sol-
uble silicon, according to the company. It also
strengthens turf and enhances resiliency. Ideal
for high-traffic areas, Excellerator reduces
heat stress and increases tolerance against
toxic elements, according to the company.

With silicon-enhanced Excellerator, the
higher-mown turf in the rough tends to stand
up instead of roll over under play.

Cover Up

GreenJacket introduces its AFS (Air Flow Sys-
tem) insulation putting green cover, a product
the company says reflects the calls for a
better method of insulating, while allowing for
even better air movement under the Green-
Jacket Turf Cover.

The AFS (Air Flow System) system
is a UV-resistant, non-woven PET staple
fiber, bonded with a blend of non-water-
soluble acrylic resins. The company says its
AFS fabric is designed to its strict specifica-
tions to meet its strict requirements, including
suspending a snow/ice load of 50 pounds
per square foot and allowing air flow to move
freely under such a load.

The GreenJacket AFS allows air to trans-
fer passively under the cover all throughout
the covered surface.

The latest Verti-Drain

Redexim Charterhouse offers the 7621 Verti-
Drain. This latest version expands the range
to 18 different models. The 7621 Verti-Drain
has a working width of 84 inches with a
working depth of up to 16 inches. A hydrau-
lic-tine depth adjustment has been added for
operator convenience. The 7621 is a heavier
built machine than the existing 7521 and has
a faster-working speed for the toughest soil
conditions, the company says.

Every Verti-Drain is equipped with main-
tenance-free, self-lubricated sealed bearings
on all pivot points, three-speed gearbox, and
the patented parallelogram action. This design
gives forced heave to the tines thus producing
the shattering effect and relieving compaction.

INTRODUCING THE WIDESPIN™ 1540 EC TOPDRESSER.

Combining the industry’s best spread with 30% greater spinner angle
and an easy-to-use electronic controller, it delivers unmatched
performance and productivity. Just dial in and set three custom
application rates, from ultra-light to super-heavy, and get the
right application rate—every time you topdress.

See all the innovative features of the new WideSpin 1540 EC.
