Standing Invitation to sit out a Shower

When the rain comes down hard, golfers are glad to find a friendly shelter house like this. Overhanging eaves provide good protection against the wind and rain. Benches don't sag. And there's ample room for seventeen people to sit in comfort.

Pre-cut for quick assembly, Koppers Shelter Houses are shipped as a complete unit (all hardware and lumber included). Two men can erect a shelter house in three or four days.

All lumber has been pressure-treated against decay, weathering and termite attack. With this protection, Koppers Shelter Houses last three or four times as long as shelters made of untreated wood. And yearly maintenance and replacement costs are greatly reduced.

Designed for rustic beauty, Koppers Shelter Houses will blend with the landscape of any golf course. And they require no painting. Write today for prices and descriptive literature.

MAGNITE
THE NATURAL ALL-IN-ONE
SOIL CONDITIONER AND PLANT FOOD

INVITES COMPARISON

• CONDITIONS SOIL
• FERTILIZES • ADDS VITAL MINERALS AND ORGANICS

GREENS KEEPER, VIC LINDHOLM, SAYS THIS ABOUT MAGNITE:
"The test for your product, Magnite, on the old roadway in front of the 18th green of Cherry Hills Country Club here at Englewood, Colorado, was a very severe one. In fact, our experience has been so bad that we thought it impossible to get a stand of grass on this strip, some 200 feet long and 100 feet wide, without removing all of the road fill, filling in with new soil and resodding.

"At the time of this report, it is a pleasure to say that improvement in this area is now seen. With the exception of some of the ridges where the heavy water spray washed the Magnite away, the grass is of good texture and of a fine color. Where new grass was seeded a good healthy stand has started.

"From our observation, Magnite is a product that merits acclaim and we appreciate you Magniting this bad spot which is helping us to overcome a difficult problem."

TEST IT YOURSELF — TO SEE HOW MAGNITE:
1. Reactivates weak, worn-out soil
2. Speeds growth — builds healthier plants and foliage
3. Restores important plant foods and minerals
4. Produces more effective "insoak" of water
5. Tends to prevent run-off, causing soil erosion
6. Improves "work-ability" of soil

from England... Then built Mayfield in 1909 and became its pro when it opened in 1911... He retired on pension two years ago... He is the livest, youngest-looking 80 year old lad in this country... That television program "Life Begins at 80" should star Bertie.

Eddie Bush, pro at Woodmar CC, Hammond, Ind., at Tampa Women's Open, looking like he's coming out a winner against serious illness... Medicos say Eddie, a grand lad with a lot of moxie, is coming out ahead... Eddie and his wife Betty, his pupil who he made one of the contenders on the women's pro circuit, are a really lovable team.

Pros at Seniors' tournament talking about amazing boost to golf business shown by National Golf Foundation activities... Foundation's 1953 report showed 52 new courses opened for play, 109 under construction, and 225 being considered or planned... And report is not complete... Smart businessmen pros point out that National Golf Foundation report shows current activities are increasing pro job opportunities to extent of approximately 15 per cent of present PGA Class A membership... Increase of market for clubs, balls,
FIRST CHOICE OF RANGE OPERATORS FOR OUTSTANDING SERVICE!

All the popular features and quality engineering that have won the praise of range operators year after year are combined with improved production methods to make the Picker-Upper better than ever. Make this the season to have a Fonken Picker-Upper on your range for reliable, positive golf ball retrieving and injury-free ball pick-up. Fast, mechanical retrieving with the Fonken Picker-Upper — even under rugged service conditions — is the right step towards increased range profits! Improved pick-up discs assure golf ball pick-up without injury — lift-out wire basket-type containers allow for easy unloading and are ideal racks for hosing and washing golf balls. Rugged all steel welded construction and only once-a-year lubrication of bearings provide stand-out performance and maintenance-free operation.

ORDER DIRECT — Illustrated brochure giving complete details and specifications of the Fonken Picker-Upper golf ball retriever is available on request.

FONKEN MANUFACTURING COMPANY • 433 West Magnolia Avenue • Glendale 4, California

Here is the Shower Head that’s AUTOMATICALLY SELF-CLEANING each time it’s used

NO CLOGGING • NO DRIPPING

There is no shower head like the new SLOAN Act-O-Matic. The exclusive feature which sets it apart from all others is its automatic self-cleaning action. The unique spray disc moves downward into shower position when the water is turned on. A cone-within-cone spray of maximum efficiency is delivered. When the water is turned off the disc is moved upward, draining the head instantly.

Because the water is completely removed, the Act-O-Matic shower head does not clog or lime up, and therefore it will not deliver irregular or distorted spray patterns. The Act-O-Matic is also economical in use. It saves water, fuel and maintenance service. (Institutional models available.)

SLOAN VALVE COMPANY
4328 WEST LAKE STREET
CHICAGO 24, ILLINOIS

The Sloan Act-O-Matic shower head is a product of Sloan Valve Company, whose flush valves are in world-wide use — in buildings of every type and on ships at sea. More Sloan Flush Valves are sold than all other makes combined.

Supts. Use of Research; Theme of GCSA Conference
By HERB GRAFFIS

MORE THAN 700 superintendents, turf research, and equipment and supply men applied themselves to the plain and complex problems of golf course operation at Miami, Fla., Jan. 3 to 9. The 25th turf conference and equipment exhibition of the Golf Course Superintendents' Assn. of America which engaged these men, and which had as a sideline an interesting entertainment program for almost 250 of their wives and children, again warranted the GCSA verdict of "best" on the steadily increasing value of its meetings.

For the first time the supts.' organization held its national meeting in the south and not only answered requests of southern turf men to make the association's program truly national but, in acquainting northern and central supts. with some southern turf maintenance difficulties and triumphs, showed broad, enlightening close-ups of remarkable progress in course condition.

The south was further spotlighted by the GCSA in the election of Norman C. Johnson, San Jose CC, Jacksonville, Fla., as president to succeed Leonard J. Strong, Saucon Valley CC, Bethlehem, Pa. Johnson had a highly successful background as supt. on northern courses prior to his excellent operation in Florida.

Wm. Beresford, Los Angeles (Calif.) CC, was elected vp. Agar M. Brown, who has very ably served the association for years as its sec.-treas. was re-appointed.

New directors elected are Earl S. Bell, Armour Fields GC, Kansas City, Mo.; John Gormley, Wolferts' Roost GC, Albany, N. Y.; and Paul Weiss, Lehigh Valley CC, Allentown, Pa.

Florida Assn. of Golf Course Supts., co-sponsors of the convention, saw to it that the visitors were taken around to see the Miami area's famed courses and that visiting supts.' wives and youngsters got samples of vacationland as partial payment for not complaining about daddy having to be on the job long hours and seven days a week, often at the cost of a normal family life.

Research Application Is Theme

Keynote of the educational conference was sound application of turf research. In almost all addresses on grasses, weed and insect and fungus pests and other phases of turf management, stress was placed on individual judgment in the use of basic findings of research.

The conference opened promptly at 9:15 a.m. Jan. 7 with invocation by Rev. Wayte Fulton, Jr. of Miami's First Presbyterian church. Pres. Leonard J. Strong briefly reviewed the association's contributions to improvement of courses and American turf in general, and to the increase of golf play and enjoyment.

Warren Bidwell, Seaview CC, Absecon, N. J., chmn. of the opening session, introduced Willard M. Fifield, director, Florida Agricultural Experiment stations. Fifield outlined the principles of turf research and tersely referred to the complex factors of water, light, temperature, soil, plant food and diseases that figured in practically every phase of the scientific search for improved turf.

Using Weather Forecasts

Henry M. Tonkin, Jr., meteorologist of the U. S. Weather Bureau at Miami spoke of the use of weather forecasting in course maintenance as the less dramatic but tre-

mendously important employment of a fairly reliable art and science.

Tonkin said nobody can predict weather with high accuracy any longer than 48 hours in advance but Weather Bureau 5-day forecasts and 30-day outlooks provide valuable guidance as weather in most areas follows a repetitive pattern. He advised supt.s to secure weather forecasting data available from the Bureau’s 14 district offices and from Washington. This material, he said, provided information on high, low and average stages of weather factors and enabled a supt. to plan his work with reasonably good adjustment to a 30 day outlook. He said that “Climate and Men” published by the Government Printing Office at Washington contained much valuable information for supt.s.

In response to a question Tonkin said that a supt.s’ own observation and experience on cloud formation and wind direction as local weather forecasting was quite reliable in forecasting.

Frank Godwin, professor of marketing, University of Florida, delivered a highly amusing and instructive address on the little things that count in selling and public relations. He urged that supt.s know the names of their members or frequent players on pay-play courses. He also said that the attitude of the prospective buyer generally was a reflection of the attitude of the fellow who was trying to sell his own personality or an idea and urged that supt.s keep this thought in mind in developing their own status.

Berg Judges Course Care

Patty Berg, first of the professional stars ever to address a GCSA convention, was introduced by Joe Dey, USGA executive secretary.

The energetic and competent Miss Berg told of being grateful to supt.s for providing facilities that not only were materially favorable to good golf play but which supplied psychological aids to better scores in beautiful turf, landscaping and grooming of courses.

Patty said that the golfer who enjoys the game most regards the course as another home and shows toward the course the same consideration one would exhibit in keeping a home attractive. She expressed appreciation of the supt.s’ problem with untidy players.

Her talk pioneered along lines that is great public relations for topnotch pros as well as fine propaganda for supt.s. It appears on page 44 of this issue of GOLFDOM.

Supt.s’ Publicity Needs Care

The publicity aspect of the golf course maintenance job was treated in an excellent address by Frank Dunlap, Country Club of Cleveland, and pres., Cleveland District GCSA. Dunlap declared that local association activities coordinated with national GCSA activity was the groundwork
