Evidently tough, but enjoyable, for after the close of the golf season Bill goes down to the Pittsburgh Athletic Assn. and teaches classes through the winter. He's been doing this for 22 years, so the soup must be good. ... Golf is so much a part of Atlanta, they say it in flowers down Georgia way. ... RAKES — VACUUMS

FERTILIZES

ALL IN ONE OPERATION

Solve your leaf raking and leaf disposal problems with one machine. The Power-Vac Rakeland vacuums the leaves into a hammermill where they are ground into a fine leaf powder. The tiny leaf particles are blown back onto the ground where they form a natural fertilizer for the soil and cushion of protection for the tender grass roots.

EASY TO ATTACH

EASY TO DISENGAGE

The new trailer mounted unit is so easy to disengage, that you may keep your tractor available for other duties even during raking season. The auto wheel carrier, of course, adds much to the easy mobility of the new model.
Fairway-Green AERIFIER

Here is a practical implement to improve turf on the entire golf course. The 3 unit gang cultivates a path 9 feet wide. May be pulled at speeds from 7-12 mph on fairways.

The hollow spoons remove soil plugs, relieving compaction and providing enough soil for top-dressing. The steel strips between the discs prevent lifting of shallow rooted turf. Cultivation depth is adjustable from 1-5 inches.

Shipment made within a week of receiving your order.
