THE NEW ROYER "SUPERINTENDENT"
takes charge of all your soil processing

Now, for turf maintenance and new construction, a new Royer Shredder, the SUPERINTENDENT, tops them all—in economy, performance and versatility! Even tops the Royer you’re now using. Here’s how. Besides giving you the same dependable features that are in every Royer Shredder, the SUPERINTENDENT adds—

- a large hopper for loading with small tractor buckets
- the choice of a powerful air-cooled engine or power takeoff drive for use with your tractor.
- truck-loading discharge height
- improved blending
- completely automatic trash removal and discharge

You owe it to yourself to check this revolutionary Royer that completely eliminates time consuming and costly manual labor. Do it today. Send for Bulletin S-120 for all of the specs. You’ll find the SUPERINTENDENT is budget-priced.

Further support for teenage credit plans comes from a survey made by Seventeen, a magazine for teenage girls, a few years ago. At that time, 31 per cent of the stores polled had teenage credit plans which were every bit as successful as those for adults. Only three out of every ten requested parental guarantees.

Limit the Account

Shops that extend credit to teenagers usually limit the account balance. Joseph A. White of the International Consumer Credit Association was asked for his recommendations for teenage accounts at pro shops. He suggests "a $60 limit, payable $20 monthly with no service charge. If the account is not paid promptly, add a 1½ per cent late charge and close the account."

The advantages of teenage credit to pro shop customers are many. His own account gives the teenager a sense of pride and responsibility that should encourage him to shop with you. It makes his purchases his business with no need to explain each and every item to his parents at the end of the month.

The question of teenage credit is one to be completely weighed. The final decision must be reached by the pro after consideration of the advantages and pitfalls of such sales, and the reliability of those to whom credit is extended.

brother, Alec, at the Philadelphia Cricket Club.

Al came to America at the age of 18 on the British liner Berengeria. He landed in this country during the Golden Age of Sports when Bobby Jones and others were in their heyday. He was impressed by the skyscrapers of New York and other cities and the beauty of American courses, although he did somewhat miss the heather of his native Scotland.

He lived with his Uncle Jim near North Hills when he first went to work for Alec Duncan. He stayed at Philadelphia Cricket four years, then became assistant to George Sayers at Merion in Ardmore, Pa. This was a time when Joe Valentine, dean
NOW MORE DRIVING POWER IN THE NEW TROJAN 217

All new...all dimensions the same except 1 1/8 inch higher...delivers nearly 40% more capacity...fits most golf cars.

With 217 Ampere Hour capacity this battery is engineered for top performance on the most difficult terrain. It gives more holes of golf...and the reserve capacity reduces deep cycling, adding many months to the battery life.

The new Trojan 217 "Mileage Master," like the "170" and "190," features quarter-turn vent caps that reduce service time 75%. Write for complete details.

of course supts., was transforming Merion into one of the great courses of the world. Al was with Sayers for seven years prior to joining Buck Hill Falls GC in the Pocono resort area of Pennsylvania. He served four years in the Army Air Corps in World War II and came to Gulph Mills after his separation from service.

Prefers to Teach

Although he is busy running the pro shop, with his assistant, Ronnie Astle, and is especially active in the Philadelphia Section of the PGA, Al Keeping devotes as much time as he can to teaching. He says he especially enjoys this phase of the business.

"Of course," he says, "you can’t make a good golfer out of all your students. My aim is to bring their game up to their natural potential. A golf teacher must have patience. He can never get angry at his pupils and never talk down to them. Common sense and human understanding go a long way."

Al says he places most emphasis on the grip and stance.

"Golfers," he says, "can trace 90 per cent of their troubles to one cause: they’re moving their heads. The head must be kept still.

"I tell my players to take aim on a spot at the back of the ball," Keeping continues, "because that is where you’ll hit it. Then keep your head still. Hold your chin in slightly, but don’t hold your head tense.

"A line between your head and the ball forms an axis around which the swing revolves. Picture yourself inside a barrel when you swing, and then rotate your body without touching either side. You wind and unwind during a swing. This automatically takes care of your weight. There isn’t such a thing as shifting your weight.

"If you learn to rotate your body correctly, then everything else in your swing will move naturally. You’ll take the club away from the ball correctly, your wrists will cock and uncock correctly. You’ll come into the ball without swaying and there won’t be a drag anywhere on your swing.

"After impact, when the right shoulder

comes under and through, then your head will move naturally to see the shot.”

**Easier to Teach**

Al Keeping has enjoyed unique success in teaching women and as the result of this work, Gulph Mills can be proud of the accomplishments of five of its ladies’ teams.

“Women are easier to teach,” he says. “They have natural grace and balance. Women will work like hell to be good golfers. Moreover, they are not ashamed to ask questions and learn. A man is inclined to be more self-conscious.”

One of the finest woman golfers he has taught at Gulph Mills is Jeane Slaymaker, who was a great hockey player before taking up golf.

Other pupils at his home club include Willis De La Cour, who is now president; the industrialist, Roger Firestone; William Van Allen, famous architect and also a great tennis player; Charles B. Grace, son of the steel magnate, Eugene Grace; and Jack Dorrance, head of the Campbell Soup Co.

Keeping uses the traditional “soft-sell” approach in his pro shop. Emphasis is on good merchandise and display.

“We do not have a fancy shop,” he says, “but we like to do things with display, keep a good inventory and never use high pressure. I know when people are about ready to buy, but I never push them. Members of the type we have would resent that.”

**Uses Boxes in Club Display**

Keeping also tries to move his merchandise around as much as possible. He does not particularly care for the generally accepted techniques used in displaying clubs, but states that the boxes in which clubs are packed help to make good displays and he leaves the clubs in the boxes.

“The manufacturers,” he says, “have spent a lot of time and money in creating attractive boxes for clubs. Why not make use of them? The coloring, the lettering and other aspects of the boxes, including...
TURFACE® is the soil amendment with a particular difference

Every bag of research-developed TURFACE contains a carefully balanced mixture of particle sizes... from coarse to fine. Reason? Soil needs both. Each particle size has its own special job to do. And, contrary to what you might have heard, soil amendments with uniform-sized particles just don't do as good a job.

The larger TURFACE particles serve to “fracture” soil, opening up small channels through which air, moisture and nutrients flow. The smaller particles form connecting links between the larger particles, setting up a capillary system that carries the moisture evenly throughout the soil. With uniform-sized particles, this network is missing and moisture can’t get through evenly.

Working together, TURFACE particles provide quick dispersion of moisture—plus fast drainage of any excess moisture. And they keep soil loose and friable for better root growth. Result: greener greens, healthier greens all season long. Ask your supplier for TURFACE. TURFACE IS ALSO AVAILABLE IN CANADA... SEE ADDRESS BELOW
REGULATION FIBERGLASS FLAGPOLES

- Flexible  •  Low maintenance
- Lightweight  •  Last for years
- Non-corroding  •  Economical

Available in 5, 6, 7, and 8' lengths.
Up to 12' on request.

Molded fiberglass in permanent white and striped with red or black. Long-lasting metal base and aluminum top assembly secured by galvanized all-tite swivel.

aluminum TEE MARKERS

Made from aluminum alloy for durability and weather resistance. Numbers available, 1 thru 18.

See your local dealer or write for complete catalog.

CONTAINER DEVELOPMENT CORP.
MONROE STREET • WATERTOWN, WISCONSIN

Here is the clubhouse of the Mooring CC, opened in Naples, Fla., in recent weeks. It's a Par 63, 4,100 yards long with nine par 3 and nine par 4 holes. The clubhouse is done in colonial style with car garage to match. Naples, with a population of less than 10,000, boasts of five 18-hole courses.

information about the clubs and shafts, etc. help the prospective buyer decide what is best suited for him."

Al says the business his shop does with women is on the increase and both men and women are paying more attention than ever before to golf course attire.

After 42 years in the game, what are some of Al Keeping's lasting impressions:

"I have met very few people I haven't liked. You meet many fine people in this business — for example, my friend, Tommy Armour. We occasionally exchange teaching techniques. I think he has the greatest command of the English language of any pro I have known. I have played in tournaments with him and although we are at great distances from each other nowadays, we still correspond."

Likes To Teach Kids

To sum up: "I haven't made a fortune out of this business of golf but it has been good to me. One of the great satisfactions is to take a beginner or an average golfer and inspire the student to make the most of his potential."

"I especially like to teach the Juniors. We have a five-week course for about 40 of them, giving individual lessons two afternoons a week.

"We can't all be great golfers, but we can play the game like ladies and gentlemen. It adds to enjoyment of life. You can fairly well judge a man's character by the way he plays golf."
EXCLUSIVE POLYKLAD PLATES make the difference in the KARGO GOLF CAR BATTERY

EXCLUSIVE POLYKLAD PLATES make the difference! An entirely new process, the only major advance in internal battery design during the last decade, encases the plates in a protective polyethylene jacket that provides superior performance in every Kargo Sure Drive battery. Laboratory tests backed by extensive field testing over the past several years, prove the "PolyKlad" plates better withstand the severe conditions of constant vibration and deep cycling that golf car batteries are exposed to in everyday use. This new, exclusive method cushions the plates from shock and because no plate edges are exposed, the danger of internal shorts is eliminated completely. The Kargo battery with "PolyKlad" protection will outperform any conventional type battery because it is especially designed for rugged service under severe conditions.

competition by the USGA in collaboration with the Royal and Ancient and other foreign amateur golf governing bodies . . . What's been wrong with the USGA's promotion of international golf competition we cannot imagine . . . What's more we can't imagine why anyone should be so sore at the USGA and so shortsighted to want to halt the happy growth of international amateur golf competition by transferring custody of this department of world sports to the brawling and unfortunately quasi-political status of the Olympic Games.

What's so bad about the International Jaycees' international boy's golf competitions they should be tossed into the Olympic pot? . . . The International Golf Assn., with an executive board of some of America's top businessmen and gentlemen sportsmen, and with Fred Corcoran as tournament director, has built up a magnificent influence for international friendship by working closely with amateur golf associations throughout the world.

The IGA history in international pro golf parallels the performance of the USGA and other national amateur bodies in illustrating that any effort to make international golf competition management just another department of the Olympic games is contrary to the best interests of the game in the U.S. and around the world . . . Now, the American golfer touring the world is welcomed by brothers-in-golf and the programs of the international amateur and pro definitely have accounted for that welcome . . . Why anyone should want to disturb this pleasant situation we cannot figure out.

Pres. Warren Cantrell's report to PGA members on the PGA National IC situation at Palm Beach Gardens, Fla., marks the first time since the PGA got into this mess that the association's dues payers officially have been told much about what's been going on . . . The whole story won't be available until auditors have made their examinations and reports . . . In almost every paragraph of the Cantrell letter is confirmation of the belief of many
