The Returns Are In!

During the 1947 winter tournament season on the P. G. A. circuit—

More than half of the tournaments were won by players using the new Acushnet Titleist.

More players played the new Acushnet Titleist than all other balls combined.

Your low-handicap members will learn why when they play this ball. Recommend it.

Many golfers and sportswriters declare Babe Didrikson the “biggest name” in golf today. Her British women’s title as her 16th consecutive victory gives her a record in women’s golf far beyond anything ever done in men’s golf. Joe Horgan, the patriarch of the caddies, says The Babe is better than Joyce Wethered or Glenna Collett. That should make it official. Columbus (O.) open tournament officials hope to be able to get her in their field. Women’s intercollegiate at University of Ohio course wants her for exhibition. Chances for cashing in are becoming so numerous we wonder how long The Babe will remain an amateur even with husband George Zaliarias’ wrestling shows taking noble care of the groceryman, etc. With The Babe in it the British women’s championship outdrew the British amateur.

With everything running O.K. on Fairway ranch Byron Nelson is taking a few weeks off to play exhibitions. He looks 10 years younger than he did after finishing as the loser to Oliver in a semi-final of the 1946 PGA. Wonder when pros are going to quit saying an amateur never again will win the National Open? Those who make that forecast don’t realize that many a pro is trying to teach an amateur so the kid will win the Open some day and be a credit to the instruction genius of his teacher.

The O. B. Keelers, the famed Atlanta golf journalism team, came by their golf naturally. O. B. began back at Lake Geneva, Wis., shortly after the Indians vacated and Ma’s folks who first came to this country were Donald and Eleanor McIntosh of Inverness, Scotland, who arrived in North Carolina about 1800. Topeka, Kan., thinking about building a muny course. Jimmy Love of Peoria has won Illinois 1947 high school golf championship and Illinois Jr. Chamber of Commerce championship. Vin OBey, Wachusett CC, Worcester, Mass., pro is a good man with the sticks. Wish we knew of some other hot golfer named Honor so we could have Love, Honor and OBey as a tournament pairing.

Women’s Western tournament at Capital City CC, Atlanta, had all the observing males impressed by the gals’ efficiency and thoroughness in tournament management. Ed Danforth gave them a great hand in his Atlanta Journal column. Ed quoted Howard (Pop) Beckett, Capital City pro, in highest commendation of the WGA tournament management. “It is earnestly recommended that the men folks from all the clubs in Atlanta drop out this week and see how a big tournament should be run. The ladies have taken all our ideas and streamlined them,” Ed concluded.

Fred Ebetino of Patterson Field course at Dayton, O., is in his 21st year as a pro at Dayton. H. I. Phillips delivered a blast in his syndicated column against easing up on rules of golf in tournament circuit play!
KILL WEEDS
with
BEAN GOLF SPRayers

Weed-treating fairways and roughs of a nine-hole golf course in less than ten hours is easy for this powerful John Bean Golf Sprayer, shown operating on a Michigan course. Bean sprayers are field-tested, built for the job—with efficient agitators for mixing materials, quick-acting regulators that hold the pressure where you want it, and powerful pumps that get the spray onto the turf evenly, quickly, thoroughly.

KILL WEEDS NEAR FLOWER BEDS

Attach the new Bean Lawn Protector to the sprayer and you can safely spray near flowers and at the edges of greens with 2,4-D and other chemicals (write for special booklet). With a Bean Spraymaster Gun, the outfit sprays flowers, shrubs and trees with fertilizers, fungicides, insecticides. Efficient for firefighting, spray painting, whitewashing.

For More Effective Weed Control with 2,4-D

WRITE FOR FREE BROCHURE
Informative—factual. Photographs of many famous golf clubs that use Weed-No-More. Write Dept. A-7, 12th Floor Midland Bldg., Cleveland, Ohio.

WEED-NO-MORE 40

AMERICA'S NO. 1 WEED KILLER

IT’S EFFECTIVE! The ester formulation of 2,4-D is recognized by authorities as being more effective over a wider range of weeds and conditions than other types of 2,4-D. Weed-No-More is the original butyl ester formulation of this selective weed killer.

IT’S ECONOMICAL! One gallon of Weed-No-More 40 concentrate makes 400 gallons of spray, enough to treat two acres. The Weed-No-More’s butyl ester formula—plus a special emulsifying agent—makes for better adherence to broadleaved weeds and faster absorption by the weed plant, thus assuring quicker killing action.

IT’S AVAILABLE NOW! Many of America’s best-known golf courses, parks, cemeteries, and schools now use Weed-No-More 40 regularly for beautiful weed-free turf. Safe to use—easy to use—assures savings of hundreds of dollars (on many golf courses, thousands of dollars) compared with previously used methods of weed control. Available in 1-gallon and 5-gallon cans, 55-gallon drums.

For full information, phone your local dealer, or write any of the companies listed below.

Can’t Get Spray Equipment?
To help you until you can obtain delivery of spray equipment, Sherwin-Williams Research has developed a 50-gallon sprayer that can be easily built in your shop for under $40. For free plans and specifications, write Dept. A-7, 12th Floor Midland Bldg., Cleveland, Ohio.

TAT SOILICIDE

CONTAINING PMAS

An Organo Mercurial Complex (Patent Pending)

• FUNGICIDE

• OUTSTANDING

CRABGRASS CONTROL

Dr. J. A. De France of the Rhode Island State College reported in the January-February, 1947 issue of The Greenkeepers' Reporter as follows:

"On 480 individual plots of creeping, velvet and colonial bent that were under a series of tests for disease control with various chemicals, not one crabgrass plant developed on any of the five plots* in the creeping bent series treated with PMAS, a water soluble phenyl mercury acetate formulation; and only a few unhealthy crabgrass plants were found on five plots in the Rhode Island bent series where this formulation was applied. Applications of the toxicants in water were made at the rate of 10 gallons per 1000 square feet approximately every 10 days from June to September."

*P.S. Up to June 30, 1947, no crabgrass appeared in these plots. Plots not treated with Organo Mercurial Complexes showed considerable crabgrass germination.

We recommend the application of TAT Soilicide as a fungicide at the rate of 1 pint to 100 gallons of water. When crabgrass is prevalent use 1 pint to 50-75 gallons at 5 to 7 day intervals.

BALL BEARING!

Remember when you were a kid? Ball Bearing meant the Best in "bikes" and roller skates . . . . . .
That's the way it is with Sprinklers, too!

The New "Greenkeeper"

DOUBLE ROTARY SPRINKLER

Greater Distance — Better Coverage
Positive Action — Longer Life

A new Double Rotary with ball bearing action—easy-running, long-wearing, distance covering. It's the Double Rotary principle of a moving line of water (like raindrops) that allows all the water to soak in. No waste.

Positive action, not affected by the wind. All the old, good qualities, but with a new ball bearing action to run easily on any pressure, to reduce friction and so to lengthen the life of the gears. Covers up to an 80-foot circle, depending upon the pressure. Coverage reduced, without loss of efficiency, by a turn of the faucet. A great sprinkler — — — $13.50

Your protection: Every Double Rotary carries a full year's guarantee. Try out this new one.
