

a chance and it'll grow on you.

Untreated, there'll be a bigger crop next time, make no mistake. With your fertilizing and watering, crabgrass plants become fully-equipped seed factories in ten weeks.

Balan puts crabgrass out of business. Other annual weedgrasses, as well. A pre-emergence weed killer, Balan forms its protective zone where seeds germinate. Kills 'em, despite heavy rains and irrigations.

Works economically even on big areas. Costs \$15-30 an acre. (Certain

warm-season areas require two applications at a heavier rate for year-around control.)

Balan is convenient, too—granules are easily applied with your equipment. Make Balan's crabgrass control a key step in your lawn-care. See your turf supply and equipment distributor now. Or contact us for the name of the distributor nearest you. **ELANCO PRODUCTS COMPANY** • A division of Eli Lilly and Company • Dept. E-455, Indianapolis, Ind. 46206, U.S.A.

RYEGRASS IS THE PERENNIAL FAVORITE

Linn Perennial Ryegrass is the versatile grass which does a variety of jobs well. Over the years it has proven to be a top performer on virtually any greenway.

- Germinates in 10 to 14 days, or even less under ideal conditions.
- Requires little or no seed-bed preparation.
- Rapidly develops a strong root system.
- Vigorous spring growth makes it ideal for repairing damaged areas.
- Stands up to abuse and heals rapidly if injured.
- May be sown under unfavorable conditions.
- Performs well in poor soils and is acid tolerant.
- Often used as a nursegrass with slower-starting varieties.

LINN PERENNIAL RYEGRASS PERFORMS

An **EASY RIDER** by any other name is not an **EASY RIDER...**

A new competitor has a trap rake that copies our 1973 **Easy Rider 2**. Our 1974 model, the **Easy Rider 10** (with 10 major advances) out performs *any* other trap rake. From **Easy Rider 2** to **Easy Rider 10**—our new trap rake is years ahead of its time, except in price.

NEW FEATURES

- | | |
|---|------------------------------------|
| 1. RAKE DEPTH ADJUSTMENT | 6. Chromium-plated front bumper |
| 2. Different torque converter | 7. Heavy duty rake suspension |
| 3. Stronger throttle control | 8. Stronger yoke & pivot post |
| 4. Heavy duty jackshaft bearings & brackets | 9. Two-piece high back seat |
| 5. Heavy duty drive belt and pulleys | 10. Higher Rake transport position |

A GRAND NEW TRIO OF TURF GRASSES

Modern grasses are different. Now you can take advantage of improved varieties designed to do a superior job on your turf. They're new, but proven in the field and at university testing stations.

Highlight

CHEWINGS-TYPE
RED FESCUE

An improved Chewings-type red fescue, Highlight is distinguished by its brilliant green color. Highlight is dense growing and tends to hold this denseness through the summer. A good mixer, it persists and will eventually colonize in shade areas, in poor, sandy soils, windswept slopes and under trees.

Compass

TURF-TYPE
PERENNIAL RYEGRASS

A truly fine-leaved turf-type perennial ryegrass, Compass is low-growing and fast germinating. It develops sod of above average density and is resistant to excessive traffic and wear. It's dark green color and fine leaf means it will blend beautifully with other standard lawn grasses such as Kentucky bluegrass and red fescue.

EMERALD (SMARAGD)

An improved creeping bentgrass especially developed by W. Weibull AB of Sweden for fine turf areas such as golf greens, fairways, tees and other fine turf. Forms a dense creeping turf capable of healing injuries without the excessive vigor which creates "puffiness". Exceptionally uniform in appearance, Emerald does well from Canada to the Mid-Southern U.S. Along with excellent cold tolerance, it has persisted during hot, humid summer months.

How to cut grass with fishing line.

Rugged 3 H.P.,
2 cycle, gasoline
engine.

Fingertip
Speed
Control.

Four replaceable spools with extra line
are found inside each "Weedy" head.

The Secret

A patented system utilizing specially-
treated 'fishing line' to slash away
weeds like magic! Centrifugal
force turns fishing line into
a safe cutting blade.

Powerful
3 H.P., 2 cycle,
Tecumseh gasoline
engine, with all
needle bearings. Padded adjustable
shoulder strap and finger-tip throt-
tle control for easy handling.

Tough Chores made Easy
Chain link fences, trees, culverts,
ditches, rock gardens, play
grounds, brick walks and other
tedious lawn care problems can
now be done quickly, easily and
SAFELY!...saving hours of work.

Saves \$14,000 Per Year

Parks, cemetaries, golf courses,
municipalities, highway depart-
ments, river authorities, schools,
estate care takers, mobile home
colleges, universities, and many
others report substantial savings
using "Weedy" in lieu of conven-
tional equipment. A study by the
maintenance department of
L.S.U. (Louisiana State Univ.)
reports a \$14,000 savings in one
year using "Weedy" over prior
methods.

Manhattan

Turf Type
PERENNIAL RYEGRASS

Manhattan perennial ryegrass was selected and developed by Dr. C. Reed Funk, Rutgers University. Manhattan develops a uniform dark green, leafy, dense turf with leaf blades finer than most Kentucky bluegrasses. Excellent for hard use areas such as tees, green aprons, cart path flare areas and hard use problem areas. Mowability ratings are excellent.

HELLO

PO-SAN^(TM)

Good-bye
FAIRWAY
Poa-Annua!

You can get rid of fairway Poa-Annua by stopping seedhead development and foliar growth with PO-SAN^(TM). Fairways will have more open turf! PO-SAN leaves no phytotoxic residues in soil — allows overseeding immediately with desirable perennial grasses for exceptional germination and development. One PO-SAN treatment retards poa and inhibits poa seedhead production for a period up to 45 days. PO-SAN also eliminates clover, dandelions and other broadleaf weeds. Stock up on PO-SAN today! See your Mallinckrodt distributor.
