Back in Business at Baltusrol
After exiting Oakmont and nearly leaving the greenskeeping field, Mark Kuhns finds new life at the site of this month’s PGA Championship.
By Thomas Skernivitz

Oakmont’s Overhaul
Members seek to restore classical course to its glory days . . . and bring it up to date.
By Larry Aylward

Mr. Sand Man
Nobody crafts a bunker better than Jeff Bradley, the shaper of the Coore-Crenshaw design team.
By Geoff Shackelford

Under Fire
Superintendents burn turf to preserve native vegetation and encourage wildlife.
By Anthony Pioppi
cover story
BY BRUCE ALLAR

Traditionalists will argue for 18 holes and par 72, but a growing number of architects and developers suggest a new reading of the game’s history.

About the cover
Golfdom’s Carrie Parkhill used this image from Comstock to help illustrate that change is coming to the golf industry.

Hold Water
Some superintendents are irrigating less during overseeding — and getting good results.
By Peter Blais

Building a Better Green
USGA’s changes to “Recommendations for a Method of Putting Green Construction” make agronomic, economic sense.
By Sarah Willnerd

News with a hook
12 To Go Where No Superintendent Has Gone Before?

TurfGrass Trends
This month Golfdom’s practical research digest for turf managers discusses the role of nematodes in an integrated pest management program. See pages 59-74.
From Root Zone to Desktop
Now, you can monitor real-time moisture, temperature and salinity levels from the root zone of greens, tees or fairways directly on your desktop computer. The RZ-Wireless system provides precise information allowing you to meet your seed and fertilizer requirements, and it biodegrades completely, leaving nothing to remove. Your seed, your fertilizer, your reputation.

BLUEYELLOW
The Smartest Way to Make Green

www.blueyellowpro.com
What we learned from building this machine is what we use to build yours.

A greensmower is not just a greensmower. At least not at John Deere. With every golf & turf product we design and build comes the readily available resources of our entire company.

Which allows us to work with folks in our Agricultural Division to come up with flat-faced O-rings on hydraulic fittings to guard against leaks. Or to join together with our friends in the Construction and Forestry Division to produce sealed electrical connectors that protect against moisture.

So, in the end, you’re not getting just a greensmower, or an aerator, or a utility vehicle. You’re getting the very best of what our entire company has to offer. And we promise that will always be the case with every product we make.
Golfdom

Introducing New Broad Spectrum 26/36 Fungicide™
With A Dual Mode of Action

New 26/36 Fungicide™, with its contact and systemic modes of action, is double trouble for a broad spectrum of tough to control diseases like dollar spot and brown patch. And the dual-action benefits don’t stop here.

Better Resistance Management, Long Lasting Control

The proprietary formulation of 26/36 Fungicide – a combination of iprodione and thiophanate-methyl – reduces concern for resistance and increases the length of disease control, up to 21 days. That’s better resistance management with long lasting disease control.

Great Replacement for the DMIs

26/36 Fungicide is also a great summer replacement for the DMIs that can have a growth regulation effect leading to lower overall turf quality, reduced turf density, bare spots and poor playing conditions.

You Can Count on Cleary – and New 26/36 Fungicide

Cleary, with over 65 years of commitment and experience, has been the name you can count on for fungicides and disease control solutions that work time and again.

New 26/36 Fungicide – Long-Lasting Disease Control, Without Growth Regulation.

For more information on new 26/36 Fungicide and Cleary’s Solutions Programs, visit our web site at www.clearychemical.com

David Pursell jokes that he was born with a fertilizer shovel in his mouth. The 46-year-old has progressed to CEO of the family business, Pursell Technologies Inc. (PTI), begun in 1904 and known then as the Sylacauga Fertilizer Co.

David began working for the company when he was 12 and his father, Jimmy, was in charge. He has been running the show since 1997 when his father stepped aside and became chairman.

One could say there’s gold in those slow-release fertilizer pellets that PTI has mastered and marketed. David has been living a good life while tending to the business in rural Alabama. He drives a neat car, lives in a nice house, dresses in fine clothes, and works in a spacious office that overlooks the 18th fairway of the sensational golf course on the company’s property. Oh, yeah, he owns some nice clubs and can hit the ball pretty well, too.

I guess you could say he’s living the American dream to its fullest. I guess you could say, as the song says, “Life’s been good to him so far.”

“People think I’ve got it made,” David is not afraid to admit. “They say, ‘You work here, you live here, and you play here.’ ”

David admits it’s a “pretty cool” lifestyle he leads. But he also knows there’s more to life than driving a cool car and possessing a decent golf game.

“They don’t bring that deep-down satisfaction that I need to survive in my life,” he says of the material things in his life.

David fetches a photo of his six children — four daughters and two sons — and shows it to me. The job, the car, the house, the golf course and all the pleasures they provide don’t bring half the satisfaction to his life as his children do.

There is a distinct difference between pleasure and satisfaction, David notes. Pleasure is wonderful but can lack depth. Satisfaction is wonderful but runs soul deep. “It’s where you find the fullness of joy,” David says softly.

Don’t be mistaken that David isn’t grateful for his work and what it has provided him. He takes the family business very seriously. When it comes to his job, David’s co-workers will tell you that he’s a perfectionist and a stickler for detail. Make no mistake: David wants the business to succeed as badly as anyone.

But he wants his children to succeed even more. And while the success of the business is measured in part by dollars, the success of his children is measured on a more benevolent scale. Given the choice between securing record profits for the company or raising his children to be good and righteous people... well, it’s just not a choice for a David. Put it this way: You’ll never read about David Pursell the CEO quitting his job to spend more time with his family. He’s doing that now.

“My children are my true legacy,” David says convincingly. “It’s not this fertilizer business.”

And so David sets out daily to nurture the relationships with each of his children. He strives to be a better parent. He longs to form a special bond with each of his kids.

In June, David traveled to northern California with one of his twin 14-year-old sons, Martin, to attend the JH Ranch, the site of a week-long retreat where David and his son spent some quality time together. But this is not the quality time that compares to attending a baseball game together and sharing a bag of peanuts. We’re talking quality time at a much higher level, as in David and Martin discussing the purpose of existence and the importance of values in living a respectful life.

In July, David took his other son, Parker, to the JH Ranch. He has now taken all of his children on the retreat. It is a special place, David says, where each child warranted his undivided attention for seven days.

“If you devote 100 percent of your time to...”
Introducing advanced premium Kentucky bluegrass from Turf-Seed, Inc. All are distinctly different and all are improvements over Midnight. Each has beneficial attributes to better turf!

**New Moons Rising after Midnight...**

- **Moonbeam**
  - Excellent dark green color and turf quality with good leaf spot and Fusarium resistance. Improved resistance to powdery mildew.

- **Full Moon**
  - Very good heat tolerance with good resistance to stripe rust and stem rust. Seed production fields show very little powdery mildew, which should be a benefit to sod growers.

- **Moonshine**
  - Shamrock x Midnight hybrid cross with good stem rust and stripe smut resistance. Excellent, economical blend component.

- **Midnight Star**
  - Excellent low-mowing and heat tolerance and dark green winter color.

- **Midnight II**
  - Dark blue-green color with medium leaf texture and good year-round color.

- **Prosperity**
  - Very dark green color with fine leaf texture that has good wilt and heat tolerance with less water. Good resistance to stripe rust and leaf spot with improved resistance to powdery mildew.
a child for a long period of time, he or she will start to open up to you, and your communication will just blossom," David says. "That's what you want."

There are signs in David's office of such communication occurring. On the wall above and behind David's computer is a collection of yellow and pink Post-It notes from his children. One note, from his daughter, Peggy, reads: "Dad ... you are an absolutely amazing father. Thanks for all you do for your family."

Another note, from his daughter, Ramsey, reads: "Hey daddy, I love you! Thank you for all you do!"

In some families, it's hard for children to tell their parents they love them and vice versa. But not in the Pursell family, where the words are spoken securely.

David speaks of his oldest child, the 22-year-old Peggy who's a senior at Auburn University. She calls her dad almost daily during the school year. They talk about boys, school and her career.

"She's asking for my advice," David says. "How special is that?"

So special that it should inspire all of us who are parents to form such devoted relationships with our children.
You're looking at one of the pristine TifEagle greens nestled among the coconut palms of Santiburi Samui Country Club in Samui, Thailand. Impressive view, isn't it? Impressive greens, too. No wonder TifEagle is spreading like wildfire across the putting surfaces of some of the most impressive clubs around the world. In Argentina, Australia, Mexico, Spain, Thailand, Hong Kong, and especially right here in the good old US of A. From the flowering courses of the desert Southwest to the palm-lined greens of the Sunshine State, TifEagle has landed. It's not hard to figure out why. TifEagle Bermudagrass was bred to stand up to the physical stress produced by extremely low mowing heights. With frequent brushing, grooming and light top dressings, TifEagle requires less verticutting to control thatch buildup than the other ultradwarfs. TifEagle also recovers more quickly from injury, has better color, and is extremely cold hardy, drought tolerant and disease resistant. So whether you're involved with the repair or restoration of your existing greens, or installing an entire new course, insist on the best. Specify TifEagle Bermudagrass by name. It's the ultimate ultradwarf bermudagrass.
**Golf Rounds Played**

The percentages below represent the difference in number of rounds played in April 2005 compared to the number of rounds played in April 2004.

**Golf and Work**

In your opinion, how important is it for superintendents to play golf regularly (twice a month) in order to succeed in their field?

- Very important: 55 percent
- Somewhat important: 32 percent
- Somewhat unimportant: 8 percent
- Not important at all: 4 percent

SOURCE: 2005 GCSAA LEADERSHIP SURVEY

**Battling BO**

It's August, it's hot, and your crew members are sweating profusely and dripping like a bad sprinkler head. And they stink. This is not good if they're coming into contact with your golf courses' customers or their clubhouse co-workers for that matter. According to the Employer's Resource Council, there are things you should do to address their personal hygiene when bad odor becomes a threat:

- If a problem arises with an employee, talk to that person in private about the matter.
- Enforce policies consistently among all employees.
- Be sensitive with an employee about the matter and don't embarrass him or her.
