The National Club Association's Steve Alberg talks taxes to course owner-operators during the National Golf Foundation's eastern daily fee seminar in St. Charles, Ill. Alberg summarized the effort his organization had been making in the private sector to fight higher taxes.

Most importantly, though, Essig stressed the effort the teacher must make to listen to his golfers. "They want to tell you about their game," he said.

Bertoni, a former superintendent and now employee of a turf chemical firm, spoke on how cheap maintenance can cost too much in the long run. "Well-conditioned courses make money. Preventive maintenance can cost too much in the long run. "Well-conditioned courses make money. Preventive maintenance can cost too much in the long run."

Property and real estate taxes remain the biggest headache for the course owner to handle and Steve Alberg from the National Club Association was on hand to tell how those same taxes were affecting the private club sector. Most startling aspect of the tax crunch was Alberg's figure that nearly 22 percent of the nation's clubs/courses are on the verge of liquidation due to the tax burden.

Many times, courses have not convinced local and state taxing authorities that they are an asset to their communities. This is especially true in the impact a golf course has in raising the value of homes in an adjacent area.

When all the seminars were concluded, the NAPGC sat down and went to work on its second national meeting in history. Many of the organizers of the group admitted not much had been accomplished the first year and the biggest problem many of them had was finding out what was going on in their own organization.

Builder Siemens watches every detail

Nick Siemens is a man with a watchful eye. For more than 10 years and at more than 65 course sites, he has been a man who believes in carrying out specifications to the letter. There is little doubt he is one of the top course builders in the nation.

His colleagues were so convinced of his talent, they voted him their association president this past year. Along with coordinating his busy schedule between job sites, Siemens has enjoyed his year as head of the Golf Course Builders of America.

With more than 65 course construction projects under his belt in the last 10 years, Nick Siemens (above) is one of the most active builders in the industry. His term as president of the Golf Course Builders of America has been a fulfilling one, he says. Irrigation is the business of consultant Don Burns. Thought of as an expert in the field, Burns, a Nebraska native, is active on projects primarily on the west coast and Hawaii. He has worked with Nick Siemens on several courses.

"We consider ourselves a real friend of all in the business, especially the architects," Siemens told GOLF BUSINESS in an interview in Palm Springs, Calif. "Qualified builders are a necessity today. There are no shortcuts anymore and it is so important to know and be able to ask the right questions at the right time."

On this current job site, to be called Rancho Las Palmas, Siemens was building a 27-hole facility within a 360-acre tract for...
Moving tons of earth is handled by the million dollar equipment Siemens rents out for his projects. This particular Caterpillar machine is one of the latest earth movers available. Massive pipe is laid to bring in the water to the Rancho Las Palmas course site. When finished, the 27-hole facility will be part of a resort hotel complex managed by the Marriott Corp. Siemens says irrigation is critical in the arid Palm Springs, Calif., area.

The influx of so many unqualified and what Siemens calls "non-golf people" into the building ranks over the last decade has seriously hurt the standing of those builders with experience. "A lot of these local contractors are not quality control conscious," the California native added.

One tip from Siemens to the owner or club thinking about additions or improvements. Be sure to get a builder who is bonded. There have been cases in the past in which a builder has gone bankrupt after the start of a job and an owner has had to pay bills twice: once to the builder before the financial problems, and then to the supplier, who may have not received payment from the builder.

Most notable in Siemens' operation is his attitude of getting the best people to supervise and coordinate his jobs. Marvin Orgill is the project manager on most of the sites, and his experience takes a lot of the day-to-day pressure off Siemens. Don Burns is an independent irrigation consultant Siemens has utilized several times on other projects, and Burns is probably one of the top two irrigation specialists in the nation.

Although the technology of irrigation would escape the layman, Burns' experience has pushed him into a pains-taking walk around many course sites. Burns treks around the site figuring out what he calls his "coefficient of uniformity." He makes sure each sprinkler head and its irrigation capabilities is directly related to every other head in the system.

Burns makes a detailed map of the system for the superintendent and course ownership, so they know where each head is located exactly. Many plans at many courses today are not worth the paper they are printed on, but Burns' "As-Built" plan takes a lot of time and detail, and he stakes his reputation on it. Siemens does, too.

"Irrigation is such an exact science," Burns said, "the consultant must be sure the system is workable, especially in these dry climates. Today, poor workmanship and planning have the heads either too far apart or too close."

Watching over the specifications of the architect and spending hundreds of thousands of dollars on a project, Siemens is a demanding perfectionist and a man who questions owners and clubs that don't use professional builders. "There are always people around with a pickup and a wheelbarrow who try to pass themselves off as professional builders. Much to the dismay of the owner, when all is said and done, another second or third rate course is left on the market."

GB EDITORIAL BOARD

Superintendent honor goes to Dave Harmon

Adding to a number of awards he has already received, GOLF BUSINESS editorial advisory board member Dave Harmon was recently honored by the Old Dominion GCSA as its Superintendent of the Year.

In charge of recreational maintenance at Colonial Williamsburg in Virginia, Harmon's responsibilities include the upkeep of the Golden Horseshoe and Spotswood courses.

His award was given on the basis of work he had done on the local, regional, and national levels. He is currently president of the state turfgrass council, secretary-treasurer of the Old Dominion GCSA chapter, and a member of the GCSAA education committee.

Los Angeles manager new member of panel

Like anywhere else, people come and go in industry. The same is true for the golf business. When Tom Carroll left the ranks recently, GOLF BUSINESS had to find a replacement for the club manager section of its editorial advisory board.

With 18 years in the business, James Brewer has served the industry well, especially since taking over in 1969 as general manager at the Los Angeles Country Club.

Among his accomplishments in the golf business, Brewer has served as the president of the Southern California CMAA, as a past director of the National Club Association, co-founder and current vice president of the California State Club Association, a past regional director of the CMAA, and current chef-training advisor at the Los Angeles Trade Technical School.

Brewer's addition to the board also gives the GOLF BUSINESS panel a better geographic distribution throughout the nation.

COMPANIES

Po-San project plus for Mallinckrodt

Fighting Poa annua gets to be a full-time job for many superintendents, but a free, introductory program instituted by Mallinckrodt might give turfgrass managers some much-needed assistance.

A growth retardant for post-emergent control of fairway Poa, Po-San will keep Poa down and give a better chance for overseeded grasses to take hold. The Mallinckrodt program offers a small package of Po-San free to superintendents looking into a control program.

Mallinckrodt says Po-San will hold back aggressive growth of Poa...
Greens aeration is one of the most important maintenance jobs you have. Without it, compaction can prevent air, water and fertilizer from penetrating the surface. But aeration must also be done quickly, to get your course back in play and keep golfers happy.

The Greensaire II does both. It cleanly penetrates the soil, removing cores up to 3" deep. It is so precise that the holes it makes do not affect the roll of a golf ball.

And now, the Greensaire is 23% faster than before. A newly-designed cam lets you aerate most greens in 45 minutes or less.

The Greensaire's Core Processor attachment makes your job even easier. It catches the cores, separates good soil from debris, puts the good soil back on top, and bags the debris. You aerate, top dress and collect thatch at the same time.

Maybe you don't need the big capacity of the Greensaire II, but you do want the same fine capabilities. Then choose the Greensaire 16, with a 16" width instead of 24". You use the same selection of tines and the convenient windrow attachment makes core removal easy.

Of course, like all Ryan equipment, these machines are built to last long after amortization. So whether you aerate twice a year or once a month, you can be sure you'll get performance and longevity from Ryan aeration equipment.

For your free catalog, write OMC-Lincoln, a Division of Outboard Marine Corporation, 5502 Cushman Drive, P.O. Box 82409, Lincoln, NB 68501.

According to official money winnings, the Hogan Apex Ball has won more money than any other ball again this year. And, $11,349,968 over the last four years—another tour-topping figure.

Isn't that the kind of consistent performance you should demand in your customers' game?
that normally makes it almost impossible to establish bluegrass or bermgrass in a heavily-infested area.

Superintendents interested in receiving a free sample can write to Mark Alvey, Turf Products, Mallinckrodt, Mallinckrodt & 2nd St., St. Louis, MO 63147.

CLUBS & COURSES

CCA Florida course adds nine new holes

Nine additional holes will soon be part of the overall complex of the Walden Lake Country Club in Plant City, Fla. The facility is managed by the Club Corp. of America.

When completed the new nine will finish out the 18-hole course, measuring 6,785 yards with a par 72. Golfforce Inc. is doing the architectural work on the project, while the Wadsworth Construction Co. is the general contractor.

The plans will offer challenging, interesting holes that retain the integrity of Walden Lake’s land use, according to development official Joseph Michal. Present design plans call for both grass and sand bunkers, four holes will have water hazards and a mixture of both wide and narrow fairways.

D. K. Kunkel is the facility’s club manager and golf professional. Other services of the club include tennis, the golf pro shop and a snack bar.

Seattle muny system plans major facelift

With more than 45 years of service to the Seattle area, West Seattle Golf Course will undergo a $1 million major facelift this year, as the city initiates a major renovation program.

Architect Ron Fream, San Francisco, and irrigation consultant Carl Kuhn are collaborating on the project that will remodel and expand the present facility. Nine new holes will also be added to the existing grounds.

Kuhn, from Mercer Island, Wash., will be working on plans for a fully automated irrigation system.

Renovation will span a three year schedule. Plans are, though, to have at least 18 holes open for play during all phases of the project.

Upon completion, the three nines will measure approximately 3,000 yards each with a par 35. Seedbed improvements and improved fairway drainage will permit year round play with an anticipated increase in play of 67,000 to 100,000 rounds a year.

Fream participated in public meetings over an 18-month period to achieve golfer acceptance and approval of the masterplan.

Mrs. Eva Carr, of Northport, Long Island, N.Y., holds part of grand prize she won in Dunlop’s recent “Max-imize Your Game” Sweepstakes — a set of 9 Maxfli Investment Cast Irons, 4 Woods, plus two dozen personalized Blue Max golf balls. Pro Ralph Camerlengo, left, looks equally pleased; as Mrs. Carr’s club pro at the Tall Tree Golf Club in Rocky Point, N.Y., Camerlengo wins a duplicate Grand Prize. At right, Terry Murphy, Dunlop Territory Manager.

EDUCATION

Accrediting council okays PGA program

Getting the stamp of approval for its home study and seminar programs, the Professional Golfers’ Association was grateful in getting recognition from the National Continuing Education Council recently.

Evaluating the quality of such instructional programs, the council made an on-site examination with the PGA, attempting to evaluate the educational courses.

Homer Kempfer, executive director of the NCEC, said, “Based on the report of our visiting team, our commission can vouch for the quality of the PGA program.”

Kempfer went on to comment that the council had studied the PGA courses and had found the instruction was found to have a good reputation around the nation.

PGA President Don Padgett was happy with the high grade given his education division. “The executive committee and staff have worked to put new materials and programs into our educational efforts.

EMPLOYEES

Proposals on tap on hiring aliens

In an attempt to clean up some of the problems caused by illegal aliens working in this country, the Labor Department has some new ideas on the drawing board that could affect your course or club.

With the unemployment strain on the country, the Labor Department is trying to make sure all aliens working in the United States are here legally. The law currently provides for aliens to be allowed in, if the American workforce does not have enough skilled workers to fill the positions.

Legislation has been passed in the House of Representatives to make an employer responsible for hiring illegal aliens, but the bill has never been able to pass the Senate. States already with such legislation include California, Kansas, New Hampshire, Massachusetts, and Connecticut.
People on the move

Adding to his business experience, William P. Sovey, youngest president ever of the AMF Ben Hogan Co., has graduated from an advanced management course at the Harvard Business School. Sovey was one of a class of 160 involved in the program, which ran more than 3 months. The 38-year-old has been with the Hogan Co. since 1971.

Robert L. Austin has been elected senior vice president and chief operating officer at the Acushnet Company. Austin had been vice president and director of the Sunshine Biscuit, Inc. He had been with Sunshine for 3 years, after a 20-year career with the Andrew Jergens Co. Austin, 48, is a graduate of Ohio State.

In a basic restructuring move, Jacobsen has reorganized its various business groups to include a separate division for turf products. In an announcement by Executive Vice President Frank Depew, Howard L. McPherson has been named to head that operation. McPherson had formerly served as vice president, operations.

Tom Moore has been promoted to head pro at Atlas Valley CC, Grand Blanc, Mich. . . . Curtis Cato is in charge of club management at Heather Ridge CC, Denver . . . Frank Mackal has been named head golf professional at Lakewood CC in suburban New Orleans . . . Gary Jorgensen is club manager at Island Hills GC, Sayville, N.Y. He succeeds Philip Kaklugin, who has taken a post as manager at Hampshire CC, Mamaroneck, N.Y.

Frank Gumpert is club pro at Audubon CC, New Orleans, while Keith Evans is now pro at the CC of Terre Haute (Ind.) . . . Tony Thayer is now general manager at CC of Sarasota (Fla.) . . . Mt. Hawley CC, Peoria, Ill., has Gary Leader as its latest head pro . . . Richard Henry is the club manager at Roanoke (Va.) CC . . . Charles Walkee can be found tending the pro shop at Falls Road GC in the Middle Atlantic PGA section . . . M. M. "Chuck" Witherspoon has been appointed general manager of Savannah (Ga.) CC . . . Hank Stukart has the club pro post at Rock Island (III.) CC . . . manager at Canton (III.) CC is Virgil Lee . . . Soangetaha CC, Galesburg, Ill., has hired Dave Kerr as its new head golf professional . . . Jack Sauers is new club pro at the Country Club of Birmingham (Ala.) . . . Milt Jennings has taken over as superintendent at Rydall CC, Huntington Valley, Pa. . . . Clifford Stodghill is the manager at Oakwood CC, Enid, Okla. . . . Brook Wood CC, Quinton, Va., has recently hired Marshall Staton as its new head professional . . . Jim Bullwinkle can now be found in the superintendent's position at Heidelberg CC, Bernville, Pa. . . . Jack Northrup has been promoted to service training manager for Cushman-Ryan in Lincoln, Neb. More than 8,000 dealers have graduated from service courses taught by Northrup . . . Marty Nadenichek is the new course superintendent at Lehigh CC, Allentown, Pa. . . . W. Boyd Mattinson can be found in the club manager post at Cottonwood CC, Salt Lake City . . . Broadwater Beach CC, Billings, Mont. . . . is the new home of PGA pro Dewey Stewart . . . Mac Grouch handles the superintendent's chores at Gasconade (N.O.) CC . . . Whitey Adams is the new head pro at Rock Hill (S.C.) CC . . . Jerry Knickerbocker takes over the Texas, Oklahoma, Arkansas and Louisiana territories for Northwestern Golf . . . Mike Brooks, formerly at Karsten Manufacturing, has left there for a spot at Champions Corp., a San Diego manufacturer of woods . . . Mike Miles is the pro at Trenton (N.J.) CC . . . Walter Philbrick has the club management duties at Woodmont CC, Nashville, Tenn. . . . Larry Murphy has been named new club pro at verary CC, near Ft. Lauderdale, Fla. . . . Stan Boraski is the new superintendent at Forest Pawtuckett CC, Charlotte, N.C. . . . Confidence Golf Co., Gardena, Calif., has named Ron Rhea its manager of all international marketing activities . . . general manager at Broadview CC, Carthage, Mo., is James Hurst . . . Kings Grant CC, Summerville, N.C., has hired John Warko as its new course superintendent . . . Andre J. Scharroo has accepted the club manager job at Cascade Hills CC, Grand Rapids, Mich. . . . B. E. "Butch" Fick has been named to the post of international sales manager for Victor Golf, Morton Grove, Ill. . . . Dotta Watson is in charge of the golf program at Wichita Falls (Tex.) CC, as its new pro . . . John C. Gallagher has taken over as general manager at Palm Beach (Fla.) National G&CC . . . Linwood Harmon can now be found in charge of course maintenance at Knollwood Fairways GC, Southern Pines, N.C. . . . Jeff Barr is the pro at Peaceful Valley CC, Colorado Springs . . . Phil Freese has taken over the club management duties at Tam O'Shanter CC, Brookville, N.Y. . . . Mike Cavery is the new club pro at Fremont (Ohio) CC . . . John Robinson can now be found as the club manager at Portage CC, Akron, Denny Warner is the new superintendent there . . . Charlie Wood has been hired as the new club professional at Cleveland's Mayfield CC . . . Quinnessett CC, East Greenwich, R.I., has announced the appointment of Robert MacDermed as its new club manager . . . Tim Leslie has taken over as head professional at Tulsa (Okla.) CC, moving up from an assistant's post . . . Joseph Finnegan has been elected the president of the Central Pennsylvania CMAA . . . Jim Wickham has been named district manager for the Texas and Oklahoma areas for Moody Sprinkler . . . former PGA champion Herman Barron has been named executive golf host at Bonaventure, a resort-oriented community west of Ft. Lauderdale, Fla. . . . Nassau CC, Glen Cove, N.Y., has named Arthur V. Schmitt as its new club manager . . . Dave Stuard is the new pro at Beau Chene Golf & Racquet Club, Mandeville, La. . . . Richard Saltmarsh can now be found in charge of the clubhouse operation at Piqua (Ohio) CC . . . Dale Wilson has the club pro job at Colonial CC, Jackson Miss. . . . Wayne Vanderpool is the club manager at CC of York (Pa.) . . . Leon Langley is the new owner of Pecan Meadows CC, Clarksville, La. . . . Robert Adams is club professional at Reservation CC, Mattapoisett, Mass.

AERATE 10 TIMES FASTER, REMOVE 3 TIMES MORE SOIL... WITH THE NEW CUSHMAN AERATION SYSTEM.

The amazing new Cushman Greensaver attachment provides penetration down to 2-1/2", yet gets aeration and cleanup done up to 10 times faster than most methods.

Attachment is simple. Just put the two interlocking weight bins on your 3- or 4-wheel Turf Truckster chassis (equipped with hydraulic system), slide in three quick-release pull pins, add sand for weight, and you're ready to go.

You drive between work areas quickly, saving time. When you reach a green, just use the hydraulic lever at your side to lower the Greensaver into the turf. You keep moving, aerating at speeds up to 6 mph.

The inexpensive and easily-changed tines leave a neat 3-1/4" x 4" pattern of holes. The unique tine shape eliminates any pivoting action, allowing them to go deeper without damage to the green surface. So you can remove up to three times more soil than with other drum-type aerators.

But the Greensaver also makes the aerating operation faster by automatically picking up the soil cores. As the tines enter the ground, the cores are forced through the tines into the drum. When it's full, just open the large door to empty it. Or you can leave the sides of the drum open, to deposit the cores on the green.

And the Greensaver features a special turf guard and roller which smooth the turf and prevent the sod from rolling up on the drum.

The new Greensaver is just one more way to put your 18-hp Turf Truckster to work. With other accessories, your Cushman can spray, spike, dump, and top-dress. Use it. It's more than basic transportation. It's a total turf-care system.

Write for your Cushman Turf catalog today.
Golf business in Japan: taking lessons from U.S.?

by Mac Hunter

Lee Trevino gets some help reading a green at the 1976 Taiheiyo Club Masters Golf Tournament. Yes, his caddie is a female—98 percent of them in Japan are. U.S. golf pros are heroes there.

Golf is doing a brisk business in Japan— at least until it comes down to the business of playing it.

Indeed, one jet-age connotation applicable to The Land of The Rising Sun is that for an enthusiast to play some of Japan’s 1,000 courses, he’s going to have to greet the sun as it peeks over Mt. Fuji. Japanese golfers are, to put it succinctly, backed up to the tea house. It may be the only place in the world where a man would need to call to get a starting time on the practice tee.

But the Japanese aren’t complaining. They happily and homogenously accept conditions as they exist because since the beginning of the “Gorufu” boom they haven’t known conditions any different. So what if many of Japan’s 16 million golfers rarely swing a club at any place other than her 5,000 driving ranges? So what if many of those driving ranges are three-decked enclosed edifices where a man simply hits a ball into a net at fairly close range? That’s okay, too.

They are keen students of the game. They will drive for miles just to see an American give an exhibition, which, apart from osmosis and voracious reading, is one of the few methods available to them for learning the techniques of the swing.

Mac Hunter, well-known former golf professional, now manufactures and sells his own line of golf equipment. He recently returned from a trip to Japan and brought back the observations printed here.
What about stock and barrel.

The square footage of the shops is small and cluttered from floor to ceiling. Like everything else in Tokyo, the shops are wedged into cramped areas where no space seems to exist.

How did it begin?

Golf came to trade-conscious Japan through the store window — as opposed to America and England, where the game is rooted in heredity. Mindful of the glut of merchandising that sprang up in this country during the affluent sixties, the perceptive and innovative Japanese businessman saw the potential for it in his country. Oh, the game existed in Japan before. But only on a very limited rich man's scale. It had roughly the same patronage in Japan as polo in the U.S. There were possibly 100 courses in Japan in 1957 when Torakichi (Pete) Nakamura scored what was then considered a major upset in the Canada Cup matches (now World Cup) by defeating Sam Snead, Gary Player, and Dave Thomas of Wales by seven strokes while finishing the tournament 14 under par.

Not long after Nakamura's victory, the Japanese began to realize that golf, with its mind-over-matter and will-power demands, was ideally suited to their Zen Buddhist philosophy; "... in playing golf a person must learn to control many emotions and make the best expression of himself," suggested Tokuchika Miki, son of a Zen Buddhist priest.

In years since, golf has rivaled baseball in Japan for thorough infiltration. Originally a game for the millionaires, it reached into the lower echelons of business executives as they saw their bosses play and then got invited out to play themselves. Finally, it has filtered into the working class with the construction of driving ranges.

And when you're talking about the merchandising of Japanese equipment, barrel, or perhaps bin, is the appropriate term. Golf balls are sold in huge containers that sit outside the numerous shops that specialize in golf equipment. There is no need to worry about theft. The Japanese have the lowest crime rate in the world.

Perhaps the golf merchandise shops provide an even more explicit picture of just how resounding the golf boom hit Japan than the activity at the courses and driving ranges. It is not uncommon to find up to 20 such shops in one "unio" — an area encompassing three to four blocks. They open for business at 9:00 a.m. and close at 9:00 p.m. seven days a week. Sundays, as a rule, traffic is re-routed from certain parts of Tokyo, such as the Ginza, to permit unimpeded golf shopping.

Picture the mass of humanity following Ray Floyd down the 18th fairway in the last round of the Masters and you get a fair idea of a typical day in a golf merchandise area of Tokyo.

Western influence

The influence of American Technology can be detected in all aspects of golf in Japan. Robert Trent Jones and his son have contributed to course design. So have Jack Nicklaus and Arnold Palmer. In fact, most of the major American equipment manufacturers have a Japanese counterpart. "Made in USA" golf equipment is as much in demand now as watches, shoes, purses, etc., have long been to the style-oriented Japanese consumers.

There is also a growing awareness of the importance of display. Representatives of Japanese merchandisers have visited my company as well as others to assimilate new methods. While the golf shop in Japan is comparable to what it was in the U.S. 20 years ago, there is a growing awareness that junkiness is going out of style and that to insure that merchandise keeps moving something must be done to make it more attractive. There is an urgent move toward refinement through better counter displays and other merchandising techniques.

The lag is understandable. Golf grew so rapidly in Japan that no one needed to concern himself with making the product attractive. It was merely a matter of turning a fast yen by converting a shop that previously may have sold all manner and means of merchandise into a golf shop to keep pace with the demand. This is not to say that the shops are poorly operated; U.S. merchandising has pressured them into being competitive.

Advertising, in a country roughly the size of Montana, is a simple process. There are no large overhead costs to be absorbed. The golf magazines of Japan are printed on inexpensive paper and a merchandiser or manufacturer has only to buy space in a couple of them to reach a market that may produce a gross revenue of up to $5 million. The figurehead pro is no more the merchantizer than he is the teacher. He couldn't care less. If he has his hand out, it is merely to greet the clientele. Unless he is a playing pro, such as Jumbo Ozaki or Takashi Murakami, he enjoys no special status or social position. But the evolution of golf in Japan may change that, too.

It is a sport that seems to be rising just like the sun.
