Rave as we might about the reliability of Scott's Seed, it is the user's high esteem that fills the order file. Says a Seattle Greens Chairman:

"The turf produced from the seed we purchased from you is as good as any I have ever seen."

End your grass worries—Sow Scott's Seed.

two kitchen ranges, coffee urn and steam tables. It enables our culinary staff to prepare any menu in the same way and with exactly the same results that would be obtained in any metropolitan hostelry.

"We have also extended our use of bottled gas for heating purposes in our club cottages which are adjacent to the clubhouse. Early and late in the season, on rainy days and even on cool summer evenings it becomes desirable to drive off the chill and for that purpose we have installed radiators that are heated with the same gas fuel we used in the kitchen. It is greatly appreciated and removes what might be the one obstacle to an otherwise wholly enjoyable day."

The Protane gas systems which Mr. Heisser had installed at Minocqua do not make their own fuel; instead, the gas is received ready for burning from the oil fields. The fuel itself is made from an oil well vapor. It is refined and compressed to a point where it becomes a low-pressure liquid, stored in steel containers and attached by light tubing to cooking or heating appliances. The pressure within the tank which automatically feeds it into the specially constructed burners is caused by the condensed vapors which have an affinity for returning to their original gaseous form. As tanks of gas are used, they are returned for refilling, thus making the service continuous. The vapors being otherwise a waste product, the gas is capable of being produced at a price comparable with the gas in city mains, and cheaper than coal.

Papa Loves Mama? Answer Builds Club Business
A MILWAUKEE club boosts its dining room patronage by printing this reminder on the menu:

Unexpected Guests
The next time company arrives unexpectedly, don't bother to prepare a hurry-up party meal for them.
Instead, phone the club office, tell us how many plates to set. Then, bundle your guests into the car, drive out to the club—the meal will be ready to serve by the time you arrive!
There is hardly a night that several members do not take advantage of this service. The club accepts orders up to 8 p.m. and will start serving any time not later than nine o'clock.
Radio and "canned music" supply music for informal and popular dinner dances and supply an added attraction for entertainment of the unexpected guests.

DOES YOUR CLUB PUBLISH A MAGAZINE?
GOLFDOM considers itself a clearing-house for new ideas on the managing side of the golf world. It tries to present developments and standard practices for the good of all clubs.
One of the most fertile sources of material of this type is to be found in club magazines or bulletins. Our editorial staff reads every publication of this type available and many of the articles appearing in GOLFDOM are based on practices casually referred to in club papers. What seems usual and customary to the members of one club is frequently entirely novel and worth adopting in the eyes of officials of other clubs.
For this reason, if your club publishes a newspaper, a bulletin, a magazine, or anything of the sort, GOLFDOM will appreciate being put on the mailing list to receive copies regularly. We will find lots of ideas that other club officials will be glad to hear about.
Save and Bind Your Copies

Keep a file of every issue in a binder, and hand them down to your successor in office. Both you and he will benefit from this, and your entire club will profit by it.

For $1.00 we can furnish GOLFDOM readers with a very substantial binder for twelve copies—a full year’s volume—postage prepaid.

The first American book on golf course architecture

THE LINKS
By Robert Hunter

Leading golf architects and players throughout the world pronounce this volume a classic that is bound to have a strong influence in bettering the character of golf course design.

It is illustrated with many illuminating plates showing some of the world’s famous holes—and some of the common and expensive faults in course design.

Look at “The Links” before you leap into design or remodeling of a course.

What makes golf holes good—or bad?

Get the answers, complete and certain, from

GOLF
ARCHITECTURE
IN AMERICA
ITS STRATEGY AND
CONSTRUCTION
By George C. Thomas, Jr.

There are 370 pages and 170 illustrations in this remarkable book which presents, for the first time, a complete and valuable analysis of the factors that make a golf course of lasting charm and a sporting test of good golf.

This volume is pronounced by leading golf architects, and other thoughtful students and authorities, the book that should be read by every one having responsibility for golf course design and maintenance.

You'll find in it many pointers that will save your club hundreds of dollars and give you assurance of sound course architecture.

Golf Architecture in America is the "labor of love" of one of the country's noted golf authorities. He wrote it for the betterment of golf, and for that purpose it should be read by every golfer who is concerned with correct course design.
