A Sensational Success!

Pros and Players Acclaim the New

U.S. Royal
GOLF BALL

In every winter golf center—South or West—the new U.S. Royal is making golf history. Top flight pros and amateurs are amazed at Royal's balance and controllability. They like its right feel and click. And for slamming out distance drives, they find it's the truest, longest ROYAL they've ever hit!

Scientists of U.S. Rubber Company and General Electric Company developed this golf sensation—SILICONE “MAGIC” CENTER—liveliest substance ever used in a golf ball. U.S. Royal's great performance was improved still further by ELECTRONIC WINDING—which controls tension and provides more uniformity than ever before.

Deliveries of this wonder ball are now being made. Ask your “U.S.” representative.

THE NEW

U.S. Royal
GOLF BALL

Sold Only Through Professional Golf Shops

BLUE for championship and tournament play. RED for greater durability—and distance too.

Every U.S. Royal has that tough, durable, Cadwell-Geer cover.
