**Information service**

For free information on any of the products and services listed below, simply fill in and mail the postage-paid reader service card bound into the front of this magazine.

Gas golf cars from **AMF Harley Davidson** offer style, a smooth ride, powerful 250-cc, hill-climbing engines, easy maintenance, and excellent dealer service. **Circle 125 on card**

A golf car made with a rigid, heavy-duty, rubber-clad steel external frame for 360°F collision protection against body damage and misalignment of steering and drive train components is available from **Davis 500/Division Davis Mechanical Contractors**, Inc. **Circle 107 on card**

One man can aerate a 5,000-square-foot green in less than 15 minutes with an aerator from **Dedoes Industries, Inc.** The manufacturer now has a pointed tine available for tees and greens which gives up to 3-inch penetration in the turf. **Circle 120 on card**

Many landscaping and construction jobs around a golf course are too big for a lawn and garden tractor and too small for a large industrial tractor. That is where 22- and 27-PTO-horsepower tractors from **John Deere** come in. **Circle 126 on card**

Standard features on gas golf cars from **Yamaha Motor Corp.** include spacious, contoured seats with poured foam construction. Also, chrome hand bags securely retains Sunday bags as well as regulation bags. **Circle 123 on card**

**The Lestronic charger...**

extends battery life and reduces maintenance.

The Lestronic battery charger extends battery life and reduces maintenance. **Lester Electrical** makes it for golf cars. **Circle 116 on card**

Automotive steering and suspension on three- and four-wheel electric golf cars from **Melex U.S.A., Inc.**, together with abundant power, gives an easy, comfortable ride over the steepest, roughest terrain. **Circle 110 on card**

A total golf course irrigation system from **Rain Bird Sprinkler Mfg. Corp.**, offers precision controllers, and low-maintenance sprinkler heads, valves, and accessories. **Circle 132 on card**

Otterbine floating aerators or Spray Sculpture floating fountains, both from **Rodsie Resources Inc.**, improve pond and lake water quality while beautifying the golf course. **Circle 113 on card**

Renovaire and Traceaire aerators from **Ryan** can be equipped with coring, slicing, or open spoon tines for aerating in all types of soils in all seasons. **Circle 105 on card**

**Mileage Master batteries**, a product of **Trojan Battery Co.**, boasts new design changes for better golf car power and longer discharge ratings. Call toll-free 800/423-6569 or **Circle 140 on card**

Kohler Co.'s new **Twin 17 four-cycle engine** offers cast iron construction and 17 horsepower. Single and twin engines are available from 4 to 23 horsepower. **Circle 113 on card**

**The charger...**

extends battery life and reduces maintenance.

The Lestronic charger totally eliminates over and undercharging on any battery, regardless of age, temperature, or condition. This "fool proof" charger will extend battery life and reduce required maintenance with precise charging every time.

The Lestronic knows when to quit.

There's no trickle charge to burn your batteries. The patented Compu-Time® timer totally shuts off when the battery is fully charged. Left connected, the Lestronic will keep batteries charged indefinitely since the Compu-Time® timer will automatically turn on every 2½ days.

**"The charger with a brain."**

Why be a golf course superintendent?

Who needs it? The prestige and pride in presenting the golf world with a beautiful, well-manicured golf course often attracts new blood into the golf turf management field. A young person loving golf, working summers on a golf course, caddying, and maybe excelling to be selected as an Evans Scholar is sometimes drawn to a career in golf course maintenance — but may grow to regret this choice. This career has attracted several thousand to major in golf turf management in college. It has grown to the point where there are no jobs available in their “love” so they have had to wait several impatient years as an assistant or in a lower position hoping for the opportunity to become the superintendent. Is it worth it? Others not finding or accepting such a lower position may have altered their objective by entering another turf related career. Not having achieved their primary objective, they are probably still looking with envy at those working as superintendents. If they have never worked as a superintendent, then it will probably be difficult to convince them how fortunate their career direction has been.

After a few years as a golf course superintendent many accept their destiny without thought of recourse or changing. These superintendents must have a special quality which permits one to disregard a profession with so many frustrations. Others not having this quality become restless and depressed and start searching for a way out. Many want out, but are reluctant to move because of age and fear. These are unhappy superintendents who continue to do an adequate job in spite of themselves. How sad.

If it were possible to obtain the data from country clubs, owners, and superintendents, we believe that these questions would present some interesting conclusions:

To clubs/owners: How old is your course and how many superintendents have there been during this period? How many were fired? Why? How many resigned? Did you find out why?

To superintendents: Age? How long a superintendent? At how many courses were you the superintendent? Why did you change jobs? Would you pursue this career again?

Most country clubs, resorts, and public courses do not deserve an experienced and dedicated golf course superintendent. Many who have this caliber of person aren’t really aware that they have a very special person in their employ. The superintendent is expected to be a master magician, which often leads to ulcers, alcohol, divorces, heart attacks, and breakdowns.

Austere budgets, equipment failures, lack of supplies, unfavorable weather conditions, poorly constructed courses, inadequate irrigation, and the golfer are but a few of the forces in the daily life of the superintendent. One man is coping with all of these forces without a supporting management team. Multi-course operations cannot be compared to 18-hole golf courses which are the majority.

ATTENTION: MIDWESTERN GOLF COURSE SUPERINTENDENTS!

The 18-hole course superintendent is alone without a secretary, a purchasing agent, and often even a mechanic. During the height of the season the job becomes 7 days a week, 10 or more hours a day. Break that down into hourly wage. Freedom is certainly there, and one can work without controls or direct supervision. But, considering all the positive aspects of the profession of golf course superintendent, is it worth it?

A large percentage have inadequate salary, no health plan, no retirement program, no job security. Extended sickness could be loss of employment. Other uncontrollable situations can also result in loss of employment. How much more untenable can a job be? The businessmen golfers playing your course wouldn’t work one day under those circumstances, yet they expect you to do so.

Consider the young man graduating from college anxious for “his” golf course. Benefits, hours, job security, and sometimes salary mean nothing. But after about 10 years his thinking should start to change. If it doesn’t, then in terms of our society, his values are questionable.

Employers of golf course superintendents not presenting their most valued employee with decent conditions, benefits, and salary deserve a high rate of turnovers, frequent turf problems, and marginal golf course conditions. Superintendents staying in such positions deserve what they are getting: little or nothing. The smart superintendent has said “Who needs it?” and moved on when the employer was hardheaded or simply couldn’t afford to produce favorable employment conditions. Former superintendents who have moved on, upwards or sideways into the turf industry have no regrets and profess that they would never be a superintendent again.

The status level of the superintendent will never rise until pressure groups are formed to insist the demands are met. If this is not done, then why be a golf course superintendent?

Who needs it?

Author’s note: A good first step would be to hand this article to your greens chairman or employer. Or place the article on bulletin boards, as it is directed at the employer and to open the eyes of those going into or new in the profession. Others know it.

Gene Burruss, CGCS
Supervisor of Golf
Cincinnati (Ohio) Recreation Commission
OUR BEST DESIGN CHANGES EVER... INTRODUCE THIS NEW GENERATION OF TROJAN "MILEAGE MASTER" BATTERIES

- One piece solid covers assure easier, more efficient cleaning.
- Concealed mini-length cell connectors with less resistance increase performance.
- Filler caps spaced closer to center give minimum interference with terminal connecting cables.
- Trojan Batteries powered the first electric golf car 30 years ago — only by improved performance can we stay in first place.
- We're designating this new generation by types taken from their discharge ratings in minutes at a 75 AMP rate.
