It can take months to compact a green. It takes 60 minutes to fix it.

Greens aeration is one of the most important maintenance jobs you have. Months of compaction can damage a green by preventing air, water, and fertilizer from penetrating the surface. Proper aeration is essential. But it must also be done quickly to get your course back in play and keep your golfers happy.

The Greensaire II does both. It cleanly penetrates the soil, removing cores up to 3" deep. It is so precise that the holes it makes do not affect the true roll of a golf ball. And the Greensaire is fast, aerating the average green in 60 minutes or less.

If you're satisfied with your soil content, the Greensaire's Core Processor attachment can make aerating even faster. It catches the cores, separates good soil from debris, puts the good soil back on top, and bags the debris. You top dress and collect thatch at the same time you aerate.

Maybe you don't need the big capacities of the Greensaire II and Core Processor, but you do want the same fine capabilities. Then choose the Greensaire 16. Instead of a 24" swath, you have a 16" width. You can use the same selection of tines and the convenient windrow attachment makes core removal easy.

And like all Ryan equipment, these machines are built to last. We believe longevity is just as important as performance.

Whether your greens need aerating twice a year or twice a month, there's no better or faster way than with Ryan aerating equipment.

GOLF OVERSEAS

Golf is growing in Japan

A survey by Tokyo's Ministry of International Trade and Industry, as reported in U.S. News & World Report, shows Japan now has 1,114 golf courses spread over 210,000 acres — and those figures are expected to double within 5 years.

Some 7 million Japanese play golf (out of a population of 110 million), producing golf course revenues of $1.2 billion in 1975. Greens fees accounted for about 51 percent of that, with 16 percent attributed to affiliated shops and restaurants. The remainder was from other charges, including those for caddies.

Unusual from an American point of view is the fact that 70 percent of the country's golf course employees are women — and 98 percent of their caddies.

ASSOCIATIONS

GCSAA names Maples new education head

In a move that may have surprised some members of the Golf Course Superintendents Association of America, Executive Director Conrad Scheetz announced that former association president Palmer Maples has become the new director of education.

Maples will be filling the vacancy left by former director of education William E. Knoop, who resigned the post in July.

The appointment was seen by some members of the association as a return to getting "one of their own" to head the education program, referring to Maples' experience as a superintendent of 17 years.

A certified golf course superintendent, Maples has been in the business since his high school days, working for his father, superintendent/professional at a course in Rocky Mount, N.C. After high school, Maples completed a two-year turf course at Abraham Baldwin College in Tifton, Ga. He also studied agronomy at North Carolina State College and Texas A&M. After two years in the Army, he returned to get his undergraduate degree at the University of Georgia in agronomy.

After a six-year career at the Standard Club in Atlanta, Maples heads for the GCSAA headquarters in Lawrence, Kan. Maples made his immersions on the national GCSAA scene in 1970 when he was elected to the association's executive committee. He later served as secretary-treasurer and as vice president. Maples' presidential term was in 1974. As immediate past president, he has been involved on the executive board as a director.

Wiren, O'Brien rise in PGA staff shuffle

In an effort to fill some holes in his infant Club and Professional Services and established Education programs, PGA Executive Director Mark Cox did some personnel shuffling and appointed two familiar faces to take over administrative duties.

Former Education director Gary Wirin is now in charge of the Club and Professional Services spot, vacated by Bill Blanks. Blanks left the PGA for family reasons and has since taken a marketing position with Baron Putters, Burbank, Calif.

Joe O'Brien, who had been Wirin's education coordinator, moves up to that department's top spot.

With a polished program over the previous four years, Wirin had gained much in the educational area for the PGA pro. Wirin earned his masters from the University of Michigan and his doctorate from the University of Oregon.

Probably the most notable additions to the education program Wirin established just this year were seminars to better instruct the PGA professional in the intricacies of being a general manager and program to inform club and course management of the profit advantages of having a PGA pro.

O'Brien is a graduate of the University of Illinois, but received his masters from DePaul University in Chicago. Most notable accomplishment for the young O'Brien over the past two years has been his direction of the PGA Business Schools.

Gelsler heads NGF school golf effort

Attempting to further introduce the game into the schools of the country, the National Golf Foundation has begun a pilot program to get more young people playing golf.

Under the guidance of foundation board member Richard M. Gelsler, the NGF has selected eight school districts throughout the nation to whom it will offer free golf equipment. Golf instruction from the foundation's consulting teachers staff, training films, and clinics are also available to the schools at a nominal cost.

"There are an estimated 12 million "hard-core" golfers in the country," said Gelsler, who is president of Spalding. "In 1975, the number of women golfers increased approximately 12 percent, while the number of males playing remained the same."

Correction

We reported in our August issue that a golf pro could have his biorhythm charted (free) by Edmund Scientific, Barrington, N.J. It's true, but not for free. Edmund will chart a person's (12 month) biorhythm for $15.95. They also offer a biorhythm kit for $14.50, to help those who prefer to do their own charting.
COMING EVENTS

DECEMBER
1-3—49th Minnesota GCSA Turfgrass Conference. McGuire’s Inn, Arden Hills.
1-4—PGA educational workshop, club repair and custom fitting (Advanced II), San Francisco.
4—Indiana GCSA monthly meeting, C.C. of Indianapolis.
6—NRA educational seminar, controlling food cost, Miami.
6-9—New Jersey Turfgrass Expo, Cherry Hill Hyatt House.
6-11—PGA Business School I, San Francisco.
7-9—Ohio Turfgrass Association Conference & Show, Columbus.
11—Greater Cincinnati GCSA monthly meeting, Cincinnati CC.
11—Mid-Atlantic GCSA monthly meeting, Hillendale CC, Phoenix, Md.

JANUARY
3-4—Tennessee Turfgrass Association annual conference, Music City Rodeway Inn, Nashville.
9-14—PGA Business School II, Biloxi, Miss.
10-14—Mississippi State University Turfgrass short course, State College.
10-11—Mid-Atlantic GCSA annual meeting, Baltimore Hilton.
10-11—NRA/U. of Nevada Las Vegas Workshop.
11-12—North Carolina State Turfgrass Conference, Greensboro Hilton Inn.
13-14—New Hampshire Turfgrass Conference, Sheraton Wayfarer; Bedford.
14-17—PGA educational workshop, golf shop design, display and merchandising, Orlando, Fla.
15-19—PGA educational workshop, job arrangements, negotiations and human relations, Los Angeles.
17-19—Southern Turfgrass Conference & Show, Cook Convention Center, Memphis.

SHOWS & CONVENTIONS

Southwest show gets 400 pros to Dallas

Quickly becoming one of the biggest regional pro shop trade shows in the country, the Southwestern Professional Golf Salesmen's Association fifth show brought a record number of club professionals to its Dallas site in late September.

According to SWPGSA President Leon Faucett, 415 pros were on hand for the three-day run that included a record 90 exhibitors at the North Park Inn Center Complex.

Doubling the number of exhibitors over its past five years, the show brings the pro closer to buying when the new lines first hit the market.

Several national firms had their top sales personnel on hand at Dallas including Miller Golf's Dick Marchetti, who said, "Besides the PGA Merchandise Show, this is the only real selling show I have ever attended."

"When I was invited down to Dallas, I thought it was just another regional show. My salesman couldn't believe they can do it for the price they charge," said Al Donahower of the Kimberton Co. Bill Miller, national sales manager for ProGroup, Inc., said, "It was good to get back to Texas, but it was better to do this type of business."

Faucett and his association started their show in 1972 in cooperation with the local chapters of the PGA in Texas, and the pros have given their full support to the effort with their attendance and, obviously, with their buying.

MANAGEMENT

'Talk to your pro' superintendents told

"Communications is still the biggest problem in clubs today." Those were the words of Joe Black, pro at Brookhaven Country Club in Dallas and one of the most prominent club professionals in the Professional Golfers Association, as he spoke to the Northern Ohio and Central Ohio Golf Course Superintendents Associations recently.

A candidate in this year's PGA elections for national treasurer, Black told the gathered superintendents that talking about the day-to-day operation of a club was one of the best ways to stop problems before they start.

"Scheduling is an essential ingredient to running a club properly," the member of the GOLF BUSINESS editorial advisory board said. Admittedly, Black commented, there are club professionals not interested in being the friend of the superintendent, but the Texan felt this attitude was managerial suicide.

Planning was the key to the success of the 1976 SWPGSA show. Show committee members were (from left): Robert Anderson, ProGroup, Inc.; Eddie Connor, Spalding; Paul Hargrave, MacGregor; and Leon Faucett, chairman and association president. Unidentified male at right was not part of the committee.

MacGregor introduced its new golf products for 1977 at its annual sales meeting, including three different varieties of the Tournament ball, an enlarged selection of custom specialty clubs, and the Jack Nicklaus-Inspired VIP golf clubs. Speakers at the awards banquet were General Manager Jack Curran and, naturally, Jack Nicklaus. Also in attendance were two other MacGregor pro staff advisors: Ben Crenshaw and Tom Weiskopf.

Selling a program to a board is probably one of the areas where the club professional and the superintendent can cooperate most effectively, Black insisted. "What is good for the superintendent is in the end good for the professional and for the club."

Black elaborated on his public relations effort at Brookhaven with superintendent Quinton Johnson.

"Both of us play with the members to find out what they really want. At first, Quinton didn't play golf, so I gave him a bunch of lessons, bought him a bag with his name on it, and got him to go out on the course. I think he has a whole different perspective from playing with the members."

Another thing Black elaborated on was the effort the PGA is putting into its educational program; he is convinced the organization has been doing a better job than the GCSAA in getting its members ready for other golf management positions.

Some controversy was sparked when several superintendents became involved in a heated discussion on the impact of the tour on the course superintendent, referring to Black's long-running involvement with rule interpretations on the tour. Some felt the TPD pros demanded too much from the superintendent and in turn memberships were asking for the same near-perfect conditions — without keeping in mind the demands of heavy play, weather, and disease on the golf course.

MARKET TRENDS

Decrease in golfers reported in survey

Golf ranks 14th in public popularity out of 27 sports surveyed by A. C. Nielsen Co. recently. Swimming, bicycling, fishing, camping, and bowling (in that order) are the most popular sports according to the report.

Projected figures from Nielsen for 1976 place the number of golfers at 16,568,000, a three percent decrease since the last study done, in 1973. That study included 23 of the 27 sports examined in 1976.

The survey was taken among 3,000 U.S. households, with the results being representative of the entire country. Tennis and snow skiing were reportedly the two fastest-growing recreations, with tennis ranked ninth at a 45 percent increase since 1973; skiing ranked 16th at a 42 percent increase.
1. Total lower weight produces greater distance — the result of increased club head velocity.

2. Lighter than graphite with the strength of steel.

3. Less torque due to the torsional strength of steel. This helps bring the club head square to the target—and reduces club head deflection at impact.

4. A stiffer shaft can now be used for greater accuracy.

5. Each club has a shaft specially designed for it.

6. Consistent flex patterns for better control and feel.

7. Easier to swing—especially on the back nine.

The new Ben Hogan Legend-Shafted clubs* come in both men’s and women’s models. Irons offer choice of forged or cast heads. Woods come in Dura-Ply® laminate or persimmon.

The Legend Shaft will be on all the new Ben Hogan Producer, Director and Apex woods and irons.

See your Hogan Salesman about the availability of our useful demonstrator racks too.
