One of the greatest challenges to you as a golf course superintendent is the control of trouble making weeds such as Poa Annua in the Fall and Crabgrass in the Spring. And when it comes to combating these culprits you’ll find that USS VERTAGREEN Weed & Feed for Professional Turf gets the job done. Weed & Feed contains famous BALAN, the selective pre-emergence herbicide that kills Poa Annua and Crabgrass seeds as they germinate. BALAN breaks down gradually... leaves no harmful residue... no damage to established turf. And as Weed & Feed controls weeds, its superior grass-growing nutrients (12-4-8 VERTAGREEN) act quickly to provide steady, healthy growth.

So remember... now’s the time to kill Poa Annua before it gets a good grip on your turf. For great turf in the 70’s, call the professional today... your VERTAGREEN Representative. He’ll meet you on your own ground with a full line of dependable turf products and services for you.

Score in the 70’s with the Vertagreen Professional turf program

USS and VERTAGREEN are registered trademarks
BALAN R is the registered trademark for Benefin, Elanco Products Company, a Division of El Lilly and Company

Athletic division moves

The general sales offices for the Athletic Products Division of General Tire & Rubber Company has been moved. New address is: Chambers Ave., Jeannette, Pa. 15644. Telephone: (412) 523-5441 or 526-3501.

Manufacturers concerned over PGA equipment testing committee

Several equipment manufacturers are disturbed by the Professional Golfers' Assn.'s recent announcement of an equipment testing committee to "investigate the many claims made in advertising golf equipment . . ." The announcement, which appeared in the June issue of the PGA publication, "Professional Golfer," stated: "The time has come when advertising and wild claims will be investigated and the PGA golf professional will be advised accordingly."

During discussion of what originally had been termed by PGA President Leo Fraser as a "research and development department" at the PGA's annual meeting last January, manufacturers were told that it would primarily serve as a means of communication to professionals by informing them impartially of any new developments in materials or components for golf equipment, one manufacturer recalled.

"It was not to act as the conscience of the manufacturers, which is the impression created by the announcement," he said. A major question which arises, this industry leader added, is how the PGA can ethically and justifiably assume the task of testing and evaluating various manufacturers' products when it lends its name to many competing products on the market. He pointed out that this could "put the PGA in the position of prosecuting attorney, judge and jury when evaluating competing lines."

Furthermore, the testing and evaluation which the PGA wants to conduct require costly and highly complex equipment and people with a great deal of technical knowledge. "The PGA has neither the facilities nor the qualified personnel to properly carry out such functions," the spokesman said.

In questioning the actual functions of the new group the Manufacturers' PGA Relations Committee has been assured by Fraser that the original concept as explained last January, had not been altered.

PGA Executive Director Robert Creasey told GOLFDOM that nothing is absolutely definite right now in regard to the committee and that the article announcing it was merely to inform members of one of the association's "determinations" to explore new areas.

However, it seems the manufacturers' concerns have not been sufficiently allayed, and the new committee is likely to be a top subject of discussion during the upcoming annual meeting.

Spalding testing new ball; performance termed "unique"

A.G. Spalding & Bros. has high hopes for its new Top-Flite golf ball, which is claimed to have unique performance characteristics. One of the ball's major selling points is that it is highly durable. However, a Spalding spokesman says two other features have been discovered in tests: 1) at lower clubhead speeds, golfers could hit the Top-Flite farther than other balls tested against it and 2) the Top-Flite went up to 12 yards farther with a five iron.

These characteristics are attributed to its two-piece construction consisting of a molded core of a high density polymer compound and a cover of DuPont Surlyn—a highly resilient substance. The ball continues to reveal advantageous characteristics in tests and the company has not yet fully evaluated all the features of the Top-Flite, according to the Spalding spokesman.

Surlyn is not new to the golf ball field. Ram Golf Corp. has been using it for their ball coverings for about three years. However, Ram utilizes the conventional three-piece construction—1-1/16-inch center, rubber windings and cover. Meanwhile, other major manufacturers currently are working on golf balls with Surlyn covers.

This marks Spalding's second attempt with a two-piece ball. The "Executive I," a two-piece ball of entirely different materials, had been on the market for about two years. However, it was withdrawn due to a certain "softness" which golfers found undesirable.

Currently, the Spalding Top-Flite is being test marketed in West Coast pro shops at $1.25. However, Spalding plans to test market it in Florida this fall at $1.35. It has already gone through USGA tests and was found to be within the association's requirements for initial velocity. The Top-Flite will be sold in pro shops only and is expected to be introduced to the public nationally in January 1971.
Golf featured at River Oaks

Golf will be the focal point of a new recreational $250 million facility located on Grand Island which lies in the Niagara River between the United States and Canada. To prove it Erie County Executive B. John Tutuska whacked a three-wood shot 230 yards to "break ground" on the spot where the first tee will be located.

The development, to be called River Oaks, will include a hotel, marina, park, high rise housing, single houses and a retail shopping center. Loeb, Rhoades and Company in partnership with Caldwell Development Corp. will build River Oaks on 1,100 acres. The architects for the course will be Victor Gruen Associates.

Melnor moving into institutional irrigation field

Preliminary negotiations are under way for acquisition of Turf Irrigation Corp., manufacturer of institutional irrigation equipment, by Melnor Industries, a manufacturer of home sprinkler systems to merge.

According to Edwin M. Heiberger, president of Turf Irrigation, and Norman Seiden, president of Melnor, Melnor will purchase Turf Irrigation cash assets for approximately $2 per share of Turf Irrigation stock. Turf Irrigation will then operate as a division of Melnor with Heiberger remaining president and general manager.

Dutch elm disease: a possible solution

The solution to the Dutch elm disease problem, which has plagued the United States for nearly 40 years (see GOLFDOM, August, 1969, p. 38), may be within sight.

Foresters at Michigan State University and the University of Wisconsin have found that certain European elms are resistant to the disease; in fact, it is now possible to give a 75 per cent guarantee that some types of elms will survive the disease for 40 years, according to MSU forestry researchers Gary Long and Jonathan W. Wright.

Over 600 seedlots of elms from Japan, India, Rumania, Russia, Austria and other European and Asian countries were received by the researchers by the end of the summer of 1968. These seeds were planted as soon as they arrived. Now two years old, the trees were inoculated with spores of the Dutch elm disease fungus early this June. In total, 25,000 trees were inoculated. First results showed that one European species, the smooth-leaved elm, showed high resistance. A Japanese species also showed considerable resistance.

An end to waste

Wastewater recycling can be one of man's most important weapons in his battle to improve the environment, according to Dr. Robert C. Ball director of Michigan State University's Institute of Water Research.

"As we become increasingly aware of the degradation of our environment, there is an urgent need to reorient our thinking to regard as resources many things we now wantonly discard as wastes," says Ball.

Ball believes that man must direct his technology toward recycling these supposed wastes into economically valuable and useful products, and "perhaps there is no place that recycling of resources has greater application and potential than in wastewater treatment." Such treated water can be used to irrigate not only agricultural and forest crops, but golf courses as well. In fact one such system already exists at Panther Valley CC in Allamuchy, N.J. (see GOLFDOM, June, 1969, p. 45).

Recycling is not a panacea for wastewater disposal problems nor is it a new concept. But it "is a concept we have chosen to ignore largely because we have had access to what appeared to be limitless new raw materials and ample land and water areas upon which to impose our wastes. We are now recognizing the hazards in this approach.

"Unless we redirect our technology to reuse our wastes, we run the grave risk of destroying important sectors of our environment as well as depleting our resource base," Ball adds.

Venable branches out

Venable Sprinkler Sales, a division of Michigan General Corp., plans to open offices in Atlanta, Miami, Oklahoma City and in Waco, Austin and San Antonio, Tex., as a further step toward becoming a nationwide contractor, supplier and installer of sprinkler systems.

Heading the Atlanta-Miami operation, which opened recently, is David Wilcox, recently-appointed Southeastern sales manager. Wilcox has worked in the irrigation and turf business for over 12 years.

The other four branch offices are scheduled to open in early 1971.

Sales earnings decline for Victor and Stauffer

Unfavorable economic conditions have resulted in a marked downturn in sales and earnings from 1969 to 1970 for both Victor Comptometer Corp., parent company of Victor Golf, and Stauffer Chemical Company.

According to A.C. Buehler, chairman of Victor Comptometer Corp., net sales for the six months ending June 30 are down by $1,095,695 from $78,380,552 in 1969 to $77,284,857 in 1970. In addition, net earnings for 1970 were only $2,614,122 as compared to $5,027,333 in the same 1969 period. Second quarter net sales showed a decrease of $3,458,778 from 1969 to 1970, whereas net earnings dropped by $1,934,328 in 1970.

Stauffer Chemical Company suffered similar losses. Sales for the first half of 1970 were $250.2 million compared to $262.6 million for the same period in 1969. This represents a drop of $12.4 million. In the second quarter of 1970, sales dropped by $8.6 million from $132.5 million in 1969 to $123.9 million in 1970.

Stauffer's net earnings also show reductions. Earnings for the first half of 1970 were $17.2 million, (Continued on page 64)
News

(Continued from page 63) whereas in 1969 earnings totaled $18.1 million. In the second quarter earnings dropped by $225,000 from $9.1 million in 1969 to $8.9 million in 1970.

Although Stauffer Chemical is making no predictions, Victor Comptometer anticipates an upturn in both sales and earnings for the latter part of the year.

Turfmen compare data

Representatives from 15 universities met in a joint meeting of the Southern Regional Turf Research Committee and the Northeast Co-ordinating Committee-3 at Virginia Polytechnic Institute July 8 and 9. The committees met to hear the results of the bluegrass tests being conducted in Virginia as reported by Dr. John F. Shoulders, turf specialist.

These federally-supported committees are testing 40 varieties of bluegrass for ecological and physiological performance in addition to researching new pesticides and methods of turf weed and disease control.

Because Virginia is a member of both committees, a joint meeting was held.

ASGCA elects officers

The American Society of Golf Course Architects elected officers at its annual Board of Governors meeting. Elected president was E. Lawrence Packard, LaGrange, Ill. C. E. Robinson, Toronto, Canada, was elected vice president and Francis J. Duane, Port Washington, N.Y., was elected secretary-treasurer. In addition Percy Clifford, Mexico City, was elected to the board.

The A.S.G.C.A. established headquarters in the tour suite of the LaSalle-Wacker Building, 221 North LaSalle Street, Chicago.

BUY GIANT-VAC
GET GIANT ECONOMY

GIANT-VAC universal P.T.O. unit converts to blower, vacuum, thatcher, truck loader . . .

As double headed blower . . . to truck loader in 30 seconds

Exhaust velocities exceeding 250 M.P.H. rapidly clean a large turf area. By flipping one tractor operated lever, the air discharge is changed from left to right allowing constant windrowing regardless of tractor direction. Special features allow converting to a Truck Loader in 30 seconds, as shown.

As vacuum, thatcher and truck loader . . .

Vacuums a 6 foot swath and thatches large acreage at the same time. Truck Loading hose attachments may also be added to this combination. A variety of self-dumping trailers are available.

GIANT-VAC offers a P.T.O. driven power unit which performs many functions. Propelled by a standard tractor, this unit with available accessories is versatile and efficient. It can be operated as a double headed blower, cleaning many acres per hour. Attachments are available which convert the Blower to a Truck Loader in less than a minute. This P.T.O. unit is readily changed to a 6 foot vacuum machine. A Thatcher can be added to the vacuum head. Thus, large areas may be thatched and efficiently vacuumed at one time. Other attachments are also available, as well as, an assortment of debris collection trailers. Other Giant-Vac products include . . . Truck Loaders from 12 to 65 H.P. . . . Giant-Blos from 5 to 65 H.P. . . . Giant-Vacs from 5 to 10 H.P. . . . Thatchers . . . plus many standard accessories to custom-fit your needs.

**NEW PRODUCTS**

**Woodlets, Inc.** announces the Brock Airway for mouth-to-mouth artificial respiration without personal contact. Its non-return valve minimizes danger of cross-infection, provides a mouth seal and clears an airway to the mouth. It sells for $7.95 with models available for general or professional use.

**Barthman Corp.** announces the King Midget Commuter mini-car which doubles as a golf car. Made of fiberglass, the Commuter has a turn-aside steering wheel, an automatic transmission and a 12hp engine which delivers over 50 miles per gallon of gas. Available with a removable fiberglass top, the Commuter sells for $1,295.

**Goodall Div.** has designed a heavy-duty, 22-inch, trim-type mower for commercial mowing. It comes with 8 by 1½ inch steel wheels with sealed ball-bearings and grease fittings that are recessed to permit close trimming, a hinged chute mulcher plate with a bracket to catch grass, heavy-gauge steel handles and a steel blade driver. The mower offers a choice of 3½ hp or 5hp engines with a 1½ quart extra oil base, five quart fuel tank and a snorkel air cleaner mounted on the handle.

**DriAll Driers, Inc.** introduces the LevLer, a low cost tool that eliminates ridges, depressions and furrows giving a smooth seed bed. The LevLer is equipped with a disc hitch for use behind a disc or three-point hitch. The LevLer comes in 11, 13, 15 and 17 foot models. Also available is a six-foot model for the compact trailer.

**Sans Souci, Inc.** has designed the Drinkometer as a self-tester for sobriety. The Drinkometer consists of a balloon for breath testing, and three bands of chemically treated crystals that change from orange-yellow to green according to the amount of alcohol present. Available for $1 or in a pack of five for $4.75.

H. B. Sherman Mfg. Company announces the Body Toner shower head. Three miniature turbine jets break up the water flow into individual droplets and disperse them in a rhythmic pattern. The Body Toner offers a range of spray settings and is available in chrome, harvest gold, avocado green or porcelain white. It retails for $19.95.

Circle No. 106 on reader service card

York Rakes Div. of York Modern Corp. offers a compact rake for use with garden tractors. The Model LFT is designed to remove thatch without damaging roots and clear away grass clippings, acorns and any other lawn debris. It uses three rotating tine bars with 117 spring teeth, each mounted on rubber. The rake clears a three foot swath, discharging material in neat rows. Available with a variety of hitches for attachment to garden tractors.

Circle No. 107 on reader service card

W. S. Kirkpatrick & Company, Inc., offers the Saunette disposable cloth towel. Unfolded it measures 8 by 11 1/2 inches; packaged it is 3 1/2 by 4 inches. Slightly scented and moistened, the Saunette is wrapped in aluminum and can be heated. Available in two designs, the Saunette comes in cartons of 500 or packages of 30.

GREEN'S GREEN
WITH
CUTRINE
U.S.D.A Reg. No. 8959-1
The only algicide known that will eliminate ALL forms of algae at safe limits to other living things when used as directed. AND, it has no harmful effect on turf grass.

An area at the bottom of the picture, including both fringe and green surface, was treated with at least 100 times more CUTRINE than it would take for normal algae control in a body of water.

The picture, taken 5 days after spraying, shows the treated area is just as green as the rest of the grass—no browning, no kill.

(By the way, algae in a lake on the course was treated with the normal amount of CUTRINE. It was GONE in five days.)

Cushman Motors introduces the Trophy four-wheel, electric, economy golf car. Constructed of corrosion-resistant, terneplate steel, the Trophy is equipped with individual bucket seats and an automatic brake that engages when the driver leaves his seat. Other features are automotive steering, front and rear shock absorbers, a storage compartment and an insulated drink and golf ball compartment. Available accessories are auxiliary bumpers, windshield and canopy. It sells for $1,350 without batteries.

Faultless Golf Products offers free a pro shop gift pack that includes 12 Professional Plus balls and a golf bag bottle caddie all valued at $20. Professionals can buy the gift pack for $9 a dozen for one case, $8.20 a dozen for two or three cases and $7.50 a dozen for four or more cases. Each case includes 12 gift packs and a counter display card.

Sono Columns, Inc., announces a table-top lecturn designed especially for small rooms that require amplification. The SCTM 50 lecturn has front and side mounted speakers, is resistant to scratches and is lightweight.

Per Capita Unlimited announces the sapor soap dispenser which uses solid bar soap and dispenses it in powder form. Operated by turning a hand wheel, it is transparent and corrosion and rust resistant. Priced at $9.95.

Rain Jet Corp. announces adjustable square-pattern sprinklers, flow fittings and flexible piping that can be installed by any novice with household tools. The suggested retail price for materials to cover 1,500 square feet of lawn is $64.50. Available with a "How to Install" brochure.
