organize and conduct extensive research of available material, write the greater part of the book, edit it after consultation on drafts of manuscript with the editorial board, and successfully complete the trying task of getting the job into print. General outline of the book was to make it a working manual that would be of value to the experienced superintendent as well as be of such plain, practical usefulness to enable the man with limited experience and in charge of a small course to improve the course's maintenance standard. Applying this broad scope is the job that Musser has accomplished with high satisfaction. His long and successful experience in turf research and in heading the Penn State greenkeeping courses is reflected in the intensely practical character of "Turf Management."

Chapter headings plainly show the full coverage of the contents. Chapters are: Broad Relationship in the Production of Special-purpose Turf; Soil and Turf Relationships; Fertilizers and Lime in Turf Production; Drainage and Irrigation; Special-purpose Turf Grasses; Turf Propagation; Turf Maintenance; Weed Control; Turf Diseases and Related Damage; Control of Insects and Other Pests; Elements of Golf Course Design; Golf Course Operation.

The chapter on Golf Course Design was written by Robert Bruce Harris and Robert Trent Jones after consultation with their colleagues in the American Society of Golf Course Architects, and presents concise and illuminating fundamentals of course design. The chapter on Golf Course Operation was written by Farnham, in collaboration with T. M. Baumgartner, Sea Island Co.; Ray Gerber, Glen Oaks CC; W. H. Glover, Fairfax GC, and E. W. Van Gorder, Stanford University golf course.

The appendix contains many tables, charts and other data of frequent reference value.

The book is well illustrated and is written simply and compactly. "Turf Management" is the answer to the oft-expressed need for a working textbook on golf turf.

Golf Courses—Design, Construction and Upkeep. Published by Sutton & Sons, Ltd., Reading Eng. Price $5.00...

This is a revised and enlarged edition of the book Martin A. F. Sutton of the famed seed house edited and which appeared in its first edition in 1933. Comparison of the two editions shows the impressive advance of course maintenance science in the past 17 years. Sutton credits this advance to the scientists of the British Board of Greenkeeping Research and the USGA Green Section and association scientists at the state agricultural stations.

January, 1951
LAWN MOWER STATIONARY BLADES

We make these blades in several styles to fit the different makes and types of Lawn Mowers—including the small Hand Trimmer—Hand and Tee Mowers—Putting Green Mowers—Power Mowers and the large Gang or Fairway Mowers. Best quality knife steel, electric furnace heat treated to insure long wear and fully guaranteed to give complete satisfaction. You save important money buying direct from manufacturer.

Price sheet on request or we will quote price for your blade order. JONES MOWER & EQUIPMENT CO. 2418 Grasslyn Avenue, Havertown, Pa. We pay the postage on all orders of $10.00 and over.

The influence of the Scottish golf links on world golf course architecture by Philip Mackenzie Ross is an interesting presentation of the genius and luck of the unknown pioneer Scots who matched the terrain to the strategy of the game and allowed development of hazards at places where the ordinary Green committee would want hazards eliminated.

Robert Trent Jones has an excellent chapter on Golf Course Architecture in the U. S. which refers particularly to the new Peachtree course at Atlanta. Trent Jones was the architect of this course, working with Bob Jones. The adaptation of the Scotch influence as expressed when the late Dr. Alistair Mackenzie and Bob Jones collaborated on the Augusta National course, to the Peachtree course is especially worthy of study. Gentle greens contours and allowance for numerous significant placement of cups are two of the factors at Peachtree representing departures from the Augusta type.

Golf Courses Overseas by C. H. Alison and a chapter by T. Simpson on The Design and Construction of a Golf Course point out some differences between British and American practices. The Simpson material emphasizes soil conditioning and drainage and the appearance of naturalness. Simpson says that much of the construction work today is reconstruction but does not tell about the greater use of mechanical earth handling methods and the design-construction consideration of reduced maintenance costs as the American reader would prefer.

The Sutton material on the Formation and Upkeep of Golf Courses and Putting Greens shows difference between British and American practice. The illustrations are many and informative. Differences in terms are somewhat confusing to the American reader but the illustrations often clear away the confusion. These 100 and more pages alone make the book one the American greenkeeper will want in his business library.

A chapter on Golf Club Management of special value to the British type of golf club, a delightful introduction by Bernard Darwin, a bibliography and an appendix of tables complete the useful book.

GOLF CLUB BUSINESS MOVES

(Continued from page 22)

conditions are plans of many clubs to install night lighting at practice tees as it is believed many players with crowded work schedules can make good use of the night exercise and recreation.

Public and fee course operators are wondering if the defense production schedule will stagger the off-days instead of having the customary Saturday and Sunday off-days. It was found during World War II that staggering off-days kept up plant output and reduced absenteeism. It, of course, would be desirable to spread the load on recreation facilities.

PERMA-MATS

THE BEST MAT FOR DRIVING TEES!

Designed to specifications of well-known pros, these mats are functionally ideal, reversible and virtually everlasting. The finest tee mat at the lowest cost to you.

BEST IN LOCKER ROOM, ENTRANCE & SHOWER

Perma-Mats pay for themselves by saving floors, spikes and preventing accidents. Lays flat (no kinks), thicker cushion, closely woven for firmer footing.

Immediate delivery on popular sizes, send specifications.

MERCHANTS TIRE CO. 2710 WASHINGTON AVE. ST. LOUIS 3, MO.
From Rhode Island to California and from Wisconsin to Texas we have a creeping bent nursery near you to assure lower transportation charges, quicker service and fresher stolons. For spring delivery we offer you a plentiful supply of Arlington C 1, Congressional C 19 and Old Orchard C 52.

**THE GREENS ARE THE FOUNDATION OF ALL SUCCESSFUL GOLF COURSES.**

National Industrial Conference Board recently completed a study in which it was found that a six-day, 48-hour week represents the best standard for efficient war production. Manpower shortages in wartime made labor efficiency and productivity matter of major concern. The Conference Board reported that analyses made by the Federal Bureau of Labor Statistics indicated that the six-day, 48-hour week was most productive for wartime, but the schedule might not prove equally as productive in peacetime. The study also found that when workers had no control of the speed of the work, output increased in the seven-day week, but so did spoilage, sickness and absenteeism.

The study also found that when workers had no control of the speed of the work, output increased in the seven-day week, but so did spoilage, sickness and absenteeism.

N. Y.-Conn. Group Sponsors First Turf School

The N. Y.-Conn. Turf Improvement Association in conjunction with the N. Y. State College of Agriculture and Extension Service, sponsored the first Turf School in this area. The two day session in October, arranged by the association’s education committee of Ed. P. Brady, N. Y. City Parks; Alex L. Edgar, St. Andrews; Joseph Flynn, Metropolis; Frank Malara, Knollwood; Doug L. Rankin, Westchester CC, and A. R. Twombly, was attended by more than 230 turf people from N. Y. and surrounding states.

The program that was developed included such notables as Drs. O. J. Noer, John F. Corman and J. A. Adams, Drs. P. P. Pirone and John C. Schread discussed the disease and insect problems. Mr. Gene C. Nutter, Chan W. Baker and W. R. Craig together with Rev. B. L. Massee filled out the panel of excellent speakers whose topics covered everything from crab grass to Labor-Management problems.

On display were numerous species of turf weeds, turf insects and several of the newer strains of turf grasses. The school met with such interest and enthusiasm that another is planned for in 1951.

Etonic Awards Prizes for "Daffy Shot" Contest

Etonic Shoes, Brockton, Mass., announces results of its popular "Daffy Shots" contest with the first prize, a week at Pinehurst with all expenses paid for pro and his member, won by John Davis, a member of Oswego (N.Y.) CC where John Lisk is pro.

The winning "goofy shot": "While playing the sixth hole at the Oswego Country Club with my regular Sunday 'gruesome foursome,' explains Mr. Davis, 'I poled my second shot into the rough to the left of the green. After searching diligently, we found the ball nestled in some stubble amid acorns, etc., behind a tree and quite close to a projecting root of said tree. It was almost a stymie, but by playing the shot very close to the base of the large oak tree, I was able to make a try for the flag. I settled the spikes of my Etonic All-Weather golf shoes into the turf and struck the ball firmly with my No. 9 iron. Much to the amazement of my partners, and especially myself, when the shot was over, the ball was resting under my left armpit. Apparently, it had struck the root of the tree and skated up the base of the trunk in such a way as to kill its forward speed and cause it to arch back toward me."

Mr. Lewis Lassman, the contestant from Foxhills Golf Club, Culver City, California, and his club pro, Harry Bassler, both received handsome Hamilton wrist watches because, as Mr. Lassman explains it, "While playing Foxhills Golf Club I eagled the 9th hole, a 400 yd. hole, over a barranca. That in itself is not unusual, but the fact that the second shot was an eight foot putt is surprising, particularly since there was no help from the elements."

"Running parallel to the 9th hole on this course is the second, which is about 410 yards, both holes usually into the wind. On my tee shot I pushed the ball although it was well hit and it started out for the 2nd fairway. As it rolled slowly along, losing its momentum, it approached another golfer who was playing the 2nd hole. He went into his back-swing and swung at his ball with a wood, and lo and behold, my ball rolled into position so that instead of hitting his own, he hit mine."

"Off it sailed with a slight hook, well hit, and imagine the commotion and consternation (everybody, that is, except me), when it rolled onto my green about 8 feet from the pin. The putt was lucky. It's tough putting between chuckles."

A portable radio each was awarded to Hal Jernigan, a member of the Ashboro Golf Club, N. C., and his club pro, R. Jack Thomas, because his tee shot got caught by a different kind of trap—a mole trap 50 yds. away.

Cleve Turner of the Brinkly, Arkansas, Golf Club and golf pro C. R. Wilkin will sport imported doeskin slacks, thanks to Mr. Turner's iron nerves and a convenient bird's nest.

Phil C. Richards, 1114 Cherry St., Saginaw, Mich., and Sam Molnar, pro at the Bridgeport Michigan Country Club, have received some handsome luggage.

From the Riverside Country Club of Carlsbad, N. M., came a sequence of events which won Etonic shoe wardrobes for club pro Bill Keith and golfer George Browder.

SHIRLEY SPORK JOINS GOLFCRAFT

Miss Shirley Spork has been appointed to the Advisory Staff of Golfcraft, Inc., it has been announced by Ted Woolley, pres. This coincides with Woolley's announcement of a new and different line of women's clubs, both woods and irons, which will be available Jan. 15 under Shirley's name.

Twenty-three-year-old Miss Spork began her golf career at the age of twelve at Bonnie Brook in Detroit, and is a former Detroit District Match and Medal Play Champion. In 1947 she won the National Intercollegiate Championship. She gained additional tournament experience as runner-up in the Michigan State Women's Tournament in '47 and '48 and as its champion in 1949.

A 1949 graduate of Michigan State Normal, Miss Spork majored in physical education and is at present instructor of physical education at Bowling Green State University in Ohio. She will play in several winter Women's PGA tournaments and on June 1, 1951, she will be on the tournament circuit both playing and giving exhibitions and clinics along the way.
POWERED HAND TOOL

Chicago Wheel & Mfg. Co., 1101 W. Monroe St., Chicago 7, has new Coaches' Aid outfit of Handee line of portable drills and grinders. Among pro shop uses are repairing, identifying and cleaning playing equipment. Handee already is extensively used in golf course maintenance equipment shop operations.

NEW ACTION FOR NIGHT CRAWLER

Ferguson & Sons, Eau Claire, Mich., announce an improved action for their Night Crawler green aerifying machine which will be adaptable to units already in the field. The company says the new action means smoother and faster operation, deeper penetration, and practically no tine breakage. Production is going ahead as fast as materials will allow and shipments are expected to start about Feb. 5. An operating model of the Night Crawler with the improved action will be shown at the NGSA Turf Conference and Show which opens in Chicago, Jan. 30.

OLD ORCHARD CELEBRATING 25th YEAR

The same strain of Old Orchard creeping bent developed by Old Orchard Turf Nurseries, Madison, Wis., in 1926 and plant-
ed in 1928 is still being used without replacement at Whiting CC, Stevens Point, Wis., reports R. R. Bond, nursery owner. Bond will have booth No. 15 at the National Turf Conference and Show which opens January 30 at the Sherman Hotel in Chicago. On display will be plots of sod showing C1 and C19, a mixture of these two and a plot of Old Orchard C52. Unclipped stolons of these various strains growing in flower pots also will be on display. Enlarged photos will show greens planted to various strains and a chart on "How to Plant Stolons and Produce Putting Surface in Eight Weeks" will be available for free distribution.

POSTHUMOUS AWARD

A plaque awarded posthumously to the late Ward A. Hillerich in appreciation for his contribution to golf by the Falls Cities Golf Association at its annual dinner at the Audubon CC, Louisville, Ky., is accepted by John A. Hillerich (center), brother of Ward. William Chandler, new pres. of the association, is at the left and Col. Lee S. Read, retiring pres., is on the right.

ROSEMAN HAS NEW LIGHTWEIGHT ROLLER-FAIRWAY GANG MOWER

The Roseman Mower Corp., Evanston, Ill., has announced and will show for the first time at the 22nd National Turf Conference and Show at Chicago their improved model gang mower featuring a new lightweight hollow roller drive. The advantages of mowing putting greens with roller drive mowers can now be applied to fairways to provide smoother, more uniformly cut turf with better playing surface. Also incorporated in the design of the new Roseman mower are several additional improvements of interest to progressive greenkeeping superintendents. A cordial invitation is extended to all greenkeepers in attendance at the show to inspect the improved Roseman mower. Those unable to attend are invited to write for additional information to the Roseman Mower Corporation, Evanston, Illinois.

PLASTIC BINDING FOR PNEU-MAT

Pneu-Mat Runners manufactured by Superior Rubber Mfg. Co., Inc., 122 East 25th St., New York, have been improved by using a vinyl binding in place of the rubber binding used for many years. The spike-resistant Pneu-Mat Runners are most suitable for use in locker rooms and other locations where spike shoe traffic is heavy. Preliminary tests indicate the new vinyl binding will increase the durability of the runners under heavy traffic. Complete information available from the manufacturer on request.

SPALDING'S NEW 1951 TOP-FLITE IRONS

Johnny Palmer, Spalding Golf Consultant, who set a new competitive record at Pinehurst during the North-South Open Championship, with a 65 is shown above explaining features of Spalding's new 1951 Top-Flite Gold-Line Irons to Walter Burkemo. Johnny says they're the finest he's played with.

COLORFUL PLAID SPORTS CAP

Colorful plaid cap for men, women, and children. Made with solid crown panels, Texon visor with plaid underbrim. Model 441, available in small and large sizes with shirred elastic back which provides a complete range of sizes to fit all heads. One of the new models in the 1951 line of Congo headwear made by The Brearley Co.

BILL BARBOUR REPRESENTING BURKE

William P. (Bill) Barbour, head pro at the Sleepy Hollow CC, Brecksville, O., is now representing Burke in the northern Ohio territory, Mr. J. T. Gilfillan, pres. of Burke Golf, Inc., Newark, Ohio, recently announced. Bill has been a member of the PGA since 1931, after winning the Cleveland Public Links Championship. Head pro at Sleepy Hollow since 1938, and Cleveland District Open Champion in 1946, Bill Barbour has qualified five times in National PGA, the Cleveland District Open, and the U. S. Open. Bill holds the Sleepy Hollow course record with a 63, consisting of 9 birds and 9 pars. He will continue as head pro at Sleepy Hollow while contacting all golf clubs in the northern Ohio area for Burke Golf, Inc.
With the RYAN SOD POWER CUTTER

One Man CUTS SOD

FASTER — up to 600 yds. per hour.
CLEANER — oscillating, self-cleaning blade.
UNIFORM — thickness accurately controlled.
WITH SAVINGS UP TO 80%.

Cuts to uniform thickness 600 sq. yds. of Blue Grass, Bent or Bermuda sod per hour. Ideal for aerifying and sod replacement work.

WEST POINT INTRODUCES F-G '51

January 1951, West Point Lawn Products, West Point, Pa., is introducing the F-G '51, an improved F-G model aerifier. Hydraulic control, standard equipment on the '51, has been revamped. Both wheels are controlled by one cylinder so more uniform cultivation is possible. Cylinder is of adequate size to prevent leakage of fluid.

Improved disc-bearing construction; newly designed, more substantial spoons; positive depth adjustment; improved wheel mounting; fewer moving parts; sturdy one-piece hitches for the gang are other features of the F-G '51, which will be shown at the 22nd Annual Turf Conference and Show in Chicago.

25 YEARS FOR PHILADELPHIA TORO

More than 100 golf superintendents, club officials and manufacturers gathered Nov. 27 at Phil. Toro's offices, 1528 Belfield Ave., Philadelphia, to help celebrate the company's 25th anniversary and to honor T. L. Gustin, its founder and still very active head of the golf supply house. Gustin still has the company's first check book showing purchases from Toro Mfg. Co., Fate-Root-Heath, Chipman Chemical, Buckner, Bayer (DuPont) and other early birds in the turf products business. Born in Jasper county, Ill., Gustin started his selling career with Rumley. After serving with several ag implement makers he was sent east by Bates Steel Mule Co., Joliet, Ill. How “Gus” won a Bates sales contest is a harrowing yarn that needs right smart tellin', some other time. Shortly after he opened the Philadelphia Toro Co., and has been "winning with service" ever since. Toro's pres., Dave Lille and sales mgr., Bob Gibson were on from Minneapolis to present Gustin a plaque from the Toro organization congratulating him on a quar-

WEST CHICAGO, ILL.

Tom Mascaro showed slides of the causes for poor turf. Superintendents then took over the discussion of the "Who, Why, What, When and How" of aerifying. It was agreed that no great mechanical skill is needed in order to operate an aerifier, but some knowledge of what is to be accomplished is desirable. Operator should realize that some spots need special attention. Should employ common sense to determine how much care is needed to avoid surface disturbance while getting maximum cultivation.

Root growth tops the list of reasons for aerifying. Better roots improve the soil, help to reduce compaction, make for greater drought-tolerance, make healthier more disease-resistant plants, provide the better cushion which appeals to the golfers.

Aerification is an essential part of the fall renovation program. Springtime aerification has a place; during an open winter play continues on wet soil and causes compaction. Aerification can be done whenever it is needed. If trouble strikes in midsummer, something can be done about it. With reasonable care afterward, turf can be brought back perfectly after aerifying in hot weather.

It is desirable to cultivate soil as thoroughly as possible without unduly roughening the surface. Deep aerification is needed to encourage deep root growth; shallower cultivation may be used in preparation of a seedbed. Power aerification is rapid, but emphasis should not be on speed alone. Work should be done carefully. Finishing operations should be done properly. Three-quarter inch spoons have the most nearly universal application.

Following the discussion, guests were introduced—Amos Kirby, farm editor, WCAU; Al Cooper, Penn State College extension agronomist; R. G. Waltz, Montgomery County Agent; H. O. Wilcox, Delaware County Agent; A. O. Rasmussen, Ornamental Horticulture Extension Specialist; Bill Bengeyfield, Ass't County Agent, Westchester County, N. Y.; a group from the New Jersey and New York area; Al Radko, Dr. Marvin Ferguson and Dr. Fred V. Grau of the USGA Green Section. Dr. Ferguson pointed out that aerifying by machine has become possible only recently. Practical application of the new method is far ahead of research. West Point Lawn Products provided a fellowship at Penn State College to acquire more exact data on aerifying.
