Since 1970 major corporations have selected Composite Development Corporation to design and build graphite shafts and inserts. Over 10,000 have been successfully market tested and sold. And now, after more than three years of research and development, we are introducing a new dimension in graphite shafts.

Special offer to manufacturers, pro shops, golf shops:
Grafalloy has commissioned Stan Thompson, world-renowned custom club maker, to provide four drivers in the standard flexes of the industry, L-R-S-X. These four drivers in your hands will clearly demonstrate Grafalloy's superiority.

For details on our introductory offer for drivers or golf shafts, please contact:

New Graftek Golf Shafts... a revolution within a revolution.

Now Graftek introduces a graphite shaft whose torque recovery characteristics are better than anyone would have believed possible just a year ago.

The Graftek shaft sets a new standard of performance and durability for graphite composite golf shafts. Graftek is a wrapped pattern which doesn’t have to be made in different thicknesses to vary flex characteristics. This insures continuity throughout the shaft. And makes possible a stepless shaft that delivers more power.

Graftek shafts have the same flex-bending profile as Dynamic steel. And they come in the same dimensions. What’s more, torsional resistance is controlled in each Graftek flex to provide optimum flex and twist harmony. Result: the best combination of hitting power and accuracy.

Here’s a chart you can’t find in competitive ads:

Barret Buse, pres.; George McHugh,
These are the finest clubs I have ever played with. I get more distance than previously owned clubs but more important, they seem to help my accuracy. If you line yourself with a target, you are either short or too long based on degree of force but you will always be on target. Recommended by Pro; played with; found to be exactly what I had been searching for for years."

—Quentin W. Burkhalter, Greensboro, North Carolina

"I think you have got a winner in these OSS FTD's. The consistency of swingweight was best of any irons I have ever purchased and that has been many sets. Tried a friend's set of OSS FTD's. The results were outstanding—those irons longer. Also I like the way the off set lets me set up to the ball. Also like the feel of stainless in contacting the ball."

Bob Schreiber, Bellevue, Washington

"So far I am happy with the clubs as they seem to help you keep the ball in play better. Club pro suggested I try them.

W. H. Sorrells, Jacksonville, Florida

"With the OSS head I think it is easier to line up your shot and it goes where you line it up to."

Gerry Zuhike, Royal Oak, Michigan

"I like a club that feels hefty. These clubs look good and feel good. The grips are the best. The clubs look like they were well made. I have been hitting the ball much straighter since I bought them."

Daniel Santi, Tampa, Florida

"I saw a friend of mine that had a set and I practiced some with his irons and I could hit them farther and with better accuracy. After receiving my set of FTD offset irons my scores dropped from around 74-76 to 70-73. Of course I practiced a little more but my woods (set of old Arnold Palmer aluminum shafts) hit no farther or without any better accuracy than before. The irons made the difference (and confidence). Thank you for your concern in your products and customers."

George C. Sneed III, McGirt, Georgia

"The offset of the leading edge of the O.S.S. iron not only makes it stop faster."

Jimmie Taylor, Jr., Ft. Smith, Arkansas

"I am a 12 handicap. My first round with new clubs I scored an 82, second round an 80. Really am pleased with the set. Certain I will break below 80 before long. Tried several and found that First Flight worked the best for me. The irons are especially to my liking. They really have helped my short game."

Fred H. Lindstrom, Bradenton, Florida

"Great clubs because my long iron slice seems to have disappeared."

Elmer Bertossa, Bettendorf, Iowa

"I tried a friend's offset irons and found that I could control my shots more easily with more weight in the clubhead. The clubs just feel so much better and I really like the offset blade. The way I see it, this has to be the No. 1 iron of the game of golf."

Milton E. Hild, Mercedes, Texas

"Truly one of the most beautiful and functional irons ever designed. I adapted to them almost immediately and I am getting approximately 10 to 15 yards more distance with each iron except the 2. First Flight has always made top woods. Now with the OSS, a full set was desirable. I don't think another club maker could do any better."

Vince Mahler, Huntington Beach, California

"The O.S.S. FTD by First Flight (offset design, cast stainless steel)."

Our OFFSET STAINLESS STEEL (O.S.S.) FTD irons are designed to help attack the two great demoralizers in golf; 1) not lining up the shot properly, and 2) not generating enough club-head speed.

ACCURACY

The offset of the leading edge of the O.S.S. iron not only makes alignment truer by allowing the shaft line to be nearer the ball at the start of the swing, but it also delays impact for a fraction of a second permitting the club face to square itself at point of impact.

DISTANCE

The "no-hosel" FTD (Pro Golf started the trend in 1969) simply means more weight behind the ball, and less weight in the shaft. This helps to generate more club-head speed for greater distance.

We don't intend to make four-color wild claims about our golf equipment. The swing is the most important ingredient, and we're not manufacturing swags—you are. But our O.S.S. FTD irons might make the swing he's got a better one. We leave the wild claims to our friends.

The O.S.S. FTD by First Flight (offset design, cast stainless steel).

RB300 PINSEEKER
GRAPHITE IRONS
These irons were designed exclusively for use with the new graphite shaft. They feature wider sole and redesigned heel, thus redistributing weight at heel and toe and sole, to fully utilize the advantages that lightweight graphite shafts afford.

THE PINSEEKER SECRET IS OUT!
With the introduction of the graphite shaft, it became apparent to our development department of the R & M Golf Company that the graphite shaft contained many features that could be emphasized and utilized for the benefit of all low and high handicap golfers. After extensive research with various weight balances and head designs, including the hitting of thousands upon thousands of golf balls, our research department gave us the necessary formula to derive the utmost in accuracy and distance with the all-important factor of less effort by the player. The formula was transposed through our own design department and machine shop into the ultimo in the formulation of the Now-Perfected P. S. Ring Balance. The first ring-balanced club made was tested against other makes with the same graphite shafts from various companies and we were amazed at the accuracy, without effort, of this club. It was clearly indicated that one cannot take just any golf head (with miscellaneous balances), insert a graphite shaft, and get all of the qualities that the shaft affords.

Our ring balance has now been refined to its ultimo and it has proven to be the most efficient graphite-shafted golf club made today. The driver will be known as “Pinseeker’s RB300.” All is now completed and the testing of the Pinseeker special head for graphite shafts has gone beyond our expectations. The balance between head and shaft is without a doubt the answer to distance and accuracy with the minimum of effort.

PINSEEKER PUTTER
(“Birdie”1)
• We have followed the success of our stainless steel heat treated iron heads using the Investment Cast process for accuracy and consistency.
• The only putter whose design has the built-in square-to-the-line on all sides.
• Heel toe weighted with stabilized lower cross bar for wider sweet spot with rocker sole.
• Rolled edges on each side of sole slot to ensure smooth takeaways.
• True Temper Shaft standard 35” or to special order length.
• Try one and experience the superb feel and optics of this space age putter.
