and you'll buy ROSEMAN GANG MOWERS - - - - Every Time

Why Roseman
High mowing costs, wasted man hours and excessive repair bills are not found in gang mowers of Roseman design and quality.

Save on Repairs
Exclusive non-breakable malleable side frames and bed knife shoes. Tough chrome-nickel alloy steel heavy duty reels with riveted blades—not welded—to avoid hard spots and breakage. Timken adjustable bearings. Vanadium steel bed knives. All assure faithful service for many years with almost non-existent repair bills.

Save on Labor
Exclusive ability of Roseman hollow-roller-drive gang mowers to overhang traps and shrubbery beds and cut close to fences and structures eliminates the need for much hand trimming. Hundreds of man hours can be saved or devoted to other tasks.

Save on Time
Roseman mowers are rear drive mowers. They mow faster, more uniformly without kicking up the rear. Faster mowing with considerable savings in time and man hours are the result. To say nothing of smoother cut fairways.

Save on Equipment
Roseman mowers, with combination rough and fairway hitch can be used to mow areas quickly and at less cost. No need for the smaller club to buy an additional gang of rough mowers. Just flip the mowers into high cutting position. Also useful where grass on rain flooded fairways "gets away."

Compare 'em all
You are invited to compare the Roseman mower with any other mower. Be sure and compare Roseman quality, design features, low upkeep costs, and performance. We believe that you, too, will join the swing to Roseman mowers.

MAKE YOUR NEXT GANG ROSEMAN WRITE FOR DETAILS TODAY
25 Min. Versus 4 Hours
Which Do You Choose?

When you're ready to aerify your greens, how much time do you want it to take per green? 25 minutes or 4 hours?

Of course, you want the job to be completed in a few minutes. Fact is, you NEED to have the job done quickly. There just isn't time to spend hours instead of minutes on this all-important part of turfgrass management.

The 5-in-1 Turfgrass Tool

This year golf course superintendents are purchasing West Point's JR model Aerifier in record amounts. They like its speed on the green and between the greens. They also like its ability to be five different turfgrass tools through the use of these West Point attachments: (1) Standard Aerifier Reel, (2) SUPER REEL, (3) Aer-Spike, (4) Roller and (5) Aer-Punch. Consider all the points in favor of the JR and draw your own conclusions. We're sure that you'll then get in touch with your West Point Products distributor.

BENT GRASS STOLONs

- Washington
- Cohasney (C7)
- Congressional (C19)
- Arlington
- Pennlu

Our stolons are true to name, weed and seed free and in vigorous growing condition. As a proof that we know how to keep our strains pure, our present Washington exactly matches that we sold in the 1920s.

A Reliable Source of Supply Since 1920

HIRAM F. GODWIN & SON
The beautiful Lakeside Golf Course, Burbank, Cal. has Transite Pipe throughout its irrigation system.

Transite cuts irrigation costs 5 ways ... keeps courses greener, too!

For all its quality and dependability, Johns-Manville Transite® Pipe is surprisingly economical. It actually reduces irrigation cost in five different ways:

1. **Design Savings** Transite’s interior will not be roughened by tuberculation ... stays factory smooth to assure full water flow. This means you can use smaller diameter, less expensive pipe sizes.

2. **Installation Savings** Transite is lightweight, easily installed. As few as two men can quickly assemble an entire 18-hole system.

3. **Pumping Efficiency** Again Transite’s lasting smooth interior pays off by reducing water turbulence to reduce fuel costs.

4. **Saves Water** Transite’s Ring-Tite® Coupling stays tight for the life of the system.

5. **Minimizes Maintenance** Made of rugged asbestos-cement—Transite cannot rust, resists all forms of corrosion.

The Transite Ring-Tite Coupling saves water loss ... speeds and simplifies installation.

---

**JOHNS-MANVILLE**

Box 14, New York 16, N. Y.

Without obligation send me further information on Transite Pipe for golf course irrigation systems.

This one tool . . . Scarifies, Grades, Spreads, Levels and Finish Rakes. A time, labor and money saver for Golf Courses when remodeling traps, rebuilding tees and greens, and for countless turf maintenance jobs. Prepares a full 7 ft. swath of ground into a perfect, improved seed bed at substantial savings in Tractor operation, man hours and money invested in other equipment. The savings are tremendous.

Write for literature.

Roseman Tractor Equipment Co.
2608 Ridge Road. Evanston, Ill.

Sewgolum, an East Indian golf pro who startled spectators at the British Open this year by hitting excellent shots with a cross-handed grip, recently won the Dutch Open from a pretty good field . . . Bob Rosburg, PGA champion, and Dai Rees, British Ryder Cup captain, play with 10-finger grips . . . Current holders of all other national championships play with the Vardon grip . . . Which absolutely proves about the grip that your putter had better be hot or you won’t win nuttin’.
DESTROY NEXT YEAR'S CRABGRASS NOW!

Tests prove Fall Applications of DI-MET P.C.C. give up to 100% Control of Crabgrass and Poa Annua

Fall applications of Di-Met P.C.C., a granular tri calcium arsonate, prevent emergence of Crabgrass on fairways and greens all Summer long! Because Fall and Winter weathering breaks down P.C.C.'s granules evenly, assures uniform distribution over the entire soil surface.

Wide-spread testing by Experimental Stations, including the U.S. Dept. of Agriculture at Beltsville, Md., shows conclusively that residual Di-Met P.C.C. retains killing potency all season — does not interfere with grass seed planted in the Spring. Applications made last Fall gave 98 to 100% Crabgrass control during the Summer of 1959. New emergence did not develop in mid-Summer.

Fall applications are best for Poa annua control, too. Protected from Poa annua competition, greens fill in to thick, healthy turf quickly. On greens, apply 1/2 indicated rate in 2 treatments, 2 weeks apart. Heavily thatched greens: apply 1/2 indicated rate in Fall. Balance in late Winter or early Spring.

P.C.C. also kills Chickweed, Japanese Beetle Grubs, White Grubs, Sod Webworms, Earthworms. Safe on Bermuda, Bluegrass and Bents. Where fine leaf Fescues predominate, some reduction may occur. When overseeding thin areas, other type grasses are recommended.

SOUTHERN COURSES
If you don't plan to over-seed this Fall, use quick-acting TAT-42 to eradicate Poa annua in Bermuda or Zoysia turf. Several light applications give complete kill in a few weeks. Call your supplier now.

Don't wait. Now is the time to apply Di-Met P.C.C., the proven pre-emergence killer. See your supplier or write for full details.
