20,000 balls an hour. It requires only 12 gals.
of water and operates without pumps. Also, no
special electrical installation is necessary as the
washer operates on a 110-v current. The Best
Bett has a special no-clogging design and its
constant rinsing action prevents dirt from being
ground into balls. The washer is described in
Wittey's catalog that is available upon request.

Recommends Crownvetch for Soil Bed Maintenance

According to Fred V. Grau, soil beds maintained for several years before soil is to be used, could be improved by planting them to a perennial legume such as Pennafield crownvetch. The unmowed cover is said to significantly increase the percentage of water stable aggregates. Recommended rate of seeding crownvetch is...
1 lb. per 1,000 sq. ft. with 1 lb. of rye. Lime, fertilizer and mulch are furnished with the seed by Seaboard Seed Co., 701 S. Front st., Philadelphia 47, and Seaboard in “Seedtown,” Bristol, Ill. Grau ‘discovered’ Penngift in 1935.

New Wilson Sand Wedge

Wilson Sporting Goods Co’s Sandy Andy sand wedge is said to feature a new concept in design. A new, thinner blade slices through and under the top layer of sand to pop the ball up and out of trouble. More weight in the sole is said to keep the blade from turning as it rides through the sand. The club is highly endorsed by Gene Sarazen. It is available at all pro shops.

The Kiltie-Kar, made by Crawford Mfg. Co., Meadville, Pa., has been beefed up to withstand the rigors of hard usage. Horsepower has been stepped up and heavy duty bearings and rear axle have been built in to strengthen the car. The power unit has been made replaceable for easy maintenance. This unit, incidentally, "floats" to reduce vibration to a minimum. This is done through the use of rubber bonded bushings and spring loaded-torsion bar motor mount. The Kiltie-Kar is a two passenger unit. The Crawford firm is interested in setting up sales agencies and distributorships. Inquiries should be sent to Meadville.

SPALDING Golf Almanac
