It’s either a meteor that could destroy the earth, or the soil conditioner that moisturizes and permanently aerates your turf.

Oh good, it’s the second one.

Now you and your turf can take a deep breath. Eagle’s Choice is the permanent soil conditioner made of vitrified clay porous ceramic. Its porosity provides improved moisture and nutrient retention. Its stability won’t break down, providing permanent aeration, thus reducing compaction and water consumption, and improving percolation and air movement throughout the root zone. The result is better-looking, healthier greens and beautiful, more vibrant fairways now and for years to come.

Eagle’s Choice is the only manufacturer of vitrified clay porous ceramic products with national distribution. We handpick our distributors to provide our customers with the knowledge and highest quality of service. Eagle’s Choice is available in a 50-lbs. bags or in bulk for greater savings. We can also blend with sand to meet your specification.

Call 1-888-867-6727 or visit www.diamondpro.com to find out more about how Eagle’s Choice can make a positive impact on your course.
Remember High School health class? You learned the basics of nutrition. Eating right is the foundation to staying healthy and looking great! The same holds true for your turf and soil. Providing a nutritional foundation for your turf management program is the cornerstone of Nature Safe's philosophy. Formulated from the highest quality animal and plant proteins, yeast, sugars, carbohydrates and humus, Nature Safe conditions the soil, stimulating microbial activity and delivering a predictable, slow release feed to the plant. The result, healthy turf that can improve the efficacy of an overall IPM program.

Nature Safe's extensive product line is validated by over 20 university research studies. Exciting new formulations like 20-1-5 and 13-0-11 (with Polyon®), as well as 15-2-8 (with Meth-Ex 40®) have been added, providing unparalleled options for turf managers. Find out why superintendents around the country are making Nature Safe their natural choice for optimum soil and plant nutrition.

THE BREAKFAST OF CHAMPIONSHIP Quality Turf!
The Great Spec Debate
Don't be afraid to try California greens, insists Mike Hurdzan of Hurdzan/Fry Golf Course Design. But you can't beat USGA greens, counters Jim Moore, USGA's director of construction education.

Field of Dreams
Thanks to several Arizona superintendents, students at a tiny school on an impoverished Indian reservation will get their much-needed exercise by playing and running on turf fit for a golf course.
By Larry Aylward

Inside the Fringe
What's goin' on on the green? Florida superintendent Joe Boe cites his top 10 reasons why golfers gripe about greens, Dave Wilber talks about making peace with Poa annua, and more.

Let's Get (the Best) Bent
Superintendents want the finest varieties money can buy.

**Cover Story**
In this special issue, we cover the gamut on greens — from specs to speed to alternative spikes.

**Tread Lightly**
Alternative spikes have relieved courses from the heavy damage of traditional metals, but new cleat designs have some superintendents concerned.
By Frank H. Andorka Jr.

**To Infinity And Beyond**
High-tech features top the list of what superintendents expect from tomorrow's greens mowers.
By Frank H. Andorka Jr.

**About the cover**
We found this nifty photograph by Joe McBride of a golf ball moving on a green, like a Mac truck rolling down the highway, from Tony Stone Images.

**Tread Lightly**
Alternative spikes have relieved courses from the heavy damage of traditional metals, but new cleat designs have some superintendents concerned.

THE NEW B SERIES
LIGHTWEIGHTS
WHAT A FAIRWAY MOWER SHOULD BE.

Excellence has a new letter. The new John Deere 3215B Turf System I and the 3235B Turf System II take lightweight fairway mowers to new heights of efficiency, cut quality, and grass collecting. Both machines boast new 22-inch bedknife-to-reel cutting units. These units have larger reel motors than the previous generation for improved power. (The 3235B can be equipped with ESP cutting units for use in lush, warm-season grasses.)

A new yoke and ball joint design on the cutting units improves grass collecting. And the cutting units can be easily removed for servicing. A more efficient new triple pump has one inlet instead of two. That means less leak points and fewer parts. It also has 12-tooth gears for a lower internal pressure drop and improved flow dynamics. A standard electric fan drive improves engine cooling performance while reducing sound levels to an all-time low. And to cap it all off, both the 3215B and 3235B sport new streamlined, fiberglass hoods. To see the new John Deere Lightweight Fairway Mowers in action, call 1-800-537-8233 for your free video today. Then call your local John Deere golf & turf distributor.

Nothing Runs Like A Deere
And the Oscar goes to ...

After reading your July Flagstick column, I couldn't help but share an Oscar Miles story with you. I'm a superintendent of a Chicago-area muni that does about 55,000 rounds a year.

We were hosting one of our local chapter meetings, and I spent the couple of weeks prior nervously running around sweeping dust under the carpet for the "party."

Following the day, Oscar, with whom I had no prior acquaintance, took the time to give me a call and thank me for my efforts, compliment me on our golf course and invite me and three friends to the Merit Club as his guests.

It was a wonderful gesture that I will always remember and appreciate. It doesn't surprise me at all that you chose him as an example of nobility in our profession.

While I never had the good fortune to work for Mr. Miles, I would like to nominate Bob Williams for an "Oscar." Bob is the retired superintendent of Bob O'Link GC in Highland Park, Ill. Bob (Bruce Williams' father) prepared dozens of greenshorns like me for careers as superintendents.

Once Bob took you on his staff, he made it his business to fill in the blanks and smooth the rough edges.

In my case, he took one look at my talents and put me on the remedial track, even to the point of giving me personal instruction on the proper technique of operating a shovel — I'm talking about the manual kind.

Whatever success I enjoy in this crazy and mysterious field, I owe to the patience and example of operating a shovel — I'm talking about the manual kind.

Shorter courses require advance planning

I enjoyed "Hacks Long for Short Courses" (Money Shot, June) and certainly agree with many of your comments. There's a place for shorter courses and as you say, "People will come, but they are getting tired of waiting."

We're involved in two First Tee projects that will have shorter courses and a project in Lake Geneva, Wis., that actually has a 18-hole short game challenge course adjacent to the 18-hole regulation course.

The short-game challenge course is one of the strongest selling points of the project and is sure to be a hit. From the beginning, the developer wanted to provide a course that would appeal to golfers seeking an alternative to the par-72, 18-hole big course.

Reprints of Golfdom articles, advertisements, news items or special announcements are available through Advanstar Marketing Services. Customized to meet your specific needs, reprints are highly effective when you use them to:

- Develop direct-mail campaigns
- Provide product/service literature
- Create trade show distribution materials
- Present information at conferences and seminars

Extend your coverage to your website. Custom reprint packages include an E-Print of the same article to post on your website.
You can trust the stars if you like, but the fact is that **UHS Signature Brand Fertilizers™** are outstanding performers.

But don’t take our word for it, both university trials and customers are attesting to Signature’s premium results. Check with your UHS salesperson for more details.
Working To Enhance Our World

United Horticultural Supply is your source for professionals who have the technical expertise and can provide all the products you need to be a success in today's competitive market.

- Fertilizers
- Herbicides
- Fungicides
