Wilson announces a new one piece center to the golf ball line. The new design consists of a liquid center and a one piece thinner wall accounting for more uniform compression. In addition the 1949 balls are to have electronic winding for uniform high tension, fine cover stock and a new large size pole marking making them easily identifiable.

A complete new line of golf bags is being introduced for 1949. The same quality materials and construction of previous Wilson lines will be used in the new Country Club golf bag line but more improvements in styling will be included.

Golf sundries introduced at the sales meeting include a line of interlock knit shirts, a new type of plastic head cover, a new umbrella and a higher quality line of golf shoes. The three styles of shirts presented include a knit spun nylon shirt in the polo type with both long and short sleeves; an innovation in the golf field. It has the feel of a fine piece of cashmere but is heavy enough to be comfortable in cooler weather and is washable and color fast.

**Club Managers' Day**

Club Managers' Day held in conjunction with the National Hotel Exposition in N.Y. will be on Monday, Nov. 8, 1948. The Social will be at 7:00 P.M. in the Hotel Pennsylvania. Invitations may be obtained from J. P. Tonetti, Publicity Chmn. of the CMAA.

**LIQUA-VITA**

The Complete Liquid Fertilizer

Will help get the seedlings off to a good start. Immediately available, it gives that added boost which makes for thick, rich turf. Southern greenkeepers are enthusiastic over the wonderful results obtained with winter rye. It shortens that "in-between period".

Now used by over 400 golf courses — A TRIAL WILL CONVINCE YOU.

AMERICAN LIQUID FERTILIZER CO., Inc.  Box #267, Marietta, O.
**Whirlwind Mist Blower**

One of the latest weapons in man’s fight against shade tree insects, is a wheelbarrow model mist blower for applying concentrates to small areas now being manufactured by the Fitzhenry-

Guptill Co., Cambridge, Mass. All controls are built into the handles so that the operator can control the direction of the spray as he moves along. An attachment provides for spraying 2, 4-D or other low gallonage sprays directly onto the affected area. This concentrate applicator is completely engineered and manufactured specifically for this method of spraying. Mechanical features include a specially designed three stage, motor driven blower and a new type of nozzle to provide thorough mixing of fluid and air.

Pro Golf Enlarges Sales Staff

C. L. Hornung, pres., Pro Golf Sales, Fond Du Lac, Wis., announces the addition of two new men to his sales staff; W. B. Wright, 712 Lipscomb St., Ft. Worth, Tex., who covers the South West, and Chuck Lewis and associates, 514 Parley Bldg., Birmingham, Ala., who cover the entire seven Southeastern states. Dutch Schmidt, Wauwatoosa, Wis., another sales representative, covers the Central and Eastern states of Ind., Mich., Ohio, and Pa. Mr. Hornung has recently returned from an extended trip throughout the states of Iowa, Minn., Nebr., Wis., and Northern Mich. where his Pro Golf Sales Co. trailer has created considerable interest among the pros. The company has taken on a new line featuring wool plaid shirts and jackets with zipper front and reversibles for both men and women.

W. B. WRIGHT

Golf Swing Post Demonstrated

A. C. Plummer, 31 Steuben St., Albany, N.Y., demonstrates advantages of golf swing post he developed which has been installed at the Albany Municipal course for the use of beginners and students under the tutelage of professional Jerry Dwyer. According to Dwyer the device has been a great help to his beginners.
**New From Hollywood**

Vic Erwin, Westwood Knitting Mills, says these are leading apparel items in helping to establish pro shops as first with sports styles. Vic notes that pros at swankier clubs are selling a lot of wool jersey polo shirts (long and short sleeves) for men and women. Wool sweater jacket, with 4-button front and patch pockets, selling at southern California pro shops and leading men’s stores faster than Westwood can make them.

**Fog Machine, New Equipment Aid For Control of Insects**

A fog machine has been added to the pool of course equipment machinery of the Albany CC, (N. Y.) to combat that perennial golf course pest—the Japanese Beetle. At the same time, the club’s grounds and buildings will be fogged weekly to rid the environs of mosquitoes, flies, gnats, and sundry other pests which have belabored the guests for many years.

Willie Ogg, Pro-gkpr., Albany CC (N. Y.) watches the new Todd fog machine acquired by the club to combat Japanese Beetles and other winged pests which succumb to applications of DDT.

The work is supervised by “Willie” Ogg, pro-greenkeeper, who is well-known to the golfing fraternity, and whose activities among other things, involve keeping the guests happy and contented outdoors so they can concentrate on swinging at the golf ball instead of bugs.

The machine used for the purpose is a

Fogging for Golf Courses

For Japanese beetle control, the fog machine serves double duty. To attack
the pernicious beetles on-the-wing, a mix
of DDT in fog oil is wafted over the
landscape. For the even more voracious
grubs in the ground which play havoc
with the greens, chlordane is added and
the fog is driven downward toward the
soil.

At the Albany Country club, the porch
of the lodge house is given regular cover-
age so the guests can dine al fresco in
comfort; the tennis courts, bathing beach
and even the caddies’ playground are
similarly blanketed. The greens get a
thorough blanket every week, thus elim-
inating at least one hazard—mosquitoes—
from the playing.

Cost of the fog machine may not be
within the range of the smaller clubs
when it is used for club and course use
only but Ogg points out that the price is
not out of line when one takes into con-
sideration the many uses for which it can
be used. The fact that much revenue can
be derived by fogging member’s lawns,
shrubbery and gardens or community
park and playground areas makes it a
good investment.

Jacobsen Acquires "Standard" Rotary Power Mowers

The Jacobsen Manufacturing Co., Racine, Wis., has announced purchase of the goodwill, manufacturing and sales rights of the Standard rotary mower from the Standard Mfg. and Sales Co., Lebanon, Ind. The Standard line of rotary power mowers, leaf pulverizer and other units will be manufactured by the Worthington Mower Co., subsidiary of Jacobsen, in Stroudsburg, Pa.

Standard rotary power mowers were among the first to be built of this widely used type. Built in a wide range of cutting widths, the Standard rotary mower has a series of horizontal discs, with cutting blades on each disc which rotate at high speed and cut the grass on the principle of a circular saw. Standard's special safety bolt and nut holds blades to discs preventing them from coming loose, but permitting them to turn back under the disc when an obstruction is encountered. This type of mower is used most effectively in clearing high stands of grass.

The Standard Leaf Pulverizer, an outstanding device for collecting and disposing of fallen leaves, brushes the leaves up, chops them into fine mulch, and spreads it evenly through the grass. The mulch will disintegrate within a few weeks, returning to the soil as fertilizer. The Pulverizer, quickly attached to Standard rotary power mowers, sweeps a 37 in. swath. A 6 h.p. motor furnishes ample power for the machine with sulky drive if desired.

Jacobsen Presents Mower to Danish King

Pictured above, ready for shipping, is a Jacobsen "Park 30" power mower, now aboard the SS Signeberg en route to Denmark. It is a gift to King Frederik of Denmark from O. T. Jacobsen, president of the Jacobsen Mfg. Co., Racine, Wis. Mr. Jacobsen, who is also chairman of the Racine Friendship Fleet committee, is on a Scandinavian trip at present with a goodwill committee of Wis. businessmen. He is pictured on the right.

ATTENTION
GOLF PRO SALESMEN

Manufacturers of high quality nationally advertised lines of pro-only golf clubs and golf bags have several large volume territories open for live-wire salesmen selling the golf professional trade.
