X MARKS THE DOLLAR SPOT

GOLFERS DON’T CARE WHAT IT IS, THEY JUST KNOW IT LOOKS BAD.

KEN MOUM // Contributing Editor

TIPS FROM DR. DANNEBERGER

■ Cultural practices to reduce disease severity center on soil/leaf moisture and nitrogen fertility. Prolonged periods of wetness when temperatures are favorable are conducive for disease symptoms.

■ To reduce disease severity try practices that help reduce leaf wetness, including dew removal through a light morning syringe or whipping or dragging the turf. This would be especially helpful on the days fairway mowing is not done.

■ For greens, rolling after mowing has been reported to reduce the incidence of dollar spot.

1. Secure
SYNGENTA
Designed to be the ideal rotation partner with Daconil Action fungicide, the multi-site mode of action in Secure helps deliver season-long protection against the toughest turf diseases. Now, systemic fungicides no longer replace superintendents’ contact applications, but rather compliment for inside-out protection.

The only registered fungicide for turf in FRAC group 29, Secure contains the active ingredient fluazinam. It has no known resistance and as a multi-site contact, it has a low risk of future resistance.

2. Curalan EG
BASF’S Curalan EG offers economical, effective dollar spot control in cool- and warm-season turfgrasses with strong preventative protection and long residual results and significant cost savings compared to many other fungicides.

It controls dollar spot and eight other diseases including brown patch, leaf spot and melting out. It is safe to use on all cool- and warm-season grasses at any stage of growth. It also makes an excellent tank-mix partner with strobilurins.

3. Eagle
One application of DOW AGRO EAGLE will deliver up to 21 days of disease control. So, whether you apply it on a 14-, 21- or 28-day spray schedule, it allows maintenance staffs to make the most of their time by providing long-term disease protection when it’s needed most.

Dow Agro recommends using Eagle in a tank mix or treatment rotation strategy with other broad-spectrum fungicides to provide maximum control of a wide variety of diseases.

4. Fungicide IX
ANDERSON’S combines chloroneb and thiophanate-methyl to prevent and control dollar spot, gray snow mold, pink snow mold, Pythium Blight, brown patch and copper spot.

Suitable for use on all putting green turf and other turfgrasses, including bentgrass, bluegrass, bermudagrass, rye grass, ryegrass and St. Augustinegrass, it provides fast-acting, sustained disease control through root and foliage uptake, resulting in less susceptibility of product to weather and maintenance conditions.

5. Triton 70 WDG
Chipco Triton 70 WDG from BAYER is a water-dispersible granular product containing the active ingredient triticonazole that provides broad-spectrum, systemic, residual disease control of key turf diseases, such as dollar spot, anthracnose and brown patch.

When applied as a preventive treatment the new fungicide product has provided excellent results in research trials conducted at both universities and golf courses, on both residential and commercial turf.

6. Daconil Action
SYNGENTA’S Daconil Action contains the most utilized active ingredient in turf: chlorothalonil. But it adds acibenzolar-s-methyl — a turf protein booster. This has no direct effect against pathogenic fungi and bacteria, instead it triggers the natural defense re-

DOLLAR SPOT IS A WIDESPREAD AND DESTRUCTIVE TURFGRASS DISEASE caused by Sclerotinia homoeocarpa that can be found year-round in the United States. It is known to attack most turfgrass species including annual bluegrass, bentgrasses, fescues, Kentucky bluegrass, perennial ryegrass, bermudagrasses, zoysiagrasses, centipedegrass and St. Augustinegrass. Here are just a few products to help you fight back against it.
**Secure Fungicide**

A product specifically formulated for greens and tees on golf courses.

- The latest addition to the line is a collaboration with The Andersons, Inc., co-marketed, 3336 G with The Andersons patented DG Lite technology. The product is marketed under the Cleary brand and is distributed through The Andersons, Inc. and Cleary Chemicals LLC.

- **Cleary Chemicals LLC**

- **Emerald Fungicide**

- Emerald from BASF can effectively control dollar spot that has developed resistance to other fungicides. When used as directed it provides dollar spot control for up to 28 days in virtually every major turf species, and in every region, of the U.S.

- **Emerald Chemical**

- **3336 CLEARY** offers its 3336 fungicide in a number of versions, including flowable, wettable powder and granular. They also offer a greens grade, sand core granular product.

- **3336 CLEARY Chemical**

- **Triton FLO**

- **Valent’s Tourney**

- Tourney is one of the most active fungicides on the market for effective control of a spectrum of tough diseases, including dollar spot, anthracnose, brown patch, summer patch, take-all patch, fairy ring, necrotic ring spot, gray leaf spot, snow mold and other patch diseases.

- **Valent’s Tourney Chemical**

- **Enclave**

- QUALI-PRO’S Enclave, featuring quad-control technology, controls major turf and ornamental diseases, including dollar spot, brown patch, anthracnose and snow mold. It provides control at the point of contact as well as systemically. Its synergistic formulation prevents and controls disease through multi-site activity.

- **QUALI-PRO’S Enclave Chemical**

- **Dollar Spot Control**

1. Annuity
Annuity (FLRS) Turf-Type Annual Ryegrass offers faster establishment and better transition in spring/summer according to SEED RESEARCH OF OREGON. It has a finer leaf texture and darker green color than other turf-type annual ryegrasses. Can be combined with perennial and transitional ryegrasses for winter overseeding.
sroseed.com

2. Hollywood
Hollywood bermudagrass from JACKLIN SEED, although it has a limited seed availability, its fine leaf texture, dark green color, especially winter color in the southwest, quick spring green-up make it ideal for a wide range of applications.
jacklin.com

3. North Shore SLT
North Shore SLT bermudagrass from ROSE AGRI-SEED will be available this fall and offers excellent drought, heat, salt and wear resistance with a medium-fine leaf texture and medium-dark green color. It greens up early in the spring and offers excellent fall color retention. Best in full sun.
pureseed.com

4. Pure Select
Pure Select creeping bentgrass from TEE-2-GREEN CORP. will be available this fall in limited quantities. Thanks to its dense and aggressive growth habit, it recovers quickly from wear. Has exceptional resistance to brown patch, dollar spot, microdochium patch, fusarium patch, leaf spot and anthracnose.
tee-2-green.com

5. TransFix
TransFix (46-09 IR-SAS) transitional ryegrass from SEED RESEARCH OF OREGON is available this fall. It has a darker green and finer textured variety compared to perennial ryegrass. Its improved germination in low soil temperatures, fast germination and establishment, make it a superior nursery grass or for quick repairs.
sroseed.com

6. Transist 2600
Transist 2600 transitional ryegrass from PICKSEED offers rapid germination and establishment making it a good fast-starting turf cover over dormant bermudagrass. Much darker green and finer texture than other intermediates and annuals. Excellent tolerance to high salt levels.
pickseed.com

7. Artesia & Waterworks
Artesia and Waterworks Kentucky bluegrass from TURF MERCHANTS is available after the 2013 harvest. Qualified a drought tolerant by the Turfgrass Water Conservation Alliance. Compact American type bluegrass with dark color and medium texture.
turfmerchants.com

8. Amazing A+
Amazing A+ (IS-PR 463) perennial ryegrass from AMPAC SEED CO. offers superior overall turf quality, dark green genetic color, salt tolerance, improved spring green-up, dense upright growth, improved disease resistance including exceptional gray leaf spot resistance.
ampacseed.com

9. Green Supreme
AMPAC’S Green Supreme perennial ryegrass offers excellent spring green-up and traffic tolerance with dense upright growth habit. It is salt and drought tolerant.
ampacseed.com

10. Wicked
Wicked perennial ryegrass from PICKSEED will germinate in salt levels as high as 12,000 ppm while offering excellent disease resistance and specific resistance to gray leaf spot. It greens up early in the spring, with good summer persistence and heat resistance.
pickseed.com

11. Blade Runner II
PICKSEED’S Blade Runner II (PSG 85QR) tall fescue has improved spreading via rapid tillering and rhizome production. It will germinate in salt levels up to 14,000 ppm, has broad geographical adaptation and excellent resistance to heat and drought stress.
pickseed.com

12. ATF1258 & ATF1376
PENNINGTON’S ATF1258 and ATF1376 tall fescues are both qualified as drought tolerant by the Turfgrass Water Conservation Alliance. And they offer very good brown patch resistance and very good turf quality with good genetic color.
penningtonseed.com

13. Sea Fire
Available this fall, COLUMBIA SEEDS’ Sea Fire slender creeping red fescue is tolerant of salt, heat and drought with improved mowability.

2. WRF & WGR
The WFR and WGR LELY spreaders are land-wheel driven and utilize the same patented ejector disc technology as all PTO units. A unique wheel gear system lets the tires drive independently for uniform application, even on turns. A hopper capacity of 800 pounds and forward speed of 4.5 mph gives effective spreading. This trailed broadcast spreader can also do an excellent job for spreading sand (topdressing) or salt (snow and ice). For sand/salt, a special ejector disc with short spoons gives a spreading width of up to 18 feet.

turfcare-us.lely.com/en/home

3. WideSpin 1550
With TURFCO’S patented WideSpin technology, the new WideSpin 1550 is easily adjustable for maximum control — belt speed, spinner speed, spinner angle and metering gate. And specially designed twin spinners provide a consistent spread, from superlight to heavy, and everything in between. The new controller allows employees to calculate rates while also giving them a wider range of rates to choose from. A superintendent can lock in their favorite rates using the controller’s four presets.

Turfco.com

4. Pro Series Spyker
The 560-12020 Pro Series Spyker Spreader from SEAGO International has a 120 pound capacity with a stainless steel frame. The enclosed metal gears of the spreader have a lifetime warranty. The spreader has a patented split-shaft design for easy calibration, as well as a positive on/off system with no cables. With an extension hopper, the capacity of the spreader can be increased.
