water is obtained rather than a cone-shaped spray. Water poured slowly from a watering can, from which the sprinkler has been removed, may also be used. An alternate method is to add one ounce of Chlordane to each gallon of water in a small sprayer and, with the spreader removed from the nozzle, direct the stream of spray mixture into each ant nest.

In the case of a more widespread infestation, the best treatment consists of a thorough watering of the turf area with a solution of Chlordanie. The material can be applied with a hose and garden nozzle, the latter open as wide as possible at 100 pounds pressure. The proper proportions are 4 ounces of Chlordane 50 per cent wettable powder per 75-100 gallons of water for each 1,000 square feet of turf. This treatment should be followed by watering the turf with 50 to 60 gallons of clean water per each 1,000 square feet.

CHLORDANE is manufactured by Julius Hyman & Company, Denver, Colorado under the trade name OCTA-KLOR. Chlordane formulations are available at U. S. Rubber (Naugatuck Chemical Division) and The Dow Chemical Co.

PORTABLE ELECTRIC PLANT — A new AH series of portable electric plants especially designed to simplify the task of greenskeepers has been developed by D. W. Onan and Sons Inc., of Minneapolis, Minnesota.

These new electric plants provide power for any electric gardening tool, universal, a.c., or d.c., within their full rated capacity and will operate under heavy load conditions for more than four hours on a single gallon of gasoline.

Modern maintenance equipment such as close-cropping electric grass-shears used for trimming hard-to-get-at weeds and tall grass around fences, bushes, trees, can be used in any place on golf courses. Mounted on easy-wheeling dollies the model can be moved directly to the job easily by one man.

Besides turf maintenance, repair work on any part of the grounds can be completed quickly and surely with high-speed electric drills, fast-cutting electric saws and powerful electric hammers driven by the portable AH.

The AH Models are powered by a single-cylinder, 4-cycle, air-cooled engine available in A.C., 500 or 750 watts, and D.C., 750 or 1200 watts.

SWINGING AROUND GOLF
(Continued from page 29)

afternoon... Nobody can be less than his best in playing against the class of golf Skee Riegel shot at Pebble Beach... Riegel was the best player on the course the week of the National Amateur and deserved to win.

Ralph Trost in Brooklyn Eagle says "Jug" McSpaden was right in blasting pro tournament golf... Trost maintains home club pros have lost prestige as result of emphasis on continuous performance of tourney pros... He says PGA tournament committee insistence on easier rules and soft courses to promote low scores has boomeranged on playing pros.

Francis J. Powers, Chicago Daily News veteran sports writer, says amateur rule which bars John Barnum from USGA and Western amateur tournaments because he is salesman for a golf manufacturer is antiquated... Powers points out that Frank Stranahan and Skee Riegel and others of unquestioned formal amateur status play more golf with pros than Barnum gets in his sales promotion work... Mrs. Floyd Hendley in Greensboro (N.C.) Daily News says the majority of women golfers now play as fast as men... Therefore, continues Mme. Hendley, private club rules restricting women's play are due for revision.

GWA (Golf Writers Assn. of America) pays just tribute to a great writer by unanimously voting to name their "Golfer of the Year" trophy, "The Bill Richardson Memorial Trophy." This follows suggestion of president Russ Newland instead of staging a tournament to perpetuate memory of Wm. D. Richardson, golf writer for N.Y. Times from 1921 until he passed away in Aug... Members will vote on winner of trophy at year's end.

CLASSIFIED ADS

FOR SALE
