Lee Freeman is a construction superintendent who specializes in golf course irrigation systems, and has used various kinds of pipe in courses throughout the country and in the Caribbean. "Certain-teed pipe is easy to work with and absolutely dependable. I've used it in the Catskills, in 35-below-zero weather, and in the Deep South, with 100-degree heat. Under all conditions, including swamps — rocks — clay, Certain-teed pipe outperforms any other kind."

Ready to go when you are

Hudson Peerless* power sprayers are "at ready" all the time—on the course, or in storage.

Two features almost eliminate downtime caused by stoppages from clogged nozzles, inoperative or sluggish pump:

1. Nickel stainless steel-clad tank—won't rust, corrode or scale. Flushes out clean, too.

It's a husky worker. Sprays up to 30 feet of fairway at a pass. Reaches high into dense trees. Just right for feeding or "blowing" greens for grubs.

You can get a complete line of accessories—booms up to 30 feet, any length hoses for gun attachments, tandem wheels with soft tires so easy on turf. Models up to 300 gallons capacity.

Write us for full details.
