Tidewater organization... Larson and Leo Kernan, pro at Princess Anne G&CC, Virginia Beach, disclaim any intention of starting arguments with pros of other sections but boldly assert the Tidewater women golfers are most beautiful and most smartly sports-dressed group of women golfers anywhere in U.S. ... Blind bogey events at Cavalier on women's days have great variety of contests to spread prizes around... Beginners have putting contests... Smooth, uniformly cut putting-green surfaces are the result of mowing with roller-type green mowers. This same desirable quality can be had in your fairways by using Roseman Hollow-Roller-Drive Gang Mowers.

LOWER LABOR COSTS
Roseman Mowers mow faster, more uniformly without kicking up in the rear. Less time required to mow. Roller design permits overhang of traps—slow, costly hand trimming eliminated. No protruding side wheels permits close cutting, eliminates fringe around trees. Narrower overall width permits mowing in tight places.

Exclusive non-breakable side frames for greater reliability. Bedknife and cutting reel steel precision tempered and riveted—not welded—to avoid hard spots and breakage—used throughout. Timken adjustable reel bearings, new hand reel adjustment requiring no tools and new lap-in feature for greater convenience.

NOW! Get Better, Longer Lasting Relief from Soil Compaction with Krilium® for $3.00 or Less a Green

Where conditions prohibit rebuilding of greens low-cost treatment with KRILILUM can relieve surface soil compaction for an entire summer.

First, you aerify. Then you top-dress with your regular top-dressing treated with KRILILUM Soil Conditioner, or even your native soil treated with KRILILUM. Your carefully prepared top-dressing normally would soon start to compact. KRILILUM keeps it loose, crumbly, porous all summer long. Your cost? About $3.00 per green for KRILILUM.

Courses from Oregon to New York, from Minnesota to Tennessee, are using KRILILUM to relieve soil compaction with these proved results:

1. Run-off and standing water from rain or watering stopped or greatly reduced.
2. Fast infiltration of water to root zone.
4. Turf more resistant to summer heat and drouth.
5. More efficient use of fertilizer.

KRILILUM helps maintain Bermuda Grass Greens
Where the prevailing top-dressing method for Bermuda grass greens is to cut, rake, and top-dress with a high sand-content soil, sooner or later layering makes complete rebuilding necessary. By using a top-dressing of your regular soil, treated with KRILILUM, you improve infiltration, remove the cause of layering, and build up soil of permanent value.

Building New Greens—Rebuilding Old Greens—with KRILILUM
Healthy, well-drained greens with lower maintenance costs can be yours when you build new greens or rebuild old ones with soil treated with KRILILUM. For complete details on KRILILUM for golf courses, write today to MONSANTO CHEMICAL COMPANY, Merchandising Division, 800 N. Twelfth Street, St. Louis 1, Missouri.
