Vinnie Richards Promoted to Dunlop Vice Presidency

Vincent Richards has been named vp Dunlop Tire & Rubber Co., announces David Collee, acting pres. of the company. The Richards promotion followed board meet- ings of Dunlop Rubber Co., Ltd., London, Eng., and the American company.

Richards also will continue as asst. to the president and gen. mgr. of the sports division, which position he has held since he joined the Dunlop organization in 1930.

He will make his headquarters at the Dunlop office, 500 5th ave., New York City.

Richards, now 50, has had a notable ca- reer in the play and business of sports. He was the tennis Boy Wonder from 1917 when he, then 14, won the Boys’ Outdoor Singles tennis championship, then proceeded to 35 U. S. and world amateur and pro tennis titles, and played on 5 Davis cup teams.

He turned pro in 1923. In 1927 he was a prime mover in organizing the Professional Lawn Tennis Assn. of the U. S. Twenty-seven years after he won his first National Doubles title with the late Bill Tilden, Richards and Tilden won the national pro doubles championship. In 1947 Richards served as Commissioner of the World’s Professional Tennis league.

He has continued to play astonishing ten- nis and as late as 1945 defeated many of the younger stars in war drive and military installation matches.

He is a week-end golfer now, playing in the low 80s. His association with pro golf and with golf ball manufacturing and dis- tributing business has given numerous showings of sound, keen judgment and has made him a multitude of friends in the business end of the game.

announce new models of saddle stools

Lichtenberger-Ferguson Co., 352 S. Los Angeles St., Los Angeles 13, Calif., an- nounces new models of folding saddle stools, with leather and duck seats, re-in- forced seat corners, hardwood legs and nickel-plated hardware. These 3-legged stools which are very easily carried are rapidly growing in popularity among golf spectators, and among players who want to take it easy during waits.

MURDOCK
OUTDOOR DRINKING FOUNTAINS HYDRANTS
LAWN HOSE BOXES

January, 1954
Forty-three sales engineers from Buckner distributors throughout U.S., instructors and others of Buckner staff assemble between sessions of the company's first design and layout school.

**BUCKNER WATERING SCHOOL**

**STUDENTS PRAISE COURSE**

Buckner Mfg. Co., manufacturers of Turf King sprinklers, Buckner quick-coupling valves, and kindred sprinkler irrigation equipment, recently held its first Design and Layout School at the factory in Fresno, Calif. John B. Gill, Buckner's Gen. Mgr., conceived the plan of inviting distributors' men for a week's instruction in basic design of efficient sprinkler systems.

Gill, who directed the preliminary planning as well as the school itself, reports that the results were gratifying beyond expectations. The success of this school will undoubtedly lead to similar presentations in the future.

Forty-three sales engineers representing distributors of turf equipment from all parts of the country, assembled at Fresno for a well-planned course of concentrated study. A variety of pertinent subjects were discussed by five qualified instructors: H. M. Clark, chief engineer of Buckner; Dr. Winston Strong, Prof. at Fresno State College; King Ewing, Manager of Atlas Lawn Sprinkler Co.; Bob Baldock of B. Baldock Co.; J. M. Hennessey of Landmark Engineering Co.

The curriculum included a basic course in hydraulics, sprinkler design, typical sprinkler system layouts, characteristics of soils, and the determination of proper sprinklers for specific types, the effects of watering on various grasses and turfs, how to water properly, and the servicing and repair of sprinklers.

The instruction was kept entirely practical by numerous field demonstrations of all Buckner equipment and a visit to the new Buckner testing laboratory and station. On the last day those attending the school toured the Buckner factory to view advanced methods of manufacturing, testing, and inspection.

According to Gill, the purpose of the school was to assist Buckner distributors by helping to instruct their men in proper sprinkler specification and system layout. The instructors gave special emphasis to providing greater efficiency and economy in watering systems by means of scientific design. As a follow-up, Buckner will continue the program with a correspondence course involving periodic mailings.

Months of planning preceded the school but its success was best expressed in the enthusiasm and attentiveness of the 43 sales engineers who attended. As the school progressed it became increasingly evident that this course of practical instruction filled a definite need. It was obvious that the far-reaching results will more than justify the time and effort expended by all.

Arnold Firle, vp Canvas Products Corp. (Can-Pro bags), Fond du Lac, Wis., won the Astrup trophy at the Annual National Canvas Goods Manufacturers Assn. convention. Plum Hollow, GC of Detroit dist., was the scene of the tournament in which 75 players entered.
PAR-WAY 1954 CART HAS RED HANDLE, WIDE TIRES

The 1954 model of the Par-Way golf cart will be handled for distribution throughout the eastern states by the Kroydon Co., says Bob Cassidy, president of the Cassidy Mfg. Co., Vancouver, Wash., makers of the cart.

A new feature of the Par-Way Cart, which should prove popular to retailers, is the red plastic handle. Attractive, durable and useful, the red grip provides easy identification for the owner, especially at crowded tees or in storage. The new plastic grip has a smooth, clean feeling and is resistant to deterioration from weather exposure and perspiration.

Another new feature of the Par-Way cart is the wide-tread, semi-pneumatic tire specially developed by the Gates Rubber Co. The Par-Way tire is softer and gives more resiliency to the cart. With more surface contact, the tire improves handling qualities and is easy on turf.

NEW WEED CONTROL BOOKLET

An up-to-date revision of "You Can't Argue with Weeds" has just been issued by Chipman Chemical Co., Bound Brook, N. J., manufacturers of chemical weed killers since 1912. This 40-page booklet contains helpful information on a wide variety of chemicals currently recommended for weed, grass and brush control — explaining what they are, what they are used for and how to use them.

In addition, many pages are devoted to illustrations and detailed descriptions of the most troublesome weeds, as well as specific directions for their control. Considerable information on killing brush, trees and stumps is also included.

A copy of "You Can't Argue with Weeds" may be obtained without cost by writing Chipman.

FRED GRAU JOINS WEST POINT STAFF

Fred V. Grau has joined the staff of West Point Products Corp. West Point's future plans are keyed to the idea of new products and technics. Fred Grau is well qualified to coordinate this twofold program. He will be available to superintendents for consultation service.

Born on a farm near Bennington, Oma-
SPALDING CONSULTANTS PLAN 1955 LINE

Working well ahead in planning Spalding's 1955 golf line the company's golf consultants, executives and factory experts go into conferences at the A. G. Spalding & Bros. plant at Chicopee, Mass. Shown above are:

Left side of table—(back row) L to R: Al Brosch; Al Watrous; Luke Smith; Don Tait; Jake Doubleday.

(Front row) L to R: Jay Hebert; M. J. Kiernan; Frank Heery; Paul Jones; Jerry Douglas; Frank Williamson; Mike Turnesa; Johnny Faimer.

Rear of table—(standing) Jimmy Long; (seated) Jerry Barber.

Extreme right side of table—(front to rear): Walter Burkemo; Frank Hiatt, National Sales Mgr.; Gordon W. Browne, Merchandise Mgr.

Nearest table—(front to rear): Fred Carlisen; Lyle Thompson; Jimmy Thomson. Tom Brandon.

ha) Nebraska, Grau received early training in grass work from his father. During his college days at the University of Nebraska he was part-time greenkeeper at the old Shrine CC, and caretaker of the Plant Museum under the guidance and inspiration of Dr. F. D. Keim. Upon graduating he became research assistant with the Green Section during Dr. Monteith's directorship. 1931-1933 he did graduate work at the University of Maryland where some of the original work in chemical weed control was done. The degree of Master of Science was awarded him in 1933, and in 1935 he was awarded the degree of Ph.D. in Agriculture.

In February 1935 he accepted the position of Extension Agronomist with the Pennsylvania State College and thus became the first Extension man in the U. S. to devote a major part of his time to turfgrass improvement.

During World War II Grau took a year's leave of absence from Penn State to assist U. S. Army Engineers with grassing problems. In August 1945 the USGA selected him as Director of the Green Section, and charged him with the task of developing a coordinated, decentralized national turfgrass program. Due to his efforts a number of highly trained young men now occupy important positions in the turfgrass program across the U. S. In 1945 less than half a dozen agricultural experiment stations had developed a turfgrass program; today over half the stations have an active turfgrass program.

"CHAMP" SPIKE LESSENS BREAKAGE

The "Champ" all-hardened steel replaceable spike, with its tough non-break-apart construction, has completely eliminated the trying problem of lost or broken washers or bases, according to its makers, MacNeill Engineering Co., Waltham, Mass. MacNeill engineers also state that the "Champ" spike gives the golfer 25 per cent more gripping surface for better traction and swinging foundation.

"BREAK 90" GLOVE IS NEW CHAMPION PRODUCT

A new golfing glove, the "Break 90", is now being marketed by the Champion Glove Mfg. Co., Des Moines, Ia. Company officials say the new type of glove has a "built-in resistor" which controls the movements of the left wrist in golfing; that it has enabled average golfers to slash as much as 10 strokes off their score in actual tests.

The "Break 90" glove keeps the golfer's left hand and wrist firm and straight. It is scientifically designed to allow hands and wrists to swing into proper position at the top of the backswing and keeps the left hand firm through the follow through. In addition, the resistor keeps the left hand in correct position for accurate putting. The glove is available in both men's and women's sizes.

The glove was developed by professional golfers at Town House Golf Centre Inc., one of the largest golfing schools in New York.

NOVAK'S "GOLF GENIE" SCORES BIG HIT AS GOLF TEACHING AID

Few, if any, golf teaching devices have so quickly and broadly won the interest and use of players and pros alike as Joe Novak's new "Golf Genie" judging from orders and users' comments since the device was introduced last November. Novak, honorary pres. of the PGA, and author of the highly successful "Par Golf in Eight Steps" is one of golf's soundest and most highly regarded instructors.

As Novak relates the story of the "Golf Genie", "I reasoned that if visual impression was nature's own way of teaching us, why not employ nature's method in teaching golf. So, I started to develop the 'Golf Genie' on nature's fundamental law that a clear mental picture is the basis of all physical performances. By seeing the correct swing over and over it becomes part of..."

your thinking and reflexes. Observation comes first, then imitation followed by the subtle modifications of our subconscious minds in adapting basic principles to our individual requirements.

"The Viewer,' which is part of the 'Golf Genie' is designed so that players learn by visual impression. I realized the conventional movie projector was too expensive, bulky and required too much preparation to en-

Joe Novak stops film in "Golf Genie" to show pupil detail of swing causing trouble.

courage the spontaneous, frequent viewings essential for the most productive results. So, the Viewer was made pocket size to be conveniently carried anywhere, thus encouraging frequent use at home, the office or club, with no batteries or electrical connections needed.

"Hand operation regulates film at any speed, even freezing a still picture for detailed study at any phase of the swing. Each 50 ft. reel has about 4,000 pictures. Our film library of 'Golf Stars in Action' leads off with Sam Snead, whose perfect swing is on the film currently being furnished with the 'Golf Genie', and later films will feature Mangrum, Middlecoff, Burke, Boros, Bolt, Harrison, Worsham and many other tournament stars. Also in preparation is a film based on my own instruction method, reduced to an 8-step formula presented in my first book, which depicts the principles of attaining power through the body and direction of the hands. The film will be ready for the release shortly, of my new book, 'How to Put Power and Direction in Your Golf'.

"By taking your Viewer along when taking a lesson from your pro it will enable him to illustrate details by pointing them out in Snead's swing or your own."

Complete information on the "Golf Genie" may be had from Joe Novak Enterprises, P.O. Box A-6, Los Angeles 24, Calif.
