The tournament was brilliant and successful. Everyone agreed that some spectacular and costly advertising program caused this tremendous success. Everyone, but the Club Manager... who stood modestly, almost anonymously, in the background. He knew he had beaten the 'pros' by using the new Gestetner Duplicating Processes to solve his communication problems.

Watch for This
Every golf club in the U.S. is being mailed a form card on which space is provided for names and titles of operating personnel who should receive GOLFDOM. Unless this card is filled out and returned, we cannot mail GOLFDOM to these people.

Our circulation auditing association requires that the list of persons to whom GOLFDOM is mailed be kept up to date. Without this updated information we are instructed to stop mailing the magazine to names on our old list. To make certain that your 1965 officials and operating heads receive GOLFDOM, please fill in the form and mail it today!
If you club failed to receive this card or misplaced it — use the form on page 160.

"Quiet" Kohler Engines
play round after round
without rest—or recharge

Kohler-powered golf cars never take time out to get their "batteries charged." They keep running, two, three, four rounds a day, seven days a week, as long as there are players to use them. Maintenance is minimum, profit maximum.

Kohler proves that gasoline engines need not be noisy. Quietness is built into Kohler engines with the famous cast iron block to cut vibration noise. Plasticized blower housings and non-metallic cam shaft gears, plus low idling speeds keep noise down to a polite purr. Keep your golf cars rolling and profitable with Kohler "quiet engines."
