**Step 2**

USS VERTAGREEN Professional Turf Program

**Vertagreen**...the professional fertilizer for professional turf

USS Turf Specialists are just that...turf professionals. And it naturally follows that the fertilizers that they recommend are professional products. VERTAGREEN turf foods are professionals. Each one has a particular specialty. VERTAGREEN Tee Green. VERTAGREEN Tournament for fairways. VERTAGREEN Weed and Feed for Professional Turf. And VERTAGREEN's superior grass-growing nutrients act quickly to provide steady, healthy growth...the kind of turf that stands up to heavy play...beautifully.

Tee-Green Technical Turf Food is formulated specifically for proper fertilization of golf course greens, tees, and aprons in the desirable 4-1-2 ratio with half of the available N. derived from Urea-Formaldehyde to achieve controlled and long lasting nutrition. Also contains guaranteed, formulated amounts of calcium, magnesium, sulfur, copper, iron, and zinc.

Vertanite is a long-feeding, slow-acting nitrogen fertilizer derived from Urea-Formaldehyde. The uniformity of this granular plant food makes it ideal for use on greens, tees and fairways.

Tournament Plus is a long-feeding, controlled-release granulated fairway fertilizer in a 3-1-2 ratio. 25% of the nitrogen content of Tournament Plus is derived from Urea-Formaldehyde. Also contains guaranteed, formulated amounts of important calcium, magnesium, sulfur, copper, iron, and zinc.

VERTAGREEN is "the" professional weed and feed for turf. Contains famous BALAN for effective control of poa-annua and crabgrass. And it's combined with 12-4-8 VERTAGREEN to provide full feeding. Balan™ is the trademark for Benefin. Elanco Products Company, a Division of Eli Lilly and Company.

VERTAGREEN for Professional Turf is manufactured in your part of the country to meet specific nutritional requirements. Your VERTAGREEN representative will recommend the specific grade for special conditions.

USS, VERTAGREEN, and VERTAGARD are registered Trademarks.
Step 3

USS VERTAGREEN Professional Turf Program

Vertagard...the "protector" of professional turf

The greatest professional challenge to you as a course superintendent is the efficient control of weeds, fungi, and destructive insects. VERTAGARD Turf Protection Chemicals are the best in the business.

Vertagard Herbicides

"Vertagard" MCPP
Active Ingredients:
Potassium Salt of MCPP—2-1/2 lbs/gal.
Vertagard MCPP is specifically adapted for safe use on sensitive grasses such as used on golf greens and fairways. Bent greens and fairways are quite safe when Vertagard MCPP is used at the correct rate of application for the control of chickweed, clover, plantain, and knotweed.

"Vertagard" MCPP/2,4-D
Active Ingredients:
Diethanolamine salt of MCPP—2 lbs/gal.
Diethanolamine salt of 2,4-D—1 lb/gal.
Vertagard MCPP/2,4-D is a selective weedkiller providing a broad spectrum for control of weeds, including dandelions, clover, chickweed, plantain, lambsquarter, pigweed, knotweed, and many others. It can be applied to turf containing bluegrass, bent grass, fescues, and Bermuda grass that is maintained at fairway cutting height.

"Vertagard" 2,4-D, 4 Lb. Amine
Active Ingredients:
Dimethylamine Salt of 2,4-D
A low volume broad spectrum for use on established turf containing blue grass, fescues, and Bermudas. To control broadleaf weeds such as dandelions, clover, plantain, and creepers like ground ivy, pennywart, and others. Not to be used on bent grasses.

"Vertagard" Betasan 4EC
For Pre-Emergence Crabgrass, Poa-Annuv control. Vertagard Betasan is a selective grass herbicide for use on golf course greens and fairways. It controls smooth crabgrass, hairy crabgrass, goosegrass, poa-anuu, and certain annual broadleaf weeds. It is safe to use on established turf including bent grass, fescues, blue grass, and many others.

"Vertagard" Betasan 12.5% (Granular)

Vertagard Fungicides

"Vertagard" Fore
The ingredients in the formulation effectively control a broad spectrum of turf grass diseases such as fusarium blight, brown patch, dollar spot, and snow mold.

"Vertagard" Thiram-PMA
An especially prepared formulation to prevent and cure some of the more difficult to control turf diseases. 75% Thiram, 3.3% PMA.

"Vertagard" Liquid Cadmium
A turf fungicide especially prepared for the prevention and control of dollar spot, copper spot, and red thread. The cadmium content as cadmium metal (the actual disease control agent) is 12.3%.

"Vertagard" Mercurial Turf Fungicide (Granular)
Active Ingredients:
Mercurous Chloride—1.8%
Mercuric Chloride—0.9%;
Total Mercury 2.2%
A granular mercury, containing turf fungicide for effective and long lasting specific control of snow mold on putting greens and other fine turf. A proven, field tested product; formulated especially for standard spreader application and the superintendent's needs.

"Vertagard" Mercurial Turf Fungicide (WP)
Active Ingredients:
Mercurous Chloride—60%
Mercuric Chloride—30%
Total Mercury Content—73.2%
A wettable powder to be used wet or dry for snow mold and other turf diseases.

"Vertagard" Thiram W.P. 75
For control of brown patch, snow mold and other turf diseases. This product is formulated especially for golf course use.

"Vertagard" PMA 10%
For control and prevention of turf diseases and crabgrass.

Vertagard Insecticides

"Vertagard" Chlordane 8.0 E.C. (Liq)
Active Ingredients:
Technical chlordane (72%)
For control of ants, army worms, chiggers, sod webworms, grasshoppers, and other turf insects.

"Vertagard" Chlordane 25% (Granular)
For control of surface pests such as ants, army worms, chiggers, earwigs, turf moths, or sod webworms.

"Vertagard" Malathion 5 E.C.
For control of flies and mosquitoes, around greens, tees, and clubhouse. Also for control of insects on ornamentals (roses, camellias, chrysanthemums, evergreens, and many other flowers and shrubs).

For great turf in the 70's, call the professional today... your VERTAGREEN Representative. With the VERTAGREEN Professional Turf Program, you're just three steps away from the kind of course any professional would appreciate.
ASK THE EXPERTS
continued from page 88

the cam driven or gear driven sprinkler.
(Rain Bird Sprinkler Mfg. Corp.)

Question: Should control panels be located in the superintendent’s office, in the field or both?
Answer: Control panels should be located in the field so that all areas being controller by the controller, or controllers, can be seen from this location.
(Rain Bird Sprinkler Mfg. Corp.)

Question: Will the system eliminate hose?
Answer: A well-engineering automatic irrigation system on a golf course can eliminate all hose watering, in our opinion.
(L.R. Nelson Mfg. Company, Inc.)

Question: Which is better—double row or single row outlets?
Answer: Whether a single row, double row or full coverage system is desired depends upon geographical location and condition of the specific course.

Single row irrigation is the most economical configuration where width of mowed fairways and wind conditions permit adequate coverage. Sprinklers are spaced at 50 per cent of diameter of throw, which typically is 90 feet.

On double or multiple row systems, triangular spacing is generally used. The triangular spacing method offers more uniform distribution of water and is particularly desirable in windy areas or where dictated by the width of mowed fairways.
(Ethyl Corp.)

Question: Will the automatic system help in solving the unpredictable labor problems?
Answer: An automatic sprinkling system solves the night watering man problem. More important, it provides versatility one cannot get from a manual system. For example, if the golf course is on heavy soil, an automatic system can be set to operate sprinklers for five minutes, once an hour, six times in one night. The same half hour as with the manual system, but what a difference! The water sticks where it lands so the turf grows uniformly, without soft, low spots.

An automatic system is more expensive to buy and to maintain because it is more complex. It takes longer to install and to shake down. Unless a professional designs and installs it, it can be one big headache. The payoff, though, from the right system is beautiful: a key personnel problem is solved and the salary expense cut; much less water is pumped because the system is far more efficient; the course looks and plays better; and, on a new layout, the germination rate improvement saves money and may let the club open for play a season ahead of schedule.
(Skinner Irrigation Company)
NEW TEE MARKERS!

JUST $4.95 EACH!

Colorful Hole Numbers, attractively designed in two exciting styles. On strong 18 gauge steel, with weatherproof baked enamel finish. Just send us your scorecard, with correct yardage, indicate style wanted and we will custom make in just three weeks! Sturdy 51/2' channel posts $1.50 each.

Send check with order and we pay shipping charges.

BUY GIANT-VAC
GET GIANT ECONOMY
GIANT-VAC universal P.T.O. unit converts to
blower, vacuum, thatcher, truck loader . . .

As double headed blower . . . to truck loader in 30 seconds

Exhaust velocities exceeding 250 M.P.H. rapidly clean a large turf area. By flipping one tractor operated lever, the air discharge is changed from left to right allowing constant windrowing regardless of tractor direction. Special features allow converting to a Truck Loader in 30 seconds, as shown.

As vacuum, thatcher and truck loader . . .

Vacuums a 6 foot swath and thatches large acreage at the same time. Truck Loading hose attachments may also be added to this combination. A variety of self-dumping trailers are available.

GIANT-VAC offers a P.T.O. driven power unit which performs many functions. Propelled by a standard tractor, this unit with available accessories is versatile and efficient. It can be operated as a double headed blower, cleaning many acres per hour. Attachments are available which convert the Blower to a Truck Loader in less than a minute. This P.T.O. unit is readily changed to a 6 foot vacuum machine. A Thatcher can be added to the vacuum head. Thus, large areas may be thatched and efficiently vacuumed at one time. Other attachments are also available, as well as, an assortment of debris collection trailers.

Other Giant-Vac products include . . . Truck Loaders from 12 to 65 H.P., . . . Giant-Blos from 5 to 65 H.P., . . . Giant-Vacs from 5 to 10 H.P., . . . Thatchers . . . plus many standard accessories to custom-fit your needs.
