being more sanitation; lower upkeep; ball will not stick in washer; no splashing; ball drier when ejected; rustproof and theftproof construction. Priced competitively, the washer is guaranteed for ten years.

CANVAS PRODUCTS OFFERS LATE STYLED BAGS FOR PRO TRADE

Fond du Lac, Wisc.—Seven years intensive experience in the manufacture of both canvas and leather golf bags has convinced officials of the Canvas Products Co., 19 E. McWilliams st., that their 1935 line of golf bags is superior to anything the company has issued heretofore and will meet with the hearty approval and support of the golf pros. With reference to Canvas Products' pro-only line, Arnold F. Firle, sales dept., says:

"In the new 1935 line which is now being announced, the same policy is being carried out as has been from the beginning, to manufacture bags for the professional trade. The quality will be on a plane with the high character of bags demanded by the professional trade, but priced low to enable the pro to compete with the store trade. This company manufacturers specials in keeping with this policy, thus permitting the pro trade to offer bags in competition with store prices."

The company has issued a catalog which not only pictures all items in its bag line, but also shows interesting views of the factory with workmen doing various operations on the bags. A copy will be sent on request.

SILVER KING TRACTOR DETAILS OFFERED COURSE OFFICIALS

Plymouth, Ohio—The Silver King golf course tractor, recently announced by Fate-Root-Heath Co., manufacturers of gasoline and Diesel industrial locomotives and the Peerless mower sharpener, is proving of considerable interest to course maintenance officials. Ruggedly built and with features not found in the average golf course tractor,
STARTING OUT WITH MIGHTY FINE GREENS THIS SPRING BILL J J FINE MR. SCOTT 

ALL MY GREENS ARE HEALTHY AND GROWING FINE MR. SCOTT

THE SECRET IS FUNGOL

END BROWN PATCH AND SOIL VERMIN TROUBLES THIS YEAR. LEARN ABOUT DOUBLE ECONOMY FUNGOL. SEND FOR TESTING SAMPLE

Greenkeepers and Club Managers everywhere are finding it profitable to do some real figuring on the Brown Patch and Soil Vermin question.

A lot of money is spent each year—and a lot can be saved if you adopt the use of FUNGOL on your Greens.

The rapid increase in the general use of FUNGOL is due to its high effectiveness for control of both Large and Small Brown Patch, and the eradication of Earthworms, Cutworms, Sod Webworms, Grubs, etc.

Note this: Each pound of FUNGOL treats from 3,500 to 7,000 square feet of Green. This big covering capacity, with the added soil vermin control, is your saving. It will pay you to investigate.

Send for complete details, application schedules and free testing samples of FUNGOL and VEG-E-TONIC.

the Silver King meets mowing conditions of practically 99% of the golf courses of the country, the makers say. It is small, light weight, flexible, agile, powerful, economical to operate, and low in first cost.

Tractor comes fully equipped with electric starter, horn and electric lights, thus permitting night mowing, etc. Four-speed transmission; speed range 2 1/4 to 25 miles per hour; V-shape radiator; and large automotive-type steering wheel are other selling points.

Full details concerning prices, demonstrations, etc., may be had by writing direct to the company at Plymouth, Ohio.

POTTER HAS NEW GOLF GLOVE AND CLUBHEAD COVERS

Peoria, Ill.—Harley O. Potter Co., makers of the popular Gloottes for golf use, this year is introducing a new all-weather “True Grip” golf glove. The glove has the same tapered finger construction as the Glovette, which prevents the finger ends from stretching out and rolling back. The True Grip glove retails for $1, with a good margin for the pro.

Potter also brings out this year Indicator clubhead covers, made of leather which is not affected by weather or moisture and which are easily put on or taken off the club. Kind of wood encased is indicated by markings on the covers. Retail price of these covers is 55 cents. Pro margin is good.

MOTO-MOWER BRINGS OUT NEW GREENSKEEPER MOWER

Detroit, Mich.—A new power putting green mower, the Greenskeeper, has been put on the market by The Moto-Mower Co., 4600 Woodward ave. Its makers remark:

“This mower is built of aluminum. The side frames, cutter bar and some other minor parts of this mower are made of Bohn non-breakable aluminum castings.

“Clutch and engine can be operated by the throttle or clutch lever mounted on the handle. This is a feature which we have added this year and which is very novel as by hooking the small snap in the ring on the handle bar both the
throttle and the clutch can be operated by raising or lowering the handle. When a man gets to the end of his cut on his putting green, it is the tendency to bear down to turn the mower around. When he does this, he automatically throws out the clutch and closes the throttle on the engine so that the engine does not race at the end of the cut when the clutch is thrown out. In starting he slightly raises the handle which throws in the clutch and gives the engine additional speed, thus avoiding any marking of the greens or pounding of the engine when the mower is being turned around idle.

“This mower is also equipped with a putting green brush.”

FORGAN, ST. ANDREWS, PRESENTS PRINCE WITH DE LUXE CLUBS

St. Andrews, Scotland.—As a wedding present to Prince George and in commemoration of his new title of Earl of St. Andrews, R. Forgan and Son, Ltd., gave His Highness a complete set of their De Luxe clubs made in St. Andrews.

BOB THOMAS NOW ACTIVE HEAD OF CARRIER BUSINESS

Granger, Ind.—Lyman Carrier last fall accepted appointment in the Soil Erosion service, Dept. of Interior, Washington, D. C. Twenty years of service in the Dept. of Agriculture has acquainted him with routine and at present makes his work invaluable. Robert Thomas, formerly supt. of Lyman Carrier Products has taken over active management of all departments of this firm. Thomas states the same sources of Cocoos bent seed and Lecco grass food are being maintained, guaranteeing the same quality material as in the past. Bob was sold out completely in stolons and bent sod last fall, the best season in the past four years. His new crop will be available for spring and fall delivery this year.

U. S. NEW BALLS HAVE EXCLUSIVE RUBBER THREAD INNOVATION

Passaic, N. J.—Perfection of a new process by which rubber thread can be made direct from liquid latex, the natural milk of the rubber tree, for use in winding golf balls to give them greater distance, is announced by the general laboratories of the United States Rubber Co.

The new thread, reflecting both the material from which it is made and the process of making, is known as spun latex. Its use represents a notable innovation since the idea of thread winding was conceived 37 years ago.

This process, it is claimed, produces a thread of many superior qualities. The following claims are made; stronger; more uniform; can be made in unlimited length and in any desired shape; can be wound more tightly; and has longer life. Because

Lime Crest Calcite

(PULVERIZED)

Lime Crest Calcite is a perfect natural carbonate of lime which will do wonders for your grounds and fairways. Will act quickly, because it consists of very finely divided particles in crystalline form. Yet Lime Crest Calcite positively will not injure vegetation and can be applied at any time in any amounts. Influence on the soil is sweetening, so benefits from all applications are permanent.

For lasting, low-cost improvement of golf courses, use Lime Crest Calcite (pulverized).

IF GOLFDOM HELPS YOU—HOW ABOUT YOUR PALS?

We’re willing to bet each issue of GOLFDOM tips you off to some hunch that makes your official duties a little easier or more effective. That’s why this magazine is published—to broadcast the news of the golf business world. It is specifically aimed at the five officials named below in every club in the U. S.

If you get good from these pages, how about your fellow officials? Are they on our mailing list so they too can keep posted through GOLFDOM? Perhaps we haven’t been notified of your organization’s latest elections or appointment. Better do then a favor by tearing out this page and mailing it, filled in, to GOLFDOM, 14 East Jackson Blvd., Chicago.

Please PRINT plainly. Home or business addresses preferred.

weather-protected finish. The iron shafts are Hy-Power with dark walnut sheathing. They have 16-in. rubberized, perforated calf leather grips. The Dunlop Gold Cup Craig Wood personal model woods have True Temper shafts and highly polished heads in contrasting shades of walnut.

Both men's and women's sets are available and sale is restricted to pro-shops. The woods will retail at $10 each and the irons at $8.50 each.

Pro sales have started out on the new lines at a rate highly satisfactory to Craig, Vinnie Richards, head of the Dunlop sports division, and the rest of the staff.

CHICAGO FLEXIBLE BRINGS OUT MODEL G RAIN KING

Chicago, Ill.—A new type sprinkler for tees, greens and club grounds has just been announced by Chicago Flexible Shaft Co. This new sprinkler, say the makers, is to be known as the Model G Rain King and throws any known kind of spray over circles 12 to 120 feet. It is patterned after the company's Model E Big-Job Rain King. Has new patented 2-jet nozzle with spinning vibrator that makes sprinkler stall-proof even on slopes or in high winds. Nozzle also has convenient lever for breaking up spray—coarse or fine—and for regulating distance.

Model G is priced at $3.50, east of the Rockies.

PENFOLD WELDS THIN TOUGH COVER ON NEW BALL

New York City—Penfold Golf Balls, Inc. feature for 1935 the Penfold chemically-welded cover which the inventor, Albert E. Penfold, British golf ball genius, says gives a thin cover the toughness of the ordinary thick golf ball cover as well as preserves liveness of cover and insides because of absence of heat in the cover application process.

Chemical action shrinks the cover into place, compressing the core and welding the cover and core evenly and permanently together, states Penfold. Furthermore, he maintains, the chemical treatment vul-

canizes the cover. The cover on the new Chemo-weld Penfold is only 3/64 in. thick. The ball was successfully tested by considerable actual play in the United States during the latter part of the 1934 season.

BUCKNER SPRINKLER HAS NEW SAND ELIMINATOR

Fresno, Calif.—Sprinkler equipment using raw surface or sandy well water is short lived. This result is overcome by Buckner Mfg. Co.'s sand proof sprinkler line now offered the golf trade in six sizes, ranging from the Sub. Jr. to the Supers. This sprinkler, which the maker says does not wear out, is new to golf but is old to commercial users. Buckner has outstanding thousands of these Rainers which have been used to the extent of 8,000 hours and are still going strong. The feature of this equipment is a patented reservoir containing graphite grease which separates the stream of water from the bearing surface. No dirt can touch the bearing.

Buckner points out that it originated the adjustable flow valves back in 1928 and now has a coupler adjustor which is outside of the valve and outside of the coupler, and does not set up frictional loss. This adjustor quickly adjusts the flow through the valves "from a trickle to a deluge" and stops where it is set.

The company has a new and larger Super sprinkler designed for service of 100 GPM or more, giving a diameter of over 225’. The former Buckner "Super Six" now becomes the Buckner Intermediate and both of these sprinklers are equipped with double, sand-proof bearings. A complete line of hazard-proof safety valves for athletic and polo fields, as well as heavily protected rubber covered pop-ups, rotary type, for use in all "pleasure turf" and a line of lower priced quick coupling valves for protected areas are also offered. They also feature a traveling sprinkler which is claimed to cover greater area than any other sprinkler of this type.

Buckner is featuring this year lower cost fairway construction. Fairway systems having permanent pipe can now be installed for $10,000 to $12,000. The Buckner record to date for a complete job, hoseless tees, greens and fairways for an 18 hole course is $9,500, using cast iron pipe.

GOLF'S GALLERY OF CHAMPS

Exclusive photographs of U. S. professional and amateur champions, handsomely finished and ready for framing so they'll be interesting features of the club lounge, grille room, locker-room or pro shop.

I have the largest collection of photographic portraits of golf's notables, including all but two of the American Open and amateur champions.

All prints are finished in royal sepia.

Business amounted to only $5,000 last year but competent man with agreeable personality can build this business up substantially. Prefer a married man. Living quarters on premises. Address: Ad 9016, % Golfdom, Chicago.

To GREEN-CHAIRMEN, GREEN-KEEPERS AND GUARDIANS OF CLUB TREASURIES.

You can produce perfect turf of deep color, throughout the season with 'Terre' LAWN-SPUR and 'Terre' TOP-DRESSING. LAWN-SPUR is a fertilizer developed after years of scientific plot tests. Its plant food is supplied from 12 sources, each becoming available at different, periods. Thus, continuous feeding is provided, with a minimum of loss from leaching. 'Terre' TOP-DRESSING is a scientific blend of organic matter produced especially for golf greens. It is perfect for spreading dryer, finer weed control than home-made lawn soil. In combination with Lawn-Sour, it has produced amazing results on courses and worth-while savings on club treasuries. For a list of soil specialists to many well-known golf clubs, we invite your inquiry.
