ROSEMAN INTRODUCES

New 7-Gang Hydraulic Power Driven Reel Mower

Beginning a New Era in Turf Mowing!

The Roseman 7 unit Hydra-Gang Mower utilizes the tractor power take-off system to power the cutting reels and the tractor hydraulic system to provide hydraulic lift for each mower unit. The Hydra-Gang mounts on Ford 2000 and 3000 All Purpose model tractors.

Drive power for reels taken directly from the tractor engine eliminates need for excessive draw bar pull and minimum weight for traction. Hills and banks can be mowed easily regardless of soft or wet turf conditions. Individual mower units follow ground contour with unlimited flexibility without scalping. Cutting height is gauged by ground reference to provide even cut over undulations. 30" per unit. Cutting swath varies for 3, 4, 5 and 6 mowers with maximum of 15' for 7 gang.

Mowing time is greatly reduced with a minimum of repair maintenance. All hydraulic components are manufactured to ASAE standards. The complete mower and linkage assembly can be removed from the tractor permitting general use of the 3-point utility features of the tractor.

Better switch to

OTTAWA WHITE TRAP SAND...the people who know sand best!

The above list covers only a few of the many fine private, semi-private, and public golf courses in the golfing capitals of the nation who use Ottawa White Trap Sand. The important thing, however, is to know why they use it. A look at the characteristics of this unusual trap sand will show you the "why", and why you too should consider using it:

1. It's beautiful: the rich white tone adds beauty to any course, makes even the most lush greens and fairways look greener.

2. Excellent drainage: silica sand grains allow percolation...no puddling. Can be played on soon after a hard rain.

3. No packing: silica sand contains no clays or other minerals to cause crusting. Cuts maintenance costs—doesn't have to be raked after every rain.

4. Wind resistant.

5. Great for top dressing greens, tees and fairway bunkers, and as seedbed mixture.

6. Adds glamor: developers find it helps sell overall concept of golf course, homes and memberships.

FAST! Mows a 68- or 84-inch swath at speeds up to 4 MPH. That’s half an acre in 15 minutes! Trimming time is reduced as reels reach out over curbs and up to obstructions.

EFFICIENT! Three power driven, free-floating reels follow ground contour. Reels shear grass cleanly without “tip burn.”

DURABLE! Timken bearings; automotive-type transmission; heavy duty, tubular steel tie rods and bed knife frame; and cutter bar lip... all add to more years of use!

SERVICEABLE! No-nonsense design makes normal maintenance faster than any mower on today’s market!

National Mower Company... our reputation is your guarantee of quality! Our start in 1919 makes us one of the (if not the) oldest power mower manufacturers in the U.S.A.

Attach it to your Greensaire II and you can aerate and process aerator cores in one simple operation.

The self-powered Greensaire II Core Processor conveys cores and plant matter over a perforated grate, breaking them up. Most of the loose soil is sifted back onto the turf through the grate as top dressing.

The remaining plant, thatch, roots and soil are carried to the top of the conveyor, where they are sifted a second time. Remaining plant and thatch then go into a large removable bag. Up to 1000 square feet of greens may be aerated before the bag needs emptying. An optional trailing dragmat works the sifted soil back into the turf.

The Greensaire II Core Processor saves you time by combining two operations into one. No need to rake up windrowed cores after aeration. That saves you money. And because it saves time, your greens are back in play sooner, which keeps the players happy.

For more information, write RYAN TURF EQUIPMENT, OMC-LINCOLN, a Division of Outboard Marine Corporation 2103 Cushman Drive P.O. Box 82409 Lincoln, Nebraska 68501
Chain, Pegs, and Ball Tops in all sizes for easy assembly into decorative fencing for bordering flowers, lining sidewalks, and serving as barriers to keep carts off tees and greens and out of streams and marsh areas.

Short Pegs for staking sod and for use with plastic chain to support new tree planting.

Tee Markers as well as markers for water, lateral hazards and out-of-bounds demarkations.

Maintenance-Free plastic fence components are strong, rustproof, non-conductive, lightweight, durable, easily installed, and inexpensive.
