Time — Money — Effort
—SAVE ON ALL THREE!
Reduce your sales effort—but increase your sales. Sounds strange you say? But not if you’re located in the Lytton Building—the golf trade buying headquarters of the world. You’ll then ‘cash in’ on the drawing power of the golf companies, golf publishers, and the golf associations located in this building.

Your Chicago Office Should Be Here!
More pros, by a wide margin, pass through the entrance of the Lytton Building than at any other address. YOU should take advantage of the consequent greater business that ‘being in’ the Lytton Building gives you. Rents are reasonable, suites are conveniently arranged, and there’s not a better maintained building anywhere.

THE LYTON BUILDING
Golf’s Most Famous Address
14 E. Jackson Blvd. Chicago

Shots From The ‘Firing Line’ (Continued from Page 12) have no water holes) by better and more mowing of the roughs.
In the past we have mowed roughs with a 5-unit fairway mower having the height of cut up as high as possible. In all areas such as corners, around trees and in ditches where the 5-units and tractor could not go, we have mowed by hand, using a scythe.

Last year we bought a Worthington tractor with a sickle bar attachment on side. By using this outfit in addition to our 5-unit gang we were able to reduce our scythe mowing by at least 80%—in addition to mowing oftener and better. There are many makes of tractors with a sickle bar attachment on side. I feel that an attachment on the side of tractor is better than a trailing unit, as it gets into corners and ditches where a trailing type of unit can not go.

In addition to the above we have a lost ball problem during the dandelion season on both roughs and fairways when the white seed-heads of dandelions look from a short distance like a golf ball. Several years ago we tried out drags made of wire (woven) fencing with a 12-inch mesh. We made these drags 12 feet by 15 feet, fastening the wire to 3 planks (front, middle and back). When these drags were pulled at a good rate of speed behind either tractor or truck they snapped off the blossoms. Because of the size and speed, by using two of them, we were able to keep the dandelion blossoms snapped off before they turned white. We found it necessary to cover the dandelion areas every day during the blossoming season. While the above is not either a prevention or cure for dandelions, it does prevent lost balls in dandelions.

Besides the better mowing and keeping down of dandelion heads we have trimmed out underbrush in several areas.

While none of the above are new, starting, or revolutionary, they do accomplish what I feel is of primary importance now and for the duration—reduction of lost golf balls.

(Continued on next page)
Our course is located in the Wisconsin dairy region, and as we have pasture land adjoining our fence line on about three-fourths of our course, we are doing one thing which I think will reduce our labor. Cooperating with the adjoining land owners, we are raising our wire fences about one foot above the ground level. The cattle grazing on the other side keep the fence line clear about a foot on our side, enabling us to use power equipment up to the fences, doing away with a lot of expensive hand labor.

We use reel type mowers on all of our roughs, saving time and doing a much better job.

Also we have the greensmen rake traps and other small jobs around the greens. This eliminates the need for a man to travel the same route to do these jobs and does not add much to the time required to mow greens.

We have added 2 mowers to our fairway gang and have reduced mowing time for fairways by about 4 hours, with about the same cost for gas and oil, also saving wear on our tires.

We are trying out a few other things in regard to topdressing and watering, with expectation of saving during the season.

* * *

Orville R. Belknap, of the Country Club of Lincoln, Neb., expects to save labor this year by mowing all tees and banks around the greens with the tractor and a 5-gang fairway mower. Previously, this mowing was done with hand mowing.

* * *

By HAROLD STODOLA
Keller Park, St. Paul, Minn.

We have used more paint this year than any other spring. The pro-shop is spic and span, full of pleasant pictures, and everything makes for a cheerful atmosphere. The clubhouse is bright and clean and the help is unusually congenial. All the golf course equipment is natural green and white. Everything shines around the place.

We hope to get the players used to a drier course. The traps are untouched and we have a local rule that the lie in a trap can be improved with the head of the club. The roughs will be kept cut down with the fairway mowers. You will be able to see the ball but most of the time will have to use an iron to get out.

We are completely motorized and the equipment is in fine condition. We plan to keep it that way and are stressing strongly the care of equipment.

We aim for a clean, dry, streamlined golf course.

The outstanding thing to me at our golf course is the spirit of the employees. Their creed seems to be cheerfulness and health. They want the golfer to get all he can out of the game because maintaining health is our patriotic duty.

* * *

RAY H. GERBER
Glen Oak CC, Glen Ellyn, Ill.

Wartime maintenance economy should start at the barn, because the equipment we now have may have to last us for several years. This can be taken care of by giving it the best of care. Proper lubrication should head the list. If you do not know the proper lubricant to use in your equipment, consult the manufacturer, and he will be glad to furnish you with this information.

Be sure all gaskets and grease retainers are in good condition. They not only keep the grease in, but help keep the dirt out. All repairing and adjusting should be done by an experienced man, as we can not afford to take chances at a time like this.

Most clubs are going to be using power equipment this year, and with a good percentage of the help inexperienced it is going to be a problem.

In the past years I have always mowed the greens with hand mowers; this year I am going to cut them with power mowers. This will not only cut the cost of mowing, but also cost of brushing, as a brush can be attached and both operations can be done at one time.

I also feel that no topdressing will be necessary, as our greens have sufficient good top soil, and frequent brushing will do away with any runners that may occur. This will also help cut our maintenance cost.

The roughs will be cut shorter and more often with a three gang set of mowers. One will be able to cut in closer around traps, tees, and greens, which in the past
have been mowed by hand or a small power mower.

Players could help cut the maintenance cost by seeing that all foot prints are smoothed out of the sand traps, by not dragging their spiked shoes on the greens, and by not marking their balls on the green with anything that will leave a mark; also, by using a tee pin on all tees, not taking practice swings on the tees, and by replacing all divots.

Our fairways will not be cut as short as in the past, for by doing this they will not require as much water to keep them soft and green. Our tee plugging will be cut to a minimum. The divots will be filled with seed and topdressing, except on short holes where we will continue to plug.

The work for the men should be laid out as far in advance as possible, and each man should be given the type work he is most fitted for. Do not have more men on one job than is absolutely necessary. Keep this in mind, and the job will be done for less money.

* * *

JOHN S. McCOY
Ohio State U. GCse, Columbus

We are doing less work on the courses—doing it with less labor and most of it less reliable than formerly. At present we are cutting greens on one course entirely by power; not by choice, but by necessity. The condition of the greens is not as good as on the other course, which is hand cut, and requires more brushing to keep the greens from matting. If we hadn’t been cutting corners previously I don’t know how we could meet present conditions.

Remote Control Tourney Offers $4,500 in Bonds and Stamps

The third Annual Remote Control handicap golf tournament, sponsored by the Indemnity Insurance Company of North America, will offer prizes of $4,500 of War Savings Bonds and Stamps. There will be more awards this year—558 all told—ranging from $100 U. S. War Savings Bonds to smaller denomination U. S. War Savings Stamps.

In addition to players’ prizes, there will be special prizes for pros, to be apportioned according to the number of players entered from their respective clubs or playing on their individual club courses.

This year’s tournament, which is the largest of its kind held anywhere in the world, will be played simultaneously all over the country on Saturday, June 13. Those who cannot play on that date because of bad weather or for some other reason, will be privileged to play on the following day. As usual, there will be no entry fees and men and women golfers everywhere are invited to take part in the tournament as guests of Indemnity agents in their territories. Special guests will include men and women golfers now serving in the Nation’s armed forces.

Last year, 9,983 players took part in Indemnity’s Tournament. They played on 1,042 golf courses in 34 states.

The rules governing this National Handicap tournament are essentially the same each year. Entries will be accepted...
from courses of 4800 yards or more, and contestants playing the larger courses will not have to compete with those playing smaller courses. There will be identical sets of prizes for courses from 4800 to 5800 yards, and for those from 5800 yards up.

The tournament is an “invitation” affair, contestants being invited to participate by agents representing the Indemnity company in all parts of the country.

Chicago District Clubs Vote ‘War’ Rules for Duration

CHICAGO district greenkeepers met April 27 with Chicago District Golf Assn. officials and green-chairmen of CDGA member clubs, and mapped definite plans on what will be considered “standard” greenkeeping practice for this season, and for the period of the war emergency.

What are commonly known as winter rules were recommended for the duration, but no longer will they be termed winter rules. Hereafter, they’ll be “War rules.” Turf on greens and fairways will be allowed to grow a little longer, too. Greens will have a height of cut approximately 1/4 in., rather than the usual 3/16 in. Fairways will be clipped at 1 1/4 in., instead of 7/16 in. to 3/8 in. Rough, however, will be cut down considerably. New height will be 2 1/2 in. instead of the usual 4 to 9 inches.

Another thing, greens will be cut but three times a week (Tuesday, Thursday, Saturday) instead of an average of 5 times, as in the past. Traps will be raked only once a week, and in the meantime, members and caddies will be expected to do their part in smoothing footprints, etc. Grass on tees will no longer be cut at practically green height, but will be the same cut as the fairway.

Budgets will not be reduced materially for the present but the greenkeepers have made their plans to adjust maintenance procedure to conditions, as they develop. In other words, a fluctuating budget seems to be the setup at present, inasmuch as play to date and club membership rolls, have been equal to, or the average, and in several cases, above a year ago.

Greenkeepers named to the CDGA greens advisory committee by W. D. Mahoney, green-chairman at Beverly CC, were the following: Red Sellers, North Shore; Ray Dinelli, Northmoor; Johnny Boettger, Olympia Fields; Mel Johnson, Butterfield; Ed Dearie, Oak Park; Graham Gardiner, Park Ridge; Norman Johnson, Medinah; Bill Stupple, secy., Mid-west Greenkeepers Assn.; John Darrah, Beverly; and A. L. Brandon, secy-treas., Greenkeeping Supts. Assn., St. Charles.

A MAILING CARD that’s clicking with the American flag in colors at the top is being used by the Woodmar CC, Hammond, Ind., to promote the sale of war stamps at the club.

The card reads:

PAY YOUR GOLF WAGERS with WAR STAMPS for sale at BAR, OFFICE AND PRO SHOP

The card is displayed throughout the clubhouse and has spurred war stamp sales. Some extra copies of this card, which is on heavy stock, 12 in. by 10 in. in size, are at the Woodmar club and will be sold to other clubs at nominal cost.
If products you want are not advertised in GOLFDOM, draw lines through products listed here on which you want literature and prices. Mail page to GOLFDOM. We'll ask leading manufacturers to send you data at once. Be sure to fill in lower half of page, so GOLFDOM will reach the men at your course for whom it is edited.

</table>
"Turn in your old golf balls today and your members will be out there playing tomorrow". That's the idea of Spalding's new Golf Ball Salvage Plan. Spalding announced the plan to its pro customers with the material illustrated. This includes an instruction sheet giving details and posters for locker-room and clubhouse urging members to "Bring your old golf balls to the pro shop... Ask about the plan to keep you out there swinging all summer. . . Act now if you want golf balls later!"

The rebuilt golf ball qualified in its first official tournament, the Masters.

Propelled around 18 holes by Gene Sarazen in his second round at Augusta, one of the rebuilt types which are to replace new balls, showed plenty of "run." It was good enough for Sarazen's 33-40-75 of the day.

Just prior to the round Sarazen and Sam Snead gave the works to a supply of rebuilt balls furnished by L. B. Icely, president of Wilson. They used both woods and irons, and demonstrated to their satisfaction that the rebuilt balls used sailed as far as the 1942 new ball, and against the wind actually acted better. And, that if a player were allowed to hit several dozen balls of each type off the tee, the "longest" ball of each kind would probably be equal.

Other pros who watched the performance asserted that the average golfer would see no difference between rebuilt and his present new balls.

Icely commented: "Although laboratory tests indicate the rebuilt ball to be less efficient, the tests of Snead and Sarazen revealed no difference. Why this is we don't know. However, we're delighted that the ball is apparently just as satisfactory as the old ball."

Icely emphasized that no golf ball is accepted for rebuilding unless it is in fairly good condition and gives promise of plenty of future life. All balls are assorted according to original price ranges, so that when rebuilt they retail in classifications corresponding to former prices.

Worthington Ball Co., Elyria, Ohio, has advised that it is now engaged in the re-processing of used balls.

In an effort to help keep the game alive for the duration, Dunlop is also recovering old golf balls. Dunlop's recovered liquid center golf balls will be called "Deluxe" and their recovered regular center balls called "Special".

The "Deluxe" balls will be multi-dotted (four colors) and will have "Deluxe" on one pole and "Recovered" on the other pole—nothing on the swiv line. The "Special" balls will have the name streaked in four colors and will have "Special" on one pole and "Recovered" on the other pole—nothing on the swiv line. The only place the name "Dunlop" will appear is on the cover of the box.

In "re-processing" used golf balls, according to the method announced by U. S. Rubber Co., the old covers will be removed and new covers will be moulded on the core. The new covers will be identical to the covers on new balls. Here the little white biscuits of Tjipetir, a special form of Balata, are placed on a cold press to be formed into shells. The shells will then be assembled on the winding and moulded in a hot press complete with dimples.
which will show the name of the ball and under it—"Recovered by Dunlop".

Dunlop will extend to every pro selling them a number of golf balls to be recovered, the privilege of buying from them an equal number of recovered balls, less approximately 5% for shrinkage (shrinkage due to balls received in such condition that they could not be recovered).

American Golfboard Co., Prospect Park, Pa., sole makers of Golfboard, has announced a new, improved model of its fascinating dart golf game is now available, and will retail for $2.00. The new model, which is called the Denny Shute Club Model, is attractive in appearance, and the playing rules are simplified and easy to grasp. The board is the same generous size as the former model, measuring 23 in. by 28 in. by 7/8 in. The par-70 course is still plenty tough to beat but players will have a swell time trying.

Golfboard makes a striking display in any Pro Shop. Weight has been reduced to 4 1/2 lbs. complete, with 3 darts, scorecards and playing instructions in durable container, making it inexpensive to ship. The makers believe that most any pro can profitably sell several dozen, especially in view of the shortage of games and golfing equipment in general. Write for descriptive folders and prices now.

New address of Penfold Golf Balls, Inc., is 3333 35th St., Brooklyn, New York. Penfold moved from its 11 Park Place address April 24 to double up its offices with the plant . . . for the duration. Phone number is South 5-2383.

Jackman Sportswear Co., 14 E. Jackson Blvd., Chicago, held "open house" April 20, in officially announcing to the trade the fact that Ren Smith, formerly a partner in the business, had taken over as sole owner of the company. Ren and Tom Force were host to a large assemblage of the "bors", pros, dealers, newsmen, etc., who wished them bon-voyage in their new setup.

Tom was bar-man for the affair, and kept all happy and in good spirits. Ren knows the business from every angle, and knows the pro's business, too. He's had plenty of pro experience himself (most recently at the Oak Park Co.), and Horton's his brother, you know.

READ UP ON YOUR JOB!

**COUNTRY CLUB CARTOONS**
Set of ten prints depicting the humorous side of various club areas—locker-rooms, grill, pro-shop, first tee, etc. Each print 11 x 14 inches; ideal for framing. Use these cartoons to brighten clubhouse wall areas. $1.00

**THE RULES OF GOLF AT A GLANCE**
This famous set of charts now hangs in 2,000 pro-shops, locker-rooms and clubhouses. Eight charts to set, classifying the Rules into the zones of the course to which each rule applies—tees, hazards, traps, greens, etc. COMPLETELY ILLUSTRATED, to make understanding crystal clear. Charts are 7x10 inches, plus wide margins for framing and printed on heavy paper. Available framed under glass in two matching 19x24 inch frames, four charts to frame.
Complete set FRAMED $5.00 per set plus express charges
Complete set UNFRAMED $1.00 per set postpaid

**GOLF COURSE COMMONSENSE** $2.00
The only book ever published on all phases of greenkeeping; a complete manual in simple usable form; each chapter rich in working instructions. Originally published at $4.00.

**GROUP GOLF INSTRUCTION** $1.00
This handbook gives guidance to instructors of group golf classes, especially in schools. Tells how to organize golf classes, what equipment is needed, then outlines important points to emphasize when teaching each club's use. Rules and etiquette covered. Paper bound.

**CLUB ECONOMIES** $2.00
How to set up a club budget and operate within it; how to organize departments and control profits; how to manage employees. Clubs can save hundreds of dollars by following suggestions in this book. Written mainly for large clubs, but smaller organizations will find much information of value. Formerly $3.00.

**GOLF: ITS RULES AND DECISIONS** $3.00
Every pro, every tournament chairman, every player who is called on for rules decisions, needs this remarkably clear and complete 400-page treatise on the Rules. Each rule in turn is explained and interpreted, including all pertinent decisions. Enthusiastically recommended by USGA Rules of Golf Committee.

**QUANTITY FOOD SERVICE RECIPES** $4.00
For variety in your menus, use this great book. Contains 1,100 outstanding recipes, worked out to yield servings of 10, 20, 50 and up, selected from the favorite recipes of leading club, hotel and restaurant chefs. 442 pages; sturdily bound. This book is a MUST for every club kitchen.

**BETTER LAWNS** $2.00
By Howard B. Sprague. Gives essential facts that are needed for maintaining turf areas. Covers soil preparation, planting, grass characteristics, management practices, and weed and insect control. Many illustrations.

**AN EASY WAY TO ORDER**
Check the items wanted, write your name and address on the lines below, then tear out entire page and enclose in envelope. Please remit with order; no C.O.D.'s, but your money back if you're not satisfied.
No Canadian orders accepted.
