Keep on-the-go in tight spots with Ford 120. No stopping—no clutching!

Tight spots are “go” spots with Ford 120 tractor. Ford gives you instant maneuverability, without stopping, without clutching. Saves you time. Cuts your job costs. Just move a lever forward up to 6.75 mph, reverse to as much as 3 mph at the speeds you want. 12 hp engine keeps right on running at constant speed. Power-driven equipment stays at peak capacity. Ford attachments save you time year-round. Snow blower. Dozer blade. Gang reel mowers for 5 through 8 foot swaths. 36, 42, and 48 inch rotary mowers. See Ford 120 tractor soon at your Ford tractor dealer. He's in the Yellow Pages. Ford Tractor Division, 2500 East Maple Road, Birmingham, Michigan 48012.

Nine out of ten of the nation's leading golf courses are using Buckner Sprinklers. Why? Because they know about the money, water and labor savings that are possible with a Buckner irrigation system. Buckner systems are designed for heavy duty, long lasting, low cost, low maintenance operation. Our sprinklers are engineered to provide the best effective coverage and penetration of water even in the tightest soil. Whether you use one of our underground or portable systems, you can be sure of eliminating parched areas and water waste. And our new 11 station 611-E automatic controller cuts scheduling to a simple, one-time 5 minute operation. For more facts you should know about the world's leading sprinkler systems, write for free catalog and name of nearest dealer.
David L. Hill has been promoted to general marketing manager of Bolens Division, FMC Corporation, Port Washington, Wisconsin.

R. F. Lafferty has been appointed president of consumer products div of Brunswick Corp. He will be responsible for the sale of MacGregor, Union Hardware, Zebco and Red Head sporting goods products.

Ferrule for golf club grips
Recommended by Jackson Bradley

PUTS A "FACTORY LOOK"
INSTANTLY ON A REPLACED GRIP

Anyone can install in seconds—no skill or experience required. The only ferrule that stretches intact over the large end of a bare shaft and returns to shape.

Made of good-looking, thoroughly baked black vinyl, the Grip-Gard Sleeve removes forever the problem of wrinkled tapes and jagged ends when replacing golf club grips. Its taper is specially designed to fit the shaft and grip of any iron or wood. No glue required.

Inexpensive to buy, easy to install—builds customer good will. Grip-Gard Sleeves have been used on thousands of repaired golf club grips by some of the largest golf repair shops in the country.

we figured out all the angles, then we made the Golden Ram

There's a bagful of stroke-saving angles built into the Golden Ram. For example, irons have "Sole-Support"—an extra-wide flange that puts head-weight at the very bottom of the blade to let you get under and through the ball smoothly (a Golden Ram 5-iron looks similar to the 9 in your bag). This flange has a contour roll front-to-back and side-to-side—less metal to meet turf for cleaner shots, smaller divots. Golden Ram woods are sole-contoured like the irons for improved fairway play; double cycolac face inserts eliminate exposed screws, give solid smack at impact. XPD-100 shafts are fully flexed with 14 steps on the driver. Golden Rams are custom-made to meet your exacting specifications. But, if your customer has an average build, Golden Ram in standard shaft length is available from stock in your choice of two swingweights—all the playing features at substantially less cost.

YOUR SECRET WEAPON THIS SEASON
Ram golf balls with the Nylon XPD center. A great breed of ball in 95 and 85 compression. Test drive one.

Lee Freeman is a construction superintendent who specializes in golf course irrigation systems, and has used various kinds of pipe in courses throughout the country and in the Caribbean. "Certain-teed pipe is easy to work with and absolutely dependable. I've used it in the Catskills, in 35-below-zero weather, and in the Deep South, with 100 degree heat. Under all conditions, including swamps, rocks and clay, Certain-teed pipe outperforms any other kind."

Write for new film on golf course irrigation. Full color movie shows how modern courses "beat the drought." "Advice from turf and sports authorities; details of installation. Film title: THE GRASS IS ALWAYS GREENER.

Rain Bird makes many more products for sprinkler systems than the familiar heads, you know. Like our new RC-8 Rain-Clox electronic controller—the brain that tells the Birds when to water. Reliability is one of its most important features.

Here are more: Dual program—6 lawn stations, 2 shrub, 14-day cycle. Any station can be eliminated from a cycle before the regular day is due and you can water any individual station out of the cycle the same way. Two mountings: wall or pedestal.

This bird saves labor costs—and landscaping, because the amount of watering is not controlled by unskilled labor. And the Rain Clox is smartly styled—winner of industrial design awards.

Your Rain Bird distributor has more information.

Or write us: Rain Bird, Glendora, California 91740 (in the West); or Rainy Sprinkler Sales, Division L. R. Nelson Manufacturing Company Inc., West Pioneer Parkway, Peoria, Illinois (in the East and Midwest).
GRAU'S ANSWERS

sports needs cultivation to break the crust, to let air circulate and to let seed reach the soil.

Fertilizing — To do justice to this subject would be to write a book. Essentially there are three regimes or programs:

1) The hand-to-mouth inorganic program which builds no reserve and demands frequent light applications to avoid damage and to simulate steady feeding;

2) The natural organic concept which, in cool weather, needs to be supplemented with quick-acting materials since bacteria which decompose these organics are sluggish in cool weather;

3) The ureaform program which builds maximum reserves and carryover which starts grass strongly and naturally in spring thus eliminating decisions such as, “Shall I fertilize early and push the Poa or wait ’til the Poa has seeded?”

In actual practice many superintendents develop a combination program using the best features of all three regimes, tailored to their needs.

When buying a fertilizer mixture do
