600 RECONDITIONED GOLF CARS

$395 – $450

- New or like new bodies
- New upholstery
- NEW 195 A. H. Batteries
- New cables
- New plugs
- Refinished original 2-tone
- Rebuilt mechanically
- Chargers included
- NEW CAR WARRANTY

Pros & Clubs: This is the Answer!

ADEQUATE CARS AT A SENSIBLE INVESTMENT TO ACCOMMODATE THE BUSY-DAY, WEEKEND OR SEASONAL INCREASE IN PLAY AT YOUR CLUB.

Buy one or a fleet. Payment plan available.

Delivery anywhere on our transports.

Sixth Session

Trees, Electrons and Work Saving Ideas

Tom Leonard, still taking bows for his performance in the Tuesday matinee, conducted the final education program. He introduced the following speakers: Geoffrey S. Cornish, the Fiddler's Green architect, who spoke on course design; Roger J. Thomas, Jacobsen Manufacturing Co. sales manager, whose topic was "Work Smarter — It's Easier;" C. Richard Skogley, associate professor of agronomy at the U. of Rhode Island, who discussed winter play; Arthur C. Drysdale, horticulturist for Sheridan Nurseries, Toronto, Ont., who gave a fine speech on tree selection; and Edward C. Nohava, supt. at Southview CC, West St. Paul, Minn., who told the greenmasters how to make their job easier by putting electronics to work. John J. Spodnik, supt. at Westfield CC, LeRoy, O. and conference co-chairman, summarized the education program.

Tees Being Overbuilt

After giving a brief and interesting summary of early course architecture, in which nature was given pretty much of a free hand and did a commendable job, Geoffrey Cornish described some of the things he thinks should be incorporated in or left out in the design of a golf layout. He has some reservations about the size of present day tees, some of which encompass more than 6,000 square feet. "The back tee areas are seldom used," said Cornish, "even in tournaments. There often is a waste of space here. In most present day building jobs, we are usually struggling to find enough room in which to fit a course, yet many of us have a weakness for overextended tees. I'd rather see part of this space put into traps and greens."

Of tree planting, vitally important in the strategic concept of a golf layout, Cornish had this to say: "It is always function first, and form second. Trees should be used as fairway cutoffs, not barriers. Greens should be surrounded by trees to give the player proper depth.
Why picture the "North End of a Capri Headed South"? Because that's the end Capri fleet operators see the most. The sleek fiberglass styling, the classic foam rubber seats, the vibration-free steering, and "the finest ride on any course" are just some of the features that keep those Capri cars always heading away from the pro shop . . . keep the profits heading your way. The easy maintenance features help keep those Capris on the course day after day, too! Capri offers both electric or gasoline models . . . and the price . . . even with the many deluxe features, Capri cars are still competitively priced.
GOLFTILE Spike RESISTANT INTERLOCKING FLOORING

GOLFTILE is Interlocking high surface - tension rubber flooring with soft inner body which springs to sharp pressures of golf spikes — recovers original shape without cutting or wear.

Approximately ½" thick 24" x 24" squares • Resists abrasion and cutting • Interlocking edges • Choice of colors • Easier to maintain • Top appearance • No cement or mastic required • No special skills required to install • Also available in same material is our GOLF STRIP RUNNERS, 36" width. Send square footage or floor plan for free estimate to attention of:

perception. Trees, however, should be set back at least 65 feet from greens, or maintenance problems are going to be encountered. There probably is a tendency to overplant trees on new courses to fill in that early, barren look.”

Other Cornish observations: Slopes around lakes should be at least one to six feet to permit easy mowing of the surrounding turf; Flare out car path terminals in a bell shape to give more exit area — it’s easier on the surrounding grass; Study the old Scot traps if you’re going to build bunkers. Nature shaped the sand pits on the highland and lowland layouts and was at its architectural best in handling these assignments.

Cut Down on Trimming

Roger Thomas, the onetime Jacobsen troubleshooter who has graduated to a sales manager position with that firm, emphasized that trimming, much of which is done by hand, is the unseen embezzler that dips into the budget appropriation and often manages to bankrupt it.

How is it possible to cut back on the funds that this largely unnecessary operation steals off with each year? Primarily by bringing the ground level flush to such sidewalks and roadways, and by not allowing turf to grow in places where it is out of bounds. Here are some recommendations that Thomas made:

Set out shrubs from buildings and put them in large beds so that it is easy to trim around them; Blacktop under fences and around posts so that vegetation doesn’t encroach in these areas; Spray retaining walls to keep weeds out; Get rid of fruit trees, if possible — they attract vandals and dirty up the course at harvest time; Don’t use logs as parking lot stops because they are dirt catchers.

Thomas also made another suggestion that the supt. undoubtedly will have to explain to his members so that they won’t think the blood that flows to his brain has been shut off: “After floodwater has receded, turn on the sprinklers. The reason: It unclogs the irrigation system.”

Against Winter Play

Dick Skogley, who teaches turf man-
Our business has been picking up for 19 years!

The fastest, gentlest way to pick up golf balls...

Standard Model — $525.00 Delivered*
Three-section retriever. Can be extended to five section unit by using two section "Supertriever" kit.

The FONKEN picker - upper

The Original Range Ball Retriever!

With the new, improved FONKEN Picker-Upper you can retrieve golf balls faster . . . more efficiently . . . at lower cost than by any other means.

Designed with built-in flexibility to meet every change in ground contour, the Picker-Upper retrieves balls under all conditions — even in heavy grass or weeds. Fool-proof 'comb' guides balls into pick-up discs without chafing, bruising or cutting.

THREE SIZES — 3, 9½ and 15 foot spans

Choose the Singletriever, Standard or the Supertriever to fit your needs . . . or add quick-attach Supertriever kit to increase span of present Singletriever or Standard units.

POLYKLAD

PLATES

make the
difference in the

GOLF CAR

BATTERY

An entirely new process, the only major advance in internal battery design during the last decade, encases the plates in a protective polyethylene jacket that provides superior performance in every Kargo Sure Drive battery. This new, exclusive method cushions the plates from shock and because no plate edges are exposed, the danger of internal shorts is eliminated completely. The Kargo battery with "Poly-Klad" protection will out-perform any conventional type battery because it is especially designed for rugged service under severe conditions.

Watch for This

Every golf club in the U.S. is being mailed a form card on which space is provided for names and titles of operating personnel who should receive GOLFDOM. Unless this card is filled out and returned, we cannot mail GOLFDOM to these people.

Our circulation auditing association requires that the list of persons to whom GOLFDOM is mailed be kept up to date. Without this updated information we are instructed to stop mailing the magazine to names on our old list. To make certain that your 1965 officials and operating heads receive GOLFDOM, please fill in the form and mail it today!

If your club failed to receive this card or misplaced it — use the form on page 200.

management at Rhode Island University, repeated some of the things that had been said earlier about winter and early spring play, but he added this thought: In most cases when golfers want to rush the season, alternate freezing and thawing is going on. Necessary soil granulation is taking place then and if it is disrupted, serious compaction problems that may persist through the season, can be induced.

Turf, Skogley continued, is particularly vulnerable when it is coming out of the dormant stage. Grass blades are more easily bruised at this time than any other. Turf attrition can be extensive in the transition period between winter and spring because the grass is struggling at this moment for a firm roothold, and it needs this traffic-free interval in which to become solidly re-established. Probably most important, it shouldn't be forgotten that the turf has undergone some degree of winter damage and it needs a warming period in which to recuperate without being subjected to heavy traffic.

Use Wider Variety

Arthur C. Drysdale, the Canadian horticulturist, used slides almost exclusively in describing the panoply of firs and pines and deciduous trees that are available for golf course planting. He noted in passing that supts. and others connected with club tree planting programs generally don't use too much imagination in their selec-

Performance Chargers by Mac!

Here's the complete line of battery chargers... latest designs and features backed by 18 years of quality production.

**Model 500**
Two Rate Charging with Transistorized Relay

**Model 1500**
Single-Rate Charging with Ferro-Resonant Type transformer. Excellent regulating characteristics plus high efficiency and power factor. The DC output current will vary less than 10% with a change in the AC line voltage of 5%. This is a convection cooled Charger.

**Model 750**
Single Rate Taper Type

These and other MAC Battery Chargers are available for immediate delivery... in plenty of time for full season protection. Send for bulletin showing all models and details of outstanding MAC features.

Hold Public Course Seminar at GCSA Convention

A public course seminar, conducted by Rex McMorris, executive director of the National Golf Foundation, was held in conjunction with the GCSA convention.

Speakers included Joe Duich of Pennsylvania State University, William Gallagher, Glen Ellyn, Ill., village administrator, Herb Davis, Omaha, Neb., golf course owner, R. E. Watson, Benjamin Lewis Co., Chicago, and Bill Lyons, owner of a course in Canal Fulton, O.

An article covering the seminar will appear in the April issue of Golfdom.

tions, mainly because they restrict themselves to too few varieties.

From the evergreen family, Drysdale recommended these species: Silver fir in preference to blue spruce; common cedar for hedges; junipers for the clubhouse area; Norway and Serbian spruce; Austrian and Ponderosa pine; and possibly the Don redwood, a deciduous evergreen originally imported from China, which is fast growing but nevertheless hardy.

Drysdale suggested that supt's. might be better off to avoid planting these species: White pines, which must be frequently pruned for relatively luxurious growth; Hemlocks in areas north of the Great Lakes; and Douglas fir, fairly susceptible to disease.

Deciduous Tree List

As for deciduous varieties, Drysdale offered a rather bewildering number. He classified them as to species that should be planted on the course, and those that probably should be confined to the clubhouse area. His list of recommended course trees include: Norway maple, of which there are several varieties; Crimson King; Sugar maple, for its beautiful fall coloring; Birch; Purple beech; Gingho, ShadeMaster and Sunburst locusts, both new species; Pyramidal oak; Laurel and Linden. Not recommended: Silver maple; Horse Chestnut; Sycamore and Weeping Willow.

Low growing trees, recommended for...
PROTECT YOUR TURF INVESTMENT! with PANOGEN Turf Fungicide.
Don't allow ugly turf-destroying fungus to ruin your greens and fairways—spray
with Panogen Turf Fungicide. Left unchecked, fungal disease spots can destroy
vital root systems, spread and kill off large areas of turf.

Panogen Turf Fungicide is a broad-spectrum liquid fungicide which can prevent
or control fungal diseases without harming the grass itself. Panogen Turf Fungicide
is a true liquid and requires no agitation during application. Economical too: Treat-
m ents cost but pennies per thousand square feet. Compared to the high cost of
reseeding, Panogen Turf Fungicide is the best turf insurance you can buy.

RAKE-Ezee SAND TRAP RAKE

Sturdy, attractive, won't rust, yet low in cost. The Rake-Ezee is fully guaranteed to give satisfactory service under normal use. Tough plastic head available in 14" and 22" sizes. See your distributor, or write.

MFD. BY NORTHERN CENTRAL Plastics INCORPORATED

The bright, yellow-handled RAKE-Ezee Rake flags attention, reminds golfers to rake trap. Stands erect on blunt metal point.

the clubhouse grounds, include: Amaranth, which flowers for a short time and is quite disease resistant; Yellow wood, which gives heavy shade; Hawthorn; Russian Olive; Flowering crab; and Weeping mulberry, a vinelike shrub.

Slave to the Electron

The final speaker on the four-day program was Ed Nohava, who was educated to be a radio and TV technician, but succumbed to the lure of turf after moonlighting for a year on a golf course. Appropriately, Ed's thesis was that a supt. is a slave to the electron.

"You can't get through the day," said Nohava, "without depending on that infinitesimal particle of negative electricity to do at least a dozen jobs for you. At the course it works for me in the burglar alarm system, two-way radio, intercom, public address system and even in a Bullhorn. I have a moisture sensor and use an electronic pH meter. Underground pipes are located with a mine detector and out in the garage we have an electronic ignition analyzer and several other gadgets that are electronically activated.

"After work, I use an electronic lure when I go fishing," Nohava continued, "but they almost ruled me off the job when I told them I had an idea for developing an electronic putter. One of these winters I plan to wear electronic underwear that I have had in mind to design for a long time. I'm so completely addicted to the electron that I might as well start wearing it next to my skin."

Mrs. Vare Gets Jones Award

Mrs. Edwin Vare, Jr., Bryn Mawr, Pa., the former Glenna Collett, was named the 1965 winner of the USGA's Bob Jones award. She received the citation at the USGA's annual meeting in New York from Philip H. Strubing, chairman of the Jones award committee. Mrs. Vare won six Women's Amateur championships and twice was the runner-up.

Chicago Lighting Institute, 140 S. Dearborn st., Chicago, will conduct a golf course lighting clinic in its offices on Apr. 12 from 1:30 to 4 p.m. The registration fee is $3.50.
