In Automatic Irrigation

*Larchmont* is my best friend!

He does his job so well that each time I’m hit I land on lush green turf.

*Larchmont* must be doing something right when:

- We are recommended by the world’s best architects.
- We don’t have any salesmen, only qualified engineers.
- You will find Larchmont on the world’s best courses-large or small.
- We can convert your present manual system to automatic.
- Our installations are so good because they are engineered by the best men in the industry. Only tested and proven materials are used.

*Larchmont* IS THE "DECISION WITHOUT A DOUBT."

great show. Thus, the G.C.S.A.A. International Conference with some 2,000 in attendance is important to golf course economy turfwise.

This year, “The Greatest Show on Turf” was scheduled to be held in Kansas City, February 13-18. In addition to the latest and best of material displays, the educational part of this show should be second to none. Leading turf scientists and superintendents from everywhere will report on turf developments.

Last year’s conference ended on a sad note. Mr. R. E. (Red) Lambert passed on shortly after returning home from Cleveland. Red was one of the unsung heroes of the superintendent’s profession. He served as president, but was best known to the informed as comptroller. Red, possibly more than anyone, assured financial stability in the G.C.S.A.A.

LINDIG for your particular Shredding and Screening* Jobs

BIG, LITTLE AND IN-BETWEEN

K-10 Shredder-Elevator and Screener for hand shovel feed.

B Models, like their big brothers, pass materials (wet or dry) through a synchronized dual assembly for instant action and complete shredding, aerating and mixing. Screener attachment, using shredder's power, is available.

-- Screen attachment optional — removes debris from shredded material.

CL Models provide the complete high-volume processing plant — three size capacities 75, 100, and over 200 cubic yards per hour. Load directly into truck.

The Lindig "D" — Two sizes available (20 or 15 yards per hour). High volume and high discharge level. Use inside or out — tractor bucket feed.

I Models with belt conveyors load shredded materials directly into trucks or direct to storage areas. Three sizes (25, 40 or 60 cubic yard capacity).

All around it's LINDIG, the complete line with Use-Versatility for top soil suppliers, nurserymen, florists, municipalities, golf course superintendents, park and landscape people, universities, peat processors, mushroom growers...you name it, there's a LINDIG model to fit your purposes.

All LINDIG equipment features exclusive hammermill action — users benefit with quality production and with time and labor savings. Most models have optional screener attachment for preparation of stone-free materials for top dressing, fine seeding, packing, etc.

LINDIG equipment's use-flexibility is such that it processes soil materials wet or dry, manure, peat moss, sludge cake, compost — cinders and rock salt, too. Used around the world, LINDIG equipment is exported and preferred wherever superior, economical processing is required.

1965 will be remembered as the retirement year for past G.C.S.A.A. Superintendents, Carl Bretzlaff, Mal Maclaren and Chet Mendenhall. All admirably represented top clubs in Indianapolis, Cleveland and Kansas City, respectively.

1966 should be the most promising golf year of all. The economy is booming. Private clubs will have more money, thanks to tax cuts. New U.S.G.A. rules should speed play and golfers will have more leisure time to enjoy their game. The golf course superintendent will have trouble hiring decent labor. The golfing reader can also expect floods, tornadoes, ice storms, weird new diseases, bugs and sticky weather to again kill turf. Wherever this happens, the superintendent needs and deserves sympathy rather than recriminations. No one has done more to match turf playing qualities to the golfer’s enjoyment of his game.

with other successful clubs. He was moved from PGA treasurer to the secretary spot in the annual election. Fraser, in his club executive and advisory work, is one of the most adroit publicists in golf business.

Warren Orlick, pro at the Tam o’ Shanter C.C., Orchard Lake, Mich., not only is one of the leading club pro businessmen but has developed many assistants. They have graduated into jobs of their own and demonstrate what Orlick and the Orchard Lake club officials and members maintain: “What’s good for our pro is better for our club.” Orlick’s officials include many of Detroit’s highly successful businessmen. As a rules authority Orlick was instrumental in bringing the PGA together with the USGA in a uniform code.

Newly elected VPs and members of the PGA Executive committee are William Clarke, Hillendale C.C., Phoenix, Md.; Marty Lyons, Llanerch C.C., Havertown, Pa.; Wendell Ross, Pequot G.C., Stonington, Conn., and Jim Rudolph, National Cash Register C.C., Dayton, O. Each in his value to his members outranks by far any of the well publicized and affluent tournament stars. But how to get these club pros publicity that reminds golfers of the pro’s service is a problem the PGA does not attempt to solve with annual meeting news.

H. Franklin (Bud) Waltz, Toledo, was elected chairman of the PGA Advisory Committee, Richard Irwin of Chicago, the committee’s vice chairman and Curtis Person, Memphis, secretary. The Advisory Committee passed resolutions lamenting the death of two members, Harry Radix and Glenn Sisler, then got tongue-tied like other PGA committees. PGA Advisory Committee members, well acquainted with the USGA manner of handling committee reports, financial statements, general session, awards and release of news at annual meetings, know an area in which the PGA needs plenty of advice.

A meeting of the tournament sponsors organization held at Palm Beach Towers during the PGA annual gathering elected Marshall Dann, executive secretary of the Western GA, the sponsors’ head officer. This conclave also maintained the PGA atmosphere of secrecy. There is a pretty fair hunch that the sponsors are going to demand and get a larger dip into the TV gravy.

From publicity officially approved for release about the PGA annual meeting it is plain that the association should never be scolded for failure to give the tournament players primary attention. Dates for PGA championships, plans for the National Four-Ball event, unnamed items of business acted on by the Tournament Committee headed by Tommy Jacobs, agreement with the USGA flagstick rule and optional rules to speed play and announcement of a fine of $25 for throwing a ball into the gallery were publicized. None of them meant a thing to members of clubs and pay-play courses for which PGA members work.

The Educational Session was headlined by an intensely informative talk with slides by golf architect Robert Trent Jones. Jones, with the assistance of his aide Harvey Raynor, showed and commented on golf course design of the penal type (such as Pine Valley), the strategic type (such as Augusta National and St. Andrews old course) and the “heroic,” a combination of penal and strategic, such as Oakmont and the championship courses at Merion and Baltusrol.

Dr. Pete Zidnak, Professor of Business at San Jose (Calif.) State College, gave a helpful talk on the pro’s speaking as a

PRO SHOP
Continued from page 54
vious fall which has the added lure of immediate wear.

The second sale should be held in April when you can dispose of most of the merchandise left over from the previous fall in addition to spring and summer items that failed to move in the previous August’s sale. The theory of immediate wearability also applies here.

No pro shop should have a continuous sale, especially at a private country club. The highest quality sportswear or equipment in the way of balls, clubs, etc., should never be put on sale. However, there are many changes in balls, bags and other equipment yearly and exceptions can be made for these in planning the August-through-Labor Day sales. Clearance of the older equipment will attract the “shoppers” in every club.

But let’s rejoin the ladies. Nineteen of our 20 biggest volume pro shop apparel accounts have a saleslady on the floor.

Southern California and Florida are the big volume spots sectionally in pro
shop apparel sales. Both sections are fully active in timely sales. Their results prove that the reduced-price clearance of season's-end stock gives you the wherewithal to buy new-style stock in depth for prime selling time.

The latest thinking by golf professionals is a definite narrowing down of the lines they carry. The successful pro shop today handles far fewer lines than in the past. The pros have learned the hard way that certain lines sell best. In the past, unfortunately, they did not buy enough of these brands but weakened themselves by purchasing unproven apparel. This created another problem: too few of the proper sizes in the shop because of the habit of buying any line "in the middle."

In other words, pros ended up in the ladies' business in sizes 12 and 14 and had nothing smaller or larger on the shelf. The shoes were always 9's and 10's and the great strength in selling by having the proper size in stock was completely lost. This is against all concepts of good merchandising.

Think strongly about what I have said
concerning where a golf professional’s
time should be spent. You will be com-
pletely respected by your membership
when you reveal yourself as an executive
with organizational talent. Remain the
top man in taking care of the member-
ship’s demands for which you were hired
—giving lessons, taking care of all golfing
problems, furthering your congenial re-
lationship with members by spending
more time at the first tee. Delegate the
duties of apparel merchandising in the
pro shop to the person who can make it
a solid success—a high-grade saleslady.
Keep hiring promising assistants; put
them in charge of starting, handling the
overflow of lessons and especially in the
promotion of junior golf under your di-
rection.

Remember, a woman is no mystery to
another woman when it comes to the
buying and selling of sports or any other
kind of apparel. Cherchez your femme.
public relations and educational activity. Zidnak, an advisor to the Northern California PGA, gave PGA officials a lesson in how to handle publicity by having passed around copies of the “outline of ideas” presented by his talk.

Harry Eckhoff, Executive Director of the National Golf Foundation, and an ex-army public information officer, talked on the “National Golf Foundation; its purpose and programs,” and passed around copies of his talk to give the PGA an idea of how to get publicity.

The teaching section of the PGA’s “Educational” day was about as usual. Dave Marr, PGA champion, and a lad brought up in golf business, starting as a professional’s son, told of his methods. Earl Stewart, still a nearly great player and an extraordinary good teacher, commented on technique and, when Stewart’s talking about teaching, somebody’s sure to learn. The elderly Wilf Reid, a survivor of competitions with Vardon, Taylor and Ray and a contestant in the

**STOP BALL MARKS ON GREENS**

**DIVOT FIXER**

Let’s see what punishment the greens must take. 20,000 rounds of golf means 20,000 shot to each green.

If 10% hit the greens it would mean 2,000 holes per green each year.

Repairing these holes an hour later or next day is useless. The damaged turf must be repaired at once to avoid a hole and brown spot.

Make your own test. Just try to repair an old ball mark. Then a new one.

Our little Divot-fixer tool can help you solve this problem.

1913 National Open that Ouimet won, got into the teaching act with sprightly observations on ways and means. Byron Nelson, captain of the victorious 1965 Ryder Cup team, and Vic Ghezzi, voted into the PGA Hall of Fame recently, were booked for the session but didn’t show.

There is much opportunity for this teaching session producing PGA publicity that would interest millions of golfers. The program is open to the public so the PGA, in this case, doesn’t discourage publicity. But the pattern of the session was stale stuff when Old Tom Morris was a championship threat.

“Hubby” Habjan, winner of the PGA’s Club Pro of the Year award, spoke at the open session. Hubby is an intelligent and personable young man who is professional at the fashionable old Onewentsia Club at Lake Forest, Ill. He is so successful as a pro businessman he makes and sells 2,600 of his own name clubs in his shop a year as well as many of standard brands. He is an excellent player and a remarkably good teacher.

LIQUID-LUSTRE
GOLF BALL WASH
Costs as little as 2¢ per washer per week!

- Keeps golf balls SPARKLING WHITE! . . . Golfers satisfied!
- Perfectly safe for washers . . . either hard or soft water!
- Will NOT cause RUSTING!
- No unpleasant odor—Ever!
- Used at fine golf courses from coast to coast!
