Herbert Jacques, USGA Leader, Dies at Boston

Herbert Jacques, 64, died suddenly April 30, of a heart attack at his home in Boston. He was pres., USGA, in 1933 and 1934. His father had headed the USGA in 1909 and 1910.

Mr. Jacques had been pres., The Country Club of Brookline, Mass., since 1944. He also was a founder of the Massachusetts Golf Assn. As an official of the USGA he worked out the present specifications of the American ball and was a pioneer in world-wide standardization of the rules.

He was a prominent New England industrialist. He had been a track star at Harvard from which he graduated in 1911. He won commissions as an army lieu., and as a naval aviation ensign in World War I.

Jacques was energetic, foresighted and genial in modernizing and popularizing the USGA during his administrations, and with his pal of The Country Club of Brookline, Hal Pierce, who became USGA pres. in 1940 and 1941, laid out the policy of USGA extended services and influence.

He was present at the USGA annual meeting this year; not in good health but in bright spirits and, as ever, a joy to those who had the great fortune to know this finest of gentlemen sportsmen.

GETTING KIDS STARTED

WANTED!

GOLF CLUBS
THAT ARE
Not Being Used!

A lot of high school youngsters would like to learn to play golf, but lack funds for golf equipment. If you have clubs you'd like to donate, or will sell, contact Lou Frey, secretary, at the Penney Company or leave at the Bulletin or phone 99 or 3 and they will be picked up.

This 3-inch one-column ad in the Buffalo (Wyo.) Bullet shows how the golfers of that town (population 2,674) encourage golf among high school students.

Central Plains Foundation Shows Value at Field Day

CENTRAL Plains Turf Foundation Field Day, Wichita, Ks., June 8, has a program which exhibits the remarkably valuable work the Foundation has done since its establishment in 1950.

Those at the field day will inspect the Wichita (Ks.) CC new course which was started about 4 years ago and has been in play for 2 seasons. Other places on the Field Day tour will be the University of Wichita Veterans' football field, Lawrence stadium (Wichita Parks' heavily used sports field), and the experimental nursery operated by the Board of Park Commissioners. These turfed establishments and many others in Kansas, Colorado, Nebraska, Missouri and other central states are collaborating to decided mutual profit with the Central Plains Turf Foundation.

An extensive demonstration of turf maintenance machinery also will be staged at the field day. Foundation pres. is Chester Mendenhall. W. E. Updegraff and Ross McCausland are co-chmn, of the Field Day committee.

Western Seniors at Shawnee

Western Seniors' Golf Assn. 5th annual tournament will be played at Fred Waring's Shawnee CC, Shawnee-on-Delaware, Pa., with 18 holes on July 9 and another 18 on July 10.

Entry fee is $20. Closing entry date is June 25. Entries should be sent to Sec. Wm. V. Kingdon, 7520 N. Pennsylvania, Indianapolis, Ind. Kingdon says wives will accompany many members to the tournament.

In addition to the championship and handicap competitions for the Kennedy and Braughton trophies, respectively, there'll be competition in six age classes from the 50-54 group to the 75 years and older class.

Frank Murray, CMA Founder and Official, Dies

Frank H. Murray, 61, a founder of the Club Managers' Assn. of America, who served as president and as secretary of the organization, died of cancer, May 14, at his home in Evanston, Ill. Murray also had been pres., Chicago Club Managers' Assn., and served in other offices.

He was born in Helena, Mont. and after returning from World War I where he
served as an artillery officer, he went with the Raviloe CC in 1920. He resigned as Raviloe manager in 1936 to go as Glen View Club's mgr., and in 1952 went to North Shore CC, also in the Chicago dist., as mgr. Illness caused his resignation from North Shore in 1952.

Murray was one of the most widely known, best liked men in club management. He was a highly competent, hard-working, cheerful fellow. Not a word of complaint came from him during his prolonged illness and he kept going around until compelled to enter a hospital.

He is survived by his wife, Ruby.

WORK ON SMALL CLUB
(Continued from page 34)
Millan, Ed Weber, George Regan, Walter Kundert and O. J. Tommeraasen, are the kind of men you would expect, if you knew them, to make a club like ours the best club that any town of Madison's size or two or three times its population, can show."

Maybe Ryan is guilty of poetical license in bragging about his club, but he can't be arrested for that. Such confidence is worth money to the club and to Ryan.

When Ryan came to the club from California all the members' clubs were on carts and were parked in the middle of the grillroom floor. He wrote: "We needed the space for tables and card playing on stag nights. So I built racks along the walls and put two carts to a rack and now we have the floor space we need for members in the evening."

That's not the fanciest arrangement in the world and not the most desirable answer to the problem of cart storage which bothers so many clubs, but it worked at Madison.

Improvises A Pro Shop

Something else that Ryan did that shows the resourcefulness of a good small town club pro is the way he built the pro shop shown in accompanying illustration. "I figure that supplying our members with the best, most suitable playing equipment they can get anywhere is a very important part of my service to the club. So I built my shop at one end of the grillroom, where I can take care of customers at the shop and care for the bar business also.

"In the summer I have an assistant who takes care of the shop and bar while I'm out teaching."

At a larger club the arrangement wouldn't fit but in the smaller town clubs

maintains a library? Therapeutics is a complex art and science. It would be impossible to memorize all the knowledge on the subject. It is common practice for a doctor to prescribe "sugar pills" to his patient on his initial visit to the doctor's office. Actually, in such a case, the doctor is merely delaying treatment until he has had time to consult his textbooks. A superintendent may well use information culled from his library. It will enable him to analyze his problem and to outline its solution in a practical manner. Unfortunately for the golf course superintendent, he does not have a margin for error as great as the doctor. When a doctor's error of judgement results in the death of his patient, he graciously disposes of the body by arranging for a decent burial. However, when the superintendent's patient, the green, dies he is subjected to the humility of presiding over an endless wake. The green cannot be buried. The cadaver is a constant reminder to the golfer, that the superintendent lacked skill to save it. This analogy, morbid as it is, serves only to emphasize the handicap under which we work. It means little to the golfer, that extenuating circumstances over which the superintendent has

**STUBBORN GREENS**

Respond to Use of LIQUID GRO-GREEN

Mr. Oscar Witzleb, owner of Plum Hollow golf club, Dixon, Ill., states: "After only 3 applications of liquid Gro-Green (less than 3 weeks) a large dead area consisting of approximately one-quarter of our No. 2 green has completely revived." He concludes: "It's not only easy to use—but works like magic."

Liquid Gro-Green contains all essential Trace and Micro-elements, hormones, and vitamins that provide balanced plant diet without waste. For greens, use handy spray gun (shown below). Fill glass container with undiluted Gro-Green and connect to hose. Spray gun automatically mixes 1 pint Gro-Green to 15 gallons of water. 1 pint covers approximately 2000 sq. ft. For fairways, use ordinary mounted sprayer. Mix 2 gallons Gro-Green with 8 gallons water, use 10 gallons per acre nozzle. Weed killer may be mixed with solution and both sprayed on at one time.

HOW TO PLAN FERTILIZING

(Continued from page 49)

late. I have not kept track of this nitrogen because it is such a small amount. There is another reason too—I don't know how to figure gallons into pounds.

After Labor Day it's time to start thinking about "When" again and getting ready for the fall program. This takes some time usually because of the heat and I consider myself lucky if I can get a small amount on before the first of October. The quantity can be increased up to one pound per thousand per application as the weather gets cooler. By the end of October, 3 lbs. have been applied. Just before cold weather and before the last mowing, I like to feed 1 lb. all organic nitrogen, which, by breaking down slowly, helps to feed the roots over winter. The last cut is made without the grass catcher on the mower so as not to pick up any of the material. This makes 4 lbs. of nitrogen used during the fall for a total of 7 lbs. for the year plus a small amount put on in liquid form and by the use of cyanide in top dressing. All material used on greens is broadcast by hand from pails. With a little practice a man can start on one side and make a pail of mix cover the entire green evenly without running out two-thirds of the way across. We divide the material and crisscross the green in as many directions as there are pails to be applied in order to assure even distribution.

I don't believe in the use of straight inorganic nitrogen except in certain cases,
An even more sensational performer than last year's fast selling Putt-Master Pendulum Putter model. Lin's putts up accurately... binocular sighting improves gauging of distance... overcomes pushing and pulling... strokes ball with overspin... keeps stroke and follow-thru on line... reduces tendency to lift head. Same Pend-L-Putter serves right or left-handers. USGA approved. Solid aluminum head, True Temper shaft. Top quality grip.

A trial of the Pend-L-Putter quickly convinces them—they buy it as soon as they try it.

June, 1953
into two or three applications and I like to use some organic if I can get it. Some of the fertilizer, if applied after aeration if possible, has a better chance to stay put on the slopes. Except on Bermuda turf, I'm not much in favor of spring fertilization unless for some reason it was impossible to put it on the previous fall. I don't like to use heavy applications of nitrogen fertilizer in spring. Anything will grow in the spring because of ideal weather and because of the natural elements of plant food that have accumulated in the soil over winter while the plants were dormant. To add to this natural fertility is apt to over-stimulate and bring on the rest period that must and will follow — the fellow running uphill again.

In the few cases I know of where fairways were over-fertilized, in each it was due to spring fertilization. Charlie Hallowell says spring applications of nitrogen fertilizer are not helpful in maintaining a dense fairway turf in June, and in my experience I have found this to be true. I also believe spring applications are more favorable for weeds and crab grass because they are growing vigorously at that time. However, spring and summer applications are necessary for Bermuda turf.

I prefer to start my fairway feeding program early in September. This may be a little early since crabgrass keeps growing until the first frost which is around the middle of October, but I have found I must start early in order to get the job done. I feel that by encouraging the permanent grasses to spread and occupy space left by crabgrass, I have gained. Since no two things can occupy the same space, there is less space for the germination of crabgrass seed the following year.

I have intentionally skipped lightly over tees and fairways. Amounts as I see it are not too important. Any amount from 800 to 1200 lbs. per acre evenly distributed is good. The most important thing is to get it on and get it on at the right time. I believe too much fertilizer is stored in the shop over winter. If I have fertilizer I don't like to keep it in the bag. I like to get it out on the ground where it will do some good. Ruben Hines, an old friend of mine in the Washington, D.C. area, once asked me if I had any fertilizer. I said sure I have 1000 lbs. of fertilizer — wouldn't be without it. He said, "What are you keeping it for? It won't do any good in the barn." I have thought of that a great many times and I believe it has helped a great deal. I has become a sort of motto with me and it's a thought I want to leave with you. Don't keep fertilizer — use it.

Northeastern Wisconsin Holds Operations Clinic

Annual meeting and golf club operations clinic of the Northeastern Wisconsin Golf Assn. was held May 11th at the Oneida Golf & Riding Club, Green Bay.

The clinic featured four seminars, one for presidents and secretaries, one for club managers and house committeemen, one for superintendents and greens chairmen, and one with the professionals and sports committee chairmen. Each seminar featured an outside speaker discussing an aspect of club operation.

At the annual meeting it was agreed that all NEWGA clubs will use the USGA (current) handicap system. M. A. Carroll of Oshkosh was re-elected pres., Robert Testwuide of Sheboygan was re-
elected vp, and Donald P. Steinberg, Jr.,
of Appleton was re-elected sec.-treas.
Frank Murphy of Manitowoc, Frank Cor-
nelsen of Green Bay and Richard Johnson
of Waupaca were elected directors-at-
large for the coming year.

The annual meeting and clinic will be
held at Riverdale, Sheboygan; the Best-
ball tourney is scheduled for Riverside,
Marinette; the amateur for Butte des
Morts, Appleton; the ladies tourney for
South Hills, Fond du Lac; and the Open
at Riverdale, Sheboygan.

West Bend C.C. was voted to mem-
bership.

About 120 men representing 21 member
clubs attended the gathering.

DISEASES OF TURF
(Continued from page 68)

I think of it only when you add the various
factors of number of applications neces-
sary; the residual material after a rain;
and the labor cost of added applications.
As an example of this I would take two
compounds which to me offer excellent
control of Brown Patch. Calo Cure is
excellent, long lasting regardless of rain,
but high priced. If you are short of labor,
Sure Shawnee is famous for golf. But this complete 1000 acre resort offers a lot more ... wonderful vacation pleasures for all the family. Swimming pool, tennis courts, boating, riding, dancing. Gay, smart decor ... cheerful, airy rooms or cottages ... cool mountain setting ... supervised children's activities ... excellent food and service. Enjoy a perfect vacation at moderate rates.

Do some experimental work on your own golf course rather than looking to your agricultural experiment station for all the tests. This merits consideration on two points. First, the results you get do apply to your course, whereas the results from the agricultural station may not, since they may have a different soil, culture, turf strain, etc. And secondly, there is nothing so convincing as seeing green and brown results on the grass rather than black and white results on printed data sheets. As an old farmer told me when I worked in Delaware, "I don't give a darn for all of your statistical analysis proving that a treatment is good, what I want to do is to walk..."
