The Root Mfg. Co., Cleveland, Ohio, announces the new Root Estate Spreader which is designed for use on golf courses, parks, gardens and lawns. Outstanding points in construction and operation are accurate feed control, insuring safe application of materials; steady, even flow over full width; locked feed set and instantaneous hand control eliminating possibility of burn at start and finish lines; capable of handling all brands of fertilizers, seed and insecticides as well as dry topdressing for light applications.

Spreader comes in three convenient sizes: Model HD, with spread of 18 in., hopper size of 1,620 cu. in., net weight of 28 lbs., and for sale at $14.50 F.O.B. Cleveland. Second model has spread of 24 in., weight of 36 lbs., hopper size of

A MODERN SWIM POOL
Will Add to the Beauty and Enjoyment of Your Club . . .

The most important consideration in planning a pool is the purity of its water. Graver has solved this problem by designing a complete Swim Pool Unit (adapted to any size pool) for filtering and recirculating the water. The Graver Unit consists of filters, sterilizer, heater, pumps, and all needed accessories. It is compact, easy to operate, economical to install and maintain.

All Graver Equipment is the result of three-quarters of a century of engineering skill and experience.

Send today for recent Research, showing how pools have increased memberships and revenue for country clubs. An interesting book will be included on Design, Construction, and Operation of Modern Pools.

Complying with a need for a light, quiet, easy-running hand mower, the Pennsylvania Lawn Mower Works, Primos, Pa., recently announced a newly developed lawn mower featuring aluminum construction, rubber tires and rubber covered roller, and a patented single-screw adjustment on each end of the lower blade. “Our new Great American Meteor,” says Pennsylvania’s Sales Manager, “was developed in answer to a consistent public demand for a light, quiet mower which would be capable of withstanding the hard use of day-in and day-out work required by those who have large areas of lawn to maintain. The mower, which weighs only 35 pounds, one-third less than the weight of conventional lawn mowers, achieves its extreme lightness through its aluminum construction. Lightness is combined with

ATTRACTION To BIRDS GET RID OF INSECTS

- Joseph H. Dodson, America’s foremost bird authority, says, “It’s good business to attract song birds to your golf course. Why spend money and time for tree and plant sprays when birds destroy injurious insects? Why be annoyed by mosquitoes? One martin consumes 2,000 or more mosquitoes a day; a colony will entirely clear your grounds of these and other flying pests. Other valuable birds are Woodpeckers, Bluebirds, Flickers, Chickadees and tiny Wrens, each with its own special mission.”

There is a Dodson house for every useful, insect-destroying bird. The Martin House shown here has 48 rooms. Other sizes from 28 to 90 rooms. Special construction insures perfect ventilation without draft.

Mr. Dodson specializes in creating bird sanctuaries for country clubs and estates. A few of the prominent clubs with complete Dodson bird sanctuaries: Olympia Fields, Westchester-Biltmore, Calumet, Owensia.

Don’t assume somebody else in your club has sent in this page.
Maybe they haven’t, in which case GOLFDOM is not reaching your newly
elected and appointed officials. And that is a mistake, because GOLFDOM is
edited solely for the five men listed below and they deserve all the help the
magazine will give them in running your club efficiently.

Do them a good turn. Tear out this page, fill it in and mail to GOLFDOM,
