We didn't get this good by accident.
Pioneered

When Growth Products developed the first liquid slow release nitrogen fertilizer over two decades ago, we broke new ground. Our liquids turned the page from granular forms of slow release nitrogen to a new chapter that combined the benefits of SRN with the advantages of tank mix compatibility. While your spray truck is cruising along the terrain applying fungicides, Growth Products liquids can be added right in -- reducing both valuable time and labor costs.

Benchmark

Growth Products liquids have set the benchmarks for quality, reliability, and consistency. For over twenty years we have developed crystal-clear liquids, tweaked the formulations, and pushed the analyses to their maximums. The secret lies in our true hot-blend manufacturing process using only technical-grade raw materials. Try the Growth Products liquid line, and in no time at all you’ll be setting some quality benchmarks of your own!

Perfected

Essential is just one example of the perfection we strive for in our organic line. It contains only the highest quality organic ingredients in the correct agronomic ratio of humic acid to kelp. And our Essential label is the most comprehensive in the industry, with 31 guaranted ingredients. Whether you’re looking for superior root growth, lush green color, or soil quality improvement, you can rely on Essential.

Liquid Fertilizers
- Nitro-30 (30-0-0) with 85% SRN
- Nitro+K (22-0-16) with 82% SRN
- 18-3-6 with 50% SRN plus Micros
- Triple Ten (10-10-10) with 40% SRN
- Hi-Kal (15-2-15) with 50% SRN plus Micros
- 0-0-25 Liquid Potassium
- 0-30-0 Liquid Phosphorus
- All Season K 8-4-24 with 50% SRN
- Starter Plus 8-32-5 with 50% SRN

Natural Organic Liquids
- Essential - Soil Amendment & Biostimulant
- Companion Microbial Inoculant
- Control De-Thatcher 15-0-0 with 15% SRN
- pH Reducer 5-0-0 (Citric Acid Solution)

Micronutrients
- X-Xtra Iron 9% (6-0-0)
- Micrel Total with 9 Chelated Micros
- Calcium Chelate 8% (6-0-0)

cover story

BY LARRY AYLWARD

John Szklinski is at Southern Hills CC because he worked his tail off to get there. But it hasn’t been easy preparing for the U.S. Open.

About the cover

Tulsa, Okla., photographer Bill Welch spent a beautiful April morning following John Szklinski around Southern Hills CC while he busily prepared for the U.S. Open. Needless to say, Welch got a workout.

Who was that guy? – The statue of the guy with the beard behind the statue of Babe Zaharias on page 16 of the April issue (“Play 18, Peruse the Art”) is Old Tom Morris, not Bobby Jones, as we reported. Sorry Old Tom.

Reap-What-You-Sow Philosophy

New Jersey golf course owner finds that charity and golf make perfect sense.

By Larry Aylward

Golfdom welcomes Mike Heacock, former vice president of agronomy and maintenance for American Golf Corp., to its editorial mix. Heacock wants to field your questions in his new column, “Been There, Seen That.” In his debut column, Heacock writes about what it’s really like to work for a management company.
No other product beats the durability and design flexibility of VERSA-LOK solid retaining wall units.

No exceptions. Only VERSA-LOK, with its unique pinning system, permits construction of an unlimited variety of curves, corners, and steps without specification of special units.

Growth Products offers Companion®, a microbial inoculant containing Bacillus subtilis GB03 bacteria. University and field trials have shown it to be 96% effective on root-borne fungal diseases when combined with significantly reduced rates of chemical fungicides (and 30% - 72% alone). It is safe for use on a wide range of plant materials (no risk of phytotoxicity). Companion requires no special handling/storage and has a shelf life of more than two years. It may be used with any irrigation equipment without fear of clogging. Companion has been granted a wide-scale Experimental Use Permit (EUP) by the EPA. Full EPA registration is expected sometime next year.

CALCIUM DEFICIENCY CORRECTOR

QUELANT®-Ca
5-0-0
Calcium & Amino Acids

Quelant-Ca provides readily available calcium chelated with amino acids so that it is easily absorbed by the leaves and/or the roots of the plant regardless of most soil, water, and environmental conditions. The unique formulation of amino acids used for chelation was developed not only to facilitate absorption by the leaves and roots, but to increase mobility of the calcium within the plant.

WE'VE GOT MAIL

Reality TV
I'm shocked and disappointed in your April cover story ("Made for TV"). Has Golfdom already succumbed to sugar-coated, soft-pop journalism? This article's twisted view of hosting a televised event has me wondering what you guys are doing.

As superintendent at Kemper Lakes GC, I have hosted four SBC Senior Opens, the only Senior Tour event on network TV. I am clueless about the situations described in your article. Talking to TV crews? Relationships with TV personnel? What are you talking about? I'm lucky to get a few moments with the production manager.

The real deal is more like this: a group of cowboys arrives at the beginning of the week and starts to set up their gear. I try to ask them to stay away from any problem areas, and I give them my cell phone number, hoping they will call before doing something wrong, not after. I constantly keep an eye on all activity and pray that it is dry, because trying to balance the needs of all kinds of people — those erecting scoreboards, making food, constructing scaffolding and skyboxes (but rarely any TV personalities) is a lot easier if it doesn't rain.

Why don't you try talking to some of us who have hosted annual events that don't get the spotlight of a Major or don't have superintendents who have had more than 30 years to establish some media contacts?

Gregg Rosenthal
Certified Superintendent
Kemper Lakes GC
Long Grove, Ill.

D as in ...
After reading the article on the GCSAA show in "Big D" by Pat Jones ("Beer and Scribbles from Big D, April"), several words come to mind: dull, dreary, dingy, dreadful — just to name a few. In fact, a friend of mine called the airline to change his ticket, at a fee, just to leave a day early.

My suggestion, and many other superintendents' suggestion as well, would be to have the show in some new locations in the North. We're inside 90 percent of the time anyway. Why not Seattle, Minneapolis, Chicago or New York?

Peter W. Nolan
Superintendent
Hunter's Ridge GC
Marion, Iowa

I beg to differ with you on your perspective of Dallas. I lived in North Texas from 1992 to 2000, and I loved it there.

I realized the weather sucked the whole week of the conference, but that is to be expected anywhere in the United States in February. I didn't take any of the shuttles, but is that Dallas' fault or the hotels'?

Does your dislike for the city stem from the fact that maybe you don't like the Dallas Cowboys? Your picture in the magazine does show you that you have a vague resemblance to Pittsburgh Steelers head coach Bill Cowher.

Danny Arena
Superintendent
Henry Homburg Municipal GC
Beaumont, Texas

Feel like going postal? We want to hear from you. You can e-mail your letters to Frank Anderka at fanderka@advantastar.com, fax to 440-891-2675 or send them via snail-mail to: 7500 Old Oak Blvd., Cleveland, OH 44130. Make sure to include your name and phone number for verification. Letters may be edited for length or relevance.
Man, That's One Tough Ball Washer

Competitive ball washers? Listen up, you lightweights. The new Century Ball Washer from Standard Golf is going to make you look like the broken-down, splash-monkeys you all are.

Thick Skinned

For starters, this baby is built like a tank. The Century's thick walls of the toughest composite materials around are like armor plating against rain, harsh sunlight, and even the errant shots of retired judges. It'll keep its rugged good looks for years to come.

Can it clean? The Century has exactly one wash cycle, and it ain't gentle. The crank action plows up to four balls at once through a forest of tough nylon bristles, scrubbing all those hard-to-reach places without once splashing you. The built-in overflow makes sure the outside is never soapy and sludgy (because that's totally uncool). We even added a convenient slot for our new effervescent SparKleen™ Soap Tablet.

Engraved or Tattooed Logo?

Purchase nine Century Ball Washers, and we'll put your logo on all of 'em, FREE. (Normally we laser engrave it, but for a ball washer this tough, we're considering tattoos.) Finally, the Century comes in five cool colors, and is available in several console options as well. If you're looking for a new ball washer, don't settle for some lightweight splash-monkey. Get the new Century Ball Washer from Standard Golf. But unless you want to start something, don't STARE. Just ask for Standard Golf.

The thick-skinned Century Ball Washer is built to take all kinds of abuse.

Sure, his bristles are the only ones tougher than ours, but can he wash four balls at once?

Cedar Falls, Iowa USA

ASK FOR STANDARD GOLF

Circle No. 106
For the past three years, GCSAA officials have studied the idea of launching an e-commerce initiative in about the same fashion that a hungry Sylvester the Cat studies Tweety Bird up in his cage. They wanted it so badly they could taste it, but they couldn’t quite figure out how to do it. Sufferin’ succotash!

In April, GCSAA finally struck a deal with XS Turf, a new division of XS Ag, which is the acknowledged leader in online sales for farmers. The idea is to charge a 3-percent transaction fee on sales of chemical and fertilizer products traded over the GCSAA/XS platform — cleverly named the Golf Super-Market. GCSAA and XS then divvy up the transaction fees in undisclosed shares.

But then, GCSAA and XS promptly delayed the “pilot” launch of the big, new GCSAA cyber-mall because they supposedly don’t have sales tax issues and other details worked out. Ironically, those problems were “disintermediate” the whole idea during a meeting in Lawrence, Kan.

Why would those companies — the people who pay for the 85 percent of GCSAA’s operations that aren’t funded by dues — object to this concept? Let me count the ways:

1. Times are already tough for many local distributors, and GCSAA’s online sales effort threatens to further “disintermediate” them. “Disintermediate” is a fancy way of saying, “Cut out the middleman.” Remember that local dealers and reps aren’t just the sales and service backbone of the industry — they also fund more than half the cost of chapter programs and services.

2. The association is also essentially competing with its own clients, particularly companies like Golfsat that invested heavily in association trade show space, magazine ads, etc.

3. Superintendents aren’t exactly beating down the doors to buy things online. In Golfdom’s independent survey last year, only 3 percent of computer-using superintendents said they actually bought anything business-related on the Net, while more than 40 percent said there was no way they would buy anything online soon.

BY PAT JONES

GCSAA IS LOOKING
FOR NEW BUCKS,
AND (VOILÀ!)
TRANSACTION FEES
FROM E-COMMERCE
SEEM TO OFFER
NEW REVENUE

4. What if anything, is member-driven about this idea? I’d be astounded if the words, “Gee, I wish I could buy a case of fungicide online through my professional association” ever once popped out of anyone’s mouth. Isn’t the role of the association to serve the needs of the members rather than to define — and then profit by — them?

That’s what I’m hearing from the manufacturers, distributors and even some superintendents about this idea. Now, here’s my take:

The association’s intentions are honorable but misguided. But GCSAA has to pay for programs, initiatives and 120-plus staff members, and it’s concerned about the possibility of trade show and magazine advertising revenues shrinking. They’re looking for new bucks, and (Voilà!) transaction fees from e-commerce seem to offer new revenue.

So, with this pilot venture, GCSAA is dipping its toes in the water to see if e-commerce might be the next big association money machine. The question is whether the association is willing to play a financial game of chicken with irritated suppliers, distributors and other “partners.” Personally, I doubt GCSAA will take that risk for 3 percent of an unknown but extremely dubious online market.

Don’t get me wrong: GCSAA should be active in e-business. It should have a first-class Web site that allows members to pay registration fees, buy books and training materials, take online seminars and download useful tools. But when its e-business threatens to put your local supplier out of business, something isn’t right.

Pat Jones is the publisher/editorial director of Golfdom. He can be reached at 440-891-3126 or pjones@advanstar.com
