There were plenty of magical moments at the 95th PGA Championship. From when the tournament began with a thunderclap to when it ended with champion Jason Dufner’s cheeky butt-pat on his wife, this was one heck of a tournament.

“This golf course, Oak Hill, is just a great major championship venue,” Ian Baker-Finch gushed. Keegan Bradley, winner of the 2011 PGA Championship tweeted, “The PGA of America always sets up an amazing course for a major. They deserve more credit than they get.”

This was a 180 from what Tiger Woods was saying a week earlier. He complained during a press conference that the greens lacked grass, and wondered if they could be sped up in time for the PGA. Corcoran responded to Woods’ complaints, telling the Rochester, N.Y. Democrat and Chronicle, “That was our game plan going into advance week, have them slow. ...We will be ready for the Championship.” And ready it was, despite the occasional shower.

By Sunday, Corcoran was relieved the whole thing was almost over. “I feel like a weight has been lifted off my shoulders,” Corcoran said Sunday morning. “I’m going to relax... until I have to start thinking about next week’s clean-up.”

CC of Orlando superintendent Kasey Kauff contributed to this story.

Carmen Magro has joined Stevens Water Monitoring Systems (Stevens Water) as the company’s vice president of business development and agronomy. Magro brings with him 20 years of agronomy expertise and business leadership. “His experience with several technology companies to implement self-designed models for stress prediction, irrigation/analysis control and overall plant health is of great value,” said Stevens President Scott South.

A former superintendent, Magro directed the Golf Course Turfgrass Management Program and Turfgrass Research Facilities at Penn State University and served as the university’s turfgrass media relations expert.

His past experience also includes working as the lead agronomist and director of education at Floratine Products Group and as vice president of agronomy with UgMO Technologies.

Brian Peters, regional superintendent for Traditional Golf Properties in North Carolina, recently established a non-profit charity called “Adventurers for Special Needs” (AFSN).

The charity takes adventure sports (mountain climbing, kayaking, etc.) and turns them into charity benefits for children and adults with special needs. Peters’ son, Cameron, was born prematurely at 24 weeks. The premature birth left him with impairments and developmental delays.

Today Cameron is progressing well. Peters created the charity to give back to organizations like Frankie Lemmon School in Raleigh, N.C., which helped Cameron overcome his challenges. Learn more about the charity at www.adventurers4specialneeds.com.
Chase Rogan, former owner of Pure Turf Consulting and also a former reality TV star on Spike Network’s The Joe Schmo Show (“Joe Schmo is a turfie,” February 2013) was hired last month as the GCSAA’s field staffer for the Mid-Atlantic region.

Rogan’s territory will include Pennsylvania, Maryland, Delaware, Virginia and West Virginia. The GCSAA field staff program is designed to “help chapters utilize GCSAA programs and services to a fuller extent,” according to GCSAA.org.

“I’m excited for the new position, and to work everyday to help advance this profession,” Rogan tells Golfdom. “The GCSAA has a lot to offer its members, and I also hope to help chapters learn about the bounty hunter business. But did his stint chasing crooks and parole violators on TV help prepare him for his gig with GCSAA? “Not really — I don’t see how it could have,” Rogan says. “At best it’s a conversation-starter.”

Rogan holds a bachelor’s degree in turfgrass science and a master’s degree in agronomy, both from Penn State University.

“In my 40 years in the industry, I’ve never seen adoption of a product such as I have with the TDR (300). It’s because the guys at the USGA and the PGA believed in it. Word travels efficiently in this industry.”

//CAREERS ON COURSE

FIRST TEE TOURS TPC SUGARLOAF

Georgia superintendents and John Deere recently teamed together to give youngsters from The First Tee of Atlanta an intimate look into potential careers in the golf industry. Georgia GCSA director Mike Crawford, CGCS at TPC Sugarloaf in Duluth, hosted 24 aspiring golfers between the ages of 12 and 17 on a day-long course and facility tour in July.

The outing was part of a new “Careers on Course” program included in John Deere’s landmark $1-million commitment to the First Tee organization, announced in February.

“Hopefully we helped open some eyes for these kids about future career paths they might follow in golf,” Crawford says. “Some of the kids were very, very engaged and their questions were outstanding. They showed a genuine interest in the industry, not just the game.”

//GROWING BUSINESS

ezLOCATOR EXPANDS

ezLocator is developing its nationwide sales organization with the recruitment of key industry sales professionals. The Northeast Region adds David Clinkhammer, Andy Hyjek and Mitch Pizzetti. The Central Region adds Ted Bilan, Tom Conway and Dave Rutz. The Southern Region adds Jim Burke, Bill Ehman and Wally Geesey. The Mid-Atlantic Region adds Ed Turnage and the Western Region adds Bill Jackson. Pat Sellers will cover PGA Tour events.
//WE’VE GOTTA GO
ST. ANDREWS VOTED NO. 1

The Old Course at St. Andrews has been named the world’s number one course by a unique poll of professional golf course architects from around the globe.

Almost 250 architects voted in the Architects’ Choice Top 100 Golf Courses rankings ballot, carried out by Golf Course Architecture magazine. The Old Course was a comfortable first, followed by Alister MacKenzie’s Cypress Point Club (Pebble Beach, Calif.) and Pine Valley (N.J.) GC in third.

Euan Loudon, chief executive of St. Andrews Links, gave a nice tip of the cap to the maintenance crew. “Achieving the top spot in this poll is fitting testimony to the work of the greenkeeping team at the Links. When you see the caliber of the courses from around the world included in the Architects’ Choice Top 100 you can appreciate that a great deal of hard work goes into delivering the Old Course in top condition for the thousands of people who wish to play it every year.”

OOPS…

In July we stated that perennial ryegrass had a production value of $111,000 this year (“Bye bye, rye.”) We should have said it has a production value of $111 million. We regret the error (and must have been smoking a lot of that rye, huh?)
